PROJECT SUMMARY

Progea, Inc. (Progea) was retained to conduct a Phase I Environmental Site Assessment (ESA) on the parking garage located at 400 Ranstead Street in Philadelphia, Philadelphia County, PA and commonly known as Bourse Garage (the "Subject Property"). This Phase I ESA was performed in accordance with ASTM E 1527-21, Standard Practice for Environmental Subject Property Assessments: Phase I Environmental Subject Property Assessment Process. Any exceptions to, additions to, or deletions from these guidelines are described in the body of this report. A summary of recognized environmental conditions (RECs), controlled recognized environmental conditions (CRECs), and historical recognized environmental conditions (HRECs) is provided below. In addition, Progea has included a listing of other environmental conditions (OECs), which include non-scope ASTM conditions and/or environmental best management practices.

This assessment has revealed no evidence of RECs, HRECs, or CRECs, as defined by ASTM, in connection with the Subject Property.

Continued viability of this Phase I ESA: This environmental site assessment meeting or exceeding the ASTM E 1527-21 practice is presumed to be viable when it is conducted within 180 days prior to the date of acquisition of the Subject Property (or, for transactions not involving an acquisition such as a lease or refinance, the date of the intended transaction). The following dates were used in calculating the viability date of this report:

Visual Inspection - April 6, 2023
Interviews - April 6, 2023
Review of Government Records - March 28, 2023
Declaration by Environmental Professional - April 12, 2023

Viability Date of this Report - September 24, 2023

EXECUTIVE SUMMARY

Progea, Inc. (Progea) was retained to conduct a Phase I Environmental Site Assessment (ESA) on the parking garage located at 400 Ranstead Street in Philadelphia, Philadelphia County, PA 19106, and commonly known as Bourse Garage (the "Subject Property"). The objective of the assessment was to provide an independent, professional opinion regarding recognized environmental conditions (RECs), as defined by ASTM, associated with the Subject Property. This Phase I ESA was requested for the purpose of qualifying for the landowner liability protections to CERCLA liability.

Subject Property

The Subject Property currently consists of one tract of land, totaling approximately 0.35 acres, developed with one 11-story parking garage with a basement level and street level retail tenants. The parking garage extends from the ground floor to the 11th story and reportedly contains 453 parking spaces. The street level tenants include Evergreen Deli and a movie theater. The movie theater has a street level entrance that leads to five theater rooms located on the basement level. A third, vacant tenant space was previously occupied by Bourse Cleaners, a drop-off dry cleaning business that vacated the space in January 2023 and is further discussed in Section 3.5. A loading dock is located on the north side of the and contains two hydraulic trash compactors that are reportedly shared with an office building located across the street. There are two elevators located onsite, neither of which is hydraulically operated. The building was constructed in 1988 and has not had any significant renovations since that time. At the time of Progea's inspection, the building was approximately 66% occupied and it has an approximate total area of 200,365 square feet (SF). No dry cleaners, gas stations, or light industrial facilities are currently located on the Subject Property. The current operations at the Subject Property are not considered a REC.

Historical Review

Review of aerial photographs (1940 - 2019), historic topographic maps (1891 - 2019), and Sanborn maps (1916 - 2006) indicate that the Subject Property was developed as early as 1900 with office buildings occupied by financial tenants. By 1950, the eastern portion of the Subject Property had been razed and redeveloped with a surface parking lot. All onsite buildings had been razed by 1962, at which time the Subject Property was fully developed as a surface

parking lot. The Subject Property was redeveloped with the present-day parking garage with street level retail tenants in 1988. The Subject Property has remained in its present-day configuration since 1988.

Bourse Cleaners was identified at alternative Subject Property address 44 South 4th Street from 1995 through 2020 and in the EDR radius report for the years 1996 through 2014. The radius report does not list the dry cleaning facility on any hazardous or regulated waste databases. Bourse Cleaners had recently vacated the Subject Property at the time of Progea's visit and the empty tenant space was thoroughly inspected. A prior report, dated January 2018 and reviewed in Section 3.9, indicated that the cleaners was a drop-off facility at the time of the inspection and, due to size limitations, did not appear able to support dry cleaning equipment or associated operations. Additionally, there were no signs of prior equipment or abandoned plumbing in the rear storeroom at the time. According to the site contact, no dry cleaning plants have ever been located at the Subject Property and the former Bourse Cleaners always operated as a drop-off business. Based on these observations, it was determined the dry cleaner has always operated as a drop-off facility. Therefore, this former tenant is not considered a REC to the Subject Property. The historic uses of the Subject Property do not represent a REC.

Regulatory Data Review

The Subject Property was identified on the EDR Historic Cleaners database. Bourse Cleaners was listed at alternative Subject Property address 44 South 4th Street from 1996 through 2014. Based on the observations described above, it was determined the dry cleaner has always operated as a drop-off facility. Therefore, this listing is not considered an environmental concern to the Subject Property.

Hazardous Materials, Petroleum Products, or Waste

The Subject Property was assessed for signs of storage, use, or disposal of hazardous materials. The assessment consisted of noting evidence (e.g., drums, unusual vegetation patterns, staining) indicating that hazardous materials are currently or were previously located on the Subject Property. No hazardous wastes are currently generated on the Subject Property and no bulk chemicals were observed on the Subject Property. None of the records reviewed indicated

the historical use of large quantities of hazardous materials at the Subject Property.

Storage Tanks

The Subject Property was inspected for evidence of aboveground storage tanks (ASTs). No evidence of ASTs was observed at the Subject Property during the assessment. In addition, no features were observed at the Subject Property that would have required ASTs to be present, and there are no ASTs registered with the Pennsylvania Department of Environmental Protection (PADEP).

The Subject Property was inspected for evidence of underground storage tanks (USTs) (e.g., vent piping, dispensing equipment, and pavement variations). No evidence of USTs was observed at the Subject Property during the assessment. In addition, no features were observed at the Subject Property that would have required USTs to be present, and there are no USTs registered with the PADEP.

Surface Water Conditions

No pits, ponds, or lagoons were observed on the Subject Property at the time of the Subject Property inspection.

Evidence of Spills or Releases

No visible evidence of spills or releases was observed at the time of the Subject Property inspection.

Wells

According to EDR, there are no records of active, inactive, destroyed wells, or dry wells at the Subject Property. Additionally, during the Subject Property visit no wells were observed on Subject Property.

Hazardous Building Materials

A visual inspection for friable and damaged non-friable suspect asbestos containing materials (ACMs) was conducted as part of this Phase I ESA. No friable or damaged materials were visually identified during the Subject Property inspection. Progea recommends continuing to follow the existing Asbestos Operations and Maintenance Plan to manage ACMs in place and as part of routine maintenance activities. Regardless of the date of construction,

an asbestos survey will be required prior to any renovations or demolition activities.

Vapor Encroachment Condition

As part of Progea's evaluation of the potential for chemicals of concern (COCs) to be present at the Subject Property or migrate onto the Subject Property, Progea conducted a limited Vapor Encroachment Screening (VES). The goal of the VES is to identify potential vapor impacts in the subsurface or within Subject Property buildings caused by the release of COCs into the soil or groundwater at the Subject Property or in near proximity to the Subject Property. As such, Progea reviewed all local, state, and federal database information as well as historical maps and aerial photographs. During the Subject Property visit, Progea did not observe potential contaminant sources that would contribute or cause COCs to be present at the Subject Property. Additionally, Progea did not observe any surrounding facilities that would have potentially caused COCs to migrate onto the Subject Property. Based on Progea's professional opinion, the potential for Vapor Encroachment Condition (VEC) to be present at the Subject Property is minimal and is not considered an environmental concern.

ASTM Non-Scope Considerations

The Subject Property was inspected for visible evidence of suspect microbial growth (SMG) and moisture intrusion. No dismantling of building systems, building components, or physical testing was performed. Visible SMG and water damaged materials were not identified during the Subject Property inspection.

Testing for lead in drinking water was beyond the scope of this assessment. The most recent Water Quality Report prepared by the Philadelphia Water Department (PWD) dated 2021 performed testing for regulated substances including lead and other organic and inorganic substances. According to the report, water quality is compared to the standards set by the USEPA. Analytical results indicated that lead in water was detected above the action level of 15 parts per billion (ppb) in only 2 of the 99 sites tested. Based on these results, the PWD considered that the potential for lead in water does not represent a concern. A copy of the most recent PWD Water Quality Report is included in Appendix I.

The Subject Property was inspected for the presence of sensitive ecological areas by noting environmental indicators (e.g., wetlands vegetation, floodplains) located on or immediately adjoining the Subject Property. There were no wetlands depicted on the US Fish and Wildlife Service, Wetland Mapper. Progea did not observe evidence of hydric soils or wetland vegetation during the Subject Property inspection.

A review of applicable records for information regarding threatened/endangered species was made on the USFWS Online Database System website. No critical environmental habitats for threatened or endangered species were identified on the Subject Property or on adjoining properties. In addition, no critical habitat features were identified during reconnaissance of the tract. The Subject Property has been fully developed since 1900 and the presence of threatened or endangered species is not considered a concern to the Subject Property.

Philadelphia County is located in EPA radon Zone 3. EPA radon Zone 3 has predicted average screening concentrations of less than 2 pCi/L. The EPA action level is 4.0 pCi/L. Radon is not expected to represent an environmental concern to current/future occupants or workers at the Subject Property.

Progea did not observe sources of regulated air emissions at the Subject Property at the time of the reconnaissance.

The FEMA FIRM for Philadelphia County, number 4207570184H, dated November 18, 2015, was reviewed for the Subject Property. The Subject Property is located within Zone X. Zone X includes areas determined to be outside of the 0.2% annual chance floodplain.

Other

No other significant environmental issues were observed during the Subject Property inspection.

Findings, Opinions & Conclusions

Based on the findings of this assessment, there are no obvious indicators that point to the presence or likely presence of contamination at the Subject

Property. **This assessment has revealed no evidence of RECs, HRECs, or CRECs, as defined by ASTM, in connection with the Subject Property.**

1.0 INTRODUCTION

Progea, Inc. (Progea) was retained to conduct a Phase I Environmental Site Assessment (ESA) on the parking garage located at 400 Ranstead Street in Philadelphia, Philadelphia County, PA 19106, and commonly known as Bourse Garage (the "Subject Property"). The objective of the assessment was to provide an independent, professional opinion regarding recognized environmental conditions (RECs), as defined by ASTM, associated with the Subject Property. This Phase I ESA was requested for the purpose of qualifying for the landowner liability protections to CERCLA liability.

1.1 Purpose

The purpose of this environmental site assessment is to qualify the user for the landowner liability protections to CERCLA liability, and to evaluate *business environmental risk*, defined as a risk which can have an impact on the business associated with the current or planned use of a parcel of real estate.

Good commercial and customary practice for conducting environmental site assessments has the goal of providing an independent, professional opinion regarding *recognized environmental conditions*, as defined by ASTM, associated with the subject property. The term *recognized environmental condition* (REC) is defined as the presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment. A de minimis condition is not a recognized environmental condition.

1.2 Methodology & Exceptions

The assessment was prepared and performed by a qualified environmental professional and all appropriate inquiries were prepared and carried out in accordance with ASTM E 1527-21, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. This final report and all appropriate inquiries conducted in conjunction with this report were carried out in accordance with the requirements of the final rule. Any exceptions to, additions to, or deletions from these guidelines are described in

the report. In addition, this report was prepared in compliance with the Goldman Sachs & Co. LLC scope of work document dated May 2017. Details of the work performed, sources of information, and findings are presented in the report.

The assessment included the following components:

- A walkthrough inspection of the Subject Property for visual evidence of potential environmental concerns including existing or potential soil and groundwater contamination, as evidenced by soil or pavement staining, discoloration, or stressed vegetation; indications of waste dumping or burial pits, ponds, or lagoons; containers of hazardous substances or petroleum products; electrical and hydraulic equipment that may contain polychlorinated biphenyls (PCBs), such as electrical transformers and hydraulic hoists; and underground and aboveground storage tanks.
- An investigation of historical use of the Subject Property by examining available aerial photographs and other readily available historical information such as fire insurance maps and historical topographic maps for evidence of prior land use that could have led to RECs.
- A review of information available on general geology and topography of the Subject Property, local groundwater conditions, sources of water, power, and sewer, and proximity to ecologically sensitive receptors, such as streams, that might be impacted by recognized environmental conditions and environmental issues.
- A review of environmental records available from the property owner or Subject Property contact including regulatory agency reports, permits, registrations, and consultants' reports for evidence of recognized environmental conditions.
- A property line visual assessment of adjacent properties for evidence of potential offsite environmental conditions that may affect the Subject Property.
- A review of a commercial database summary of federal and state regulatory agency records pertinent to the Subject Property and offsite facilities located within ASTM-specified search distances from the Subject Property.
- Interviews with key Subject Property personnel, as available, regarding current and previous uses of the property, particularly activities involving hazardous substances and petroleum products.

- Evaluation of information gathered and development of this report.

This assessment did not include sampling or analysis of groundwater, surface water, soil, air, or building materials.

Progea conducted the Subject Property walkthrough portion of the assessment on April 6, 2023. Resumes for environmental professionals involved in this assessment are included in Appendix A. Photographs taken at the time of the assessment are included in the *Photographs* section.

1.3 Limiting Conditions of Assessment

Information for the assessment was obtained from sources listed in Appendix B. This information, to the extent it was relied on to form our opinion, is assumed to be correct and complete. Progea is not responsible for the quality or content of information from these sources. Any data gaps identified herein are not considered to have significantly affected the ability to identify RECs at the Subject Property. **Therefore, no significant data gaps were encountered.**

The information and opinions rendered in this report are exclusively for use by Independence Collection Holdings, LLC and its successors and assigns. Progea will not distribute or publish this report without consent except as required by law or court order. The information and opinions expressed in this report are given in response to a limited assignment and should be considered and implemented only in light of that assignment. The services provided by Progea in completing this project were consistent with normal standards of the profession. No other warranty, expressed or implied, is made.

In connection with a proposed extension of credit or existing credit represented by, or investment in, a proposed or existing loan, debt issuance, or other financing to be secured or currently secured, in whole or in part, directly or indirectly by the property or by pledges of direct or indirect ownership interests, or representing preferred equity ownership interests, in the property owner (in any such case, the "Financing") or the proposed issuance of any securities secured or otherwise backed, in whole or in part directly or indirectly by the properties or the Financing (the "Securities"), or the prospective ownership of direct or indirect interests in the property as a result of foreclosure, deed-in-lieu, assignment-in-lieu or other similar transaction with respect to the Financing (in any such case, the "Transfer"), this report by Progea, Inc. (the "Preparer"), and

any update thereof and the information therein, may be used and relied upon by the addressee(s) of this report, KKR Real Estate Credit Manager LLC, their affiliates, successors and assigns and (a) any actual or prospective purchaser of, or investor in, the Financing (or any portion thereof or interest therein by way of participation, syndication or otherwise), (b) any actual or prospective financing source for any such purchaser or investor, (c) any servicer for the Financing or the Securities, (d) any trustee for the Financing or the Securities, (e) any rating agency actually or prospectively rating the Financing or the Securities, (f) any underwriter or placement agent for the Financing or the Securities, (g) any institutional provider of any liquidity facility or credit support for the Financing or the Securities or the Transfer, and (h) the respective affiliates of each person or entity referenced in clauses (a)-(g) above, and (i) the respective officers, directors, employees, agents, advisors, counsel, successors and assignees of each person or entity referenced in clauses (a)-(h) above. In addition, this report or a reference to this report and its preparer may be referred to and included in whole or in part, summarized or quoted (provided any such partial inclusion, summary, or quote is not misleading) in any term sheet, offering circular, private placement memorandum, registration statement, prospectus or prospectus supplement, or tax filing relating to the Financing or the Securities (or any portion thereof) or the Transfer and the Preparer agrees to cooperate reasonably in answering questions by any of the persons or entities referenced in clauses (a)-(i) above. The report speaks only as of its date in the absence of a specific written update of the report signed and delivered by the Preparer. This report has no other purpose and should not be relied upon by any other person or entity.

2.0 SUBJECT PROPERTY DESCRIPTION

Subject Property Summary	
Site Name:	Bourse Garage
Address:	400 Ranstead Street, Philadelphia, Philadelphia County, PA, 19106
Site Acreage:	0.35 acres
Current Owner:	BOURSE GARAGE ASOCIATES LTD
Parcel Number:	883409600
Legal Description:	GAR W/COMM AREA MASONRY

2.1 Current Use of Subject Property

The Subject Property currently consists of one tract of land, totaling approximately 0.35 acres, developed with one 11-story parking garage with a basement level and street level retail tenants. The parking garage extends from the ground floor to the 11th story and reportedly contains 453 parking spaces.

The street level tenants include Evergreen Deli and a movie theater. The movie theater has a street level entrance that leads to five theater rooms located on the basement level. A third, vacant tenant space was previously occupied by Bourse Cleaners, a drop-off dry cleaning business that vacated the space in January 2023 and is further discussed in Section 3.5. A loading dock is located on the north side of the and contains two hydraulic trash compactors that are reportedly shared with an office building located across the street. There are two elevators located onsite, neither of which is hydraulically operated. The building was constructed in 1988 and has not had any significant renovations since that time. At the time of Progea's inspection, the building was approximately 66% occupied and it has an approximate total area of 200,365 square feet (SF). No dry cleaners, gas stations, or light industrial facilities are currently located on the Subject Property. The current operations at the Subject Property are not considered a REC.

2.2 Current Uses of Adjoining/Nearby Properties

A summary of the surrounding property uses is provided below. None of the current surrounding properties are considered to be RECs to the Subject Property.

Adjacent Properties Summary	
Direction From Subject Property	**Current Use**
North	Ranstead Street with a commercial office building located beyond
South	Renaissance Philadelphia Downtown with Chestnut Street, Library Hall, and Second Bank of the United States Portrait Gallery located beyond
East	South 4th Street with a commercial office building located beyond
West	Kimpton Hotel Monaco Philadelphia with South Independence Mall East and Independence National Historical Park located beyond

2.3 Physical Setting

According to the Bedrock geologic map of a portion of the Philadelphia quadrangle, the Subject Property is underlain by Coastal Plain Sediments. Coastal Plain Sediments are described as unconsolidated to poorly consolidated sand and gravel underlain by schist, gneiss, and other metamorphic rocks (Pennsylvania Geological Survey, 2008). The Subject Property appears to be underlain by the Crystalline-rock aquifers of the Piedmont and Blue Ridge aquifers. The main types of crystalline rocks are coarse-grained gneisses and schists of various mineral composition; however, fine-grained rocks, such as

phyllite and metamorphosed volcanic rocks, are common in places (USGS, 1995).

The Subject Property location is shown on the 2019 USGS Topographic Map of the Philadelphia, Pennsylvania, Quadrangle. The Subject Property is generally flat with a gentle slope to the east-southeast. Elevation at and around the Subject Property is approximately 25 feet above mean sea level (msl) (USGS, 2019).

According to the United States Department of Agriculture, Natural Resources Conservation Service (USDA-NRCS), Web Soil Survey, the following soil types, summarized in the table below, are found in the area.

Soil Classification		
Code	Soil Description	Percent of Site
Ub	Urban land	100%

The shallow groundwater flow direction is assumed to be to the east-southeast based on surface topography. However, topography is not always a reliable basis for predicting groundwater flow direction. The local gradient under the Subject Property may be influenced naturally by zones of higher or lower permeability, or artificially by nearby pumping or recharge, and may deviate from the regional trend. Groundwater at the Subject Property is expected to be encountered at a depth of 25-35 feet below ground surface (bgs).

3.0 HISTORICAL REVIEW

3.1 Historical Summary

The historical use of the Subject Property is not considered a REC.

A chronological summary of the historic use of the Subject Property based on information gathered from various sources is presented below. Details regarding the sources of this information are presented in the following sections.

EDR Sanborn Map Search/Print (Inquiry Number 7286336.3S) Ship Date: March 22nd, 2023	1916, 1950, 1976, 1980, 1989, 2002, 2004, 2006
EDR Radius Map Report (Inquiry Number 7286336.2S) Ship Date: March 21st, 2023	

Review of aerial photographs (1940 - 2019), historic topographic maps (1891 - 2019), and Sanborn maps (1916 - 2006) indicate that the Subject Property was developed as early as 1900 with office buildings occupied by financial tenants. By 1950, the eastern portion of the Subject Property had been razed and redeveloped with a surface parking lot. All onsite buildings had been razed by 1962, at which time the Subject Property was fully developed as a surface parking lot. The Subject Property was redeveloped with the present-day parking garage with street level retail tenants in 1988. The Subject Property has remained in its present-day configuration since 1988.

Bourse Cleaners was identified at alternative Subject Property address 44 South 4th Street from 1995 through 2020 and in the EDR radius report for the years 1996 through 2014. The radius report does not list the dry cleaning facility on any hazardous or regulated waste databases. Bourse Cleaners had recently vacated the Subject Property at the time of Progea's visit and the empty tenant space was thoroughly inspected. A prior report, dated January 2018 and reviewed in Section 3.9, indicated that the cleaners was a drop-off facility at the time of the inspection and, due to size limitations, did not appear able to support dry cleaning equipment or associated operations. Additionally, there were no signs of prior equipment or abandoned plumbing in the rear storeroom at the time. According to the site contact, no dry cleaning plants have ever been located at the Subject Property and the former Bourse Cleaners always operated as a drop-off business. Based on these observations, it was determined the dry cleaner has always operated as a drop-off facility. Therefore, this former tenant is not considered a REC to the Subject Property. The historic uses of the Subject Property do not represent a REC.

3.2 Aerial Photographs

Aerial photographs, including the subject and adjoining properties, were obtained from EDR. Descriptions of the aerial photographs reviewed are summarized in the table below (see Appendix C).

Aerial Photograph Descriptions		
Date	**Description**	**Level of Environmental Concern**
1940	The Subject Property is developed with office buildings that cover the Subject property and adjacent parcel to the south. The Subject Property is bordered to the north by Ranstead Street with the Bourse building, an office building and commodities exchange, located beyond. The onsite buildings extend to the south with Chestnut Street located beyond. The Subject Property is bordered to the east by South 4th Street with an office building beyond. The Subject Property is bordered to the west by additional bank buildings.	No Concern
1945	The Subject Property and surrounding properties appear similar to the previous aerial photograph.	No Concern
1950	The eastern portion of the Subject Property has been converted to a surface parking lot. Remaining surrounding properties appear similar to the previous aerial photograph.	No Concern
1957	The Subject Property and surrounding properties appear similar to the previous aerial photograph.	No Concern
1962	The remainder of the Site appears redeveloped as a surface parking lot. Additional park land is apparent south and southeast of the Subject Property. Remaining surrounding properties appear similar to the previous aerial photograph.	No Concern
1965	The Subject Property appears similar to the previous aerial photograph. Independence National Historical Park and Franklin Park are apparent to the north-northwest of the Subject Property. Remaining surrounding properties appear similar to the previous aerial photograph.	No Concern
1971	The Subject Property and surrounding properties appear similar to the previous aerial photograph.	No Concern
1975	The Subject Property and surrounding properties appear similar to the previous aerial photograph.	No Concern
1981	The Subject Property and surrounding properties appear similar to the previous aerial photograph.	No Concern
1988	The Subject Property and surrounding properties appear similar to the previous aerial photograph.	No Concern
1992	The Subject Property appears developed with the present-day parking garage. The south-adjacent parcel is developed as a hotel. Remaining surrounding properties appear similar to the previous aerial photograph.	No Concern
1995	The Subject Property and surrounding properties appear similar to the previous aerial photograph.	No Concern

Date	Description	Level of Environmental Concern
1999	The Subject Property and surrounding properties appear similar to the previous aerial photograph.	No Concern
2006	The Subject Property and surrounding properties appear similar to the previous aerial photograph.	No Concern
2010	The Subject Property and surrounding properties appear similar to the previous aerial photograph.	No Concern
2015	The Subject Property and surrounding properties appear similar to the previous aerial photograph.	No Concern
2019	The Subject Property and surrounding properties appear similar to the previous aerial photograph.	No Concern

No readily apparent evidence of recognized environmental conditions at the Subject Property or adjoining properties was noted on the aerial photographs reviewed.

3.3 USGS Topographic Maps

Historic topographic maps for the Subject Property and vicinity were obtained from EDR. Descriptions of the topographic maps reviewed are summarized in the table below (see Appendix D):

USGS Topographic Descriptions		
Date	**Description**	**Level of Environmental Concern**
1891	The Subject Property and surrounding properties are shaded to indicate development. The Subject Property is bordered to the north and east by light duty roads. The Delaware River is located east of the Subject Property.	No Concern
1894	The Subject Property and surrounding properties appear similar to the previous topographic map.	No Concern
1896	The Subject Property and surrounding properties appear similar to the previous topographic map.	No Concern
1898	The Subject Property and surrounding properties appear similar to the previous topographic map.	No Concern
1901	The Subject Property and surrounding properties appear similar to the previous topographic map.	No Concern
1906	The Subject Property and surrounding properties appear similar to the previous topographic map.	No Concern
1920	The Subject Property and surrounding properties appear similar to the previous topographic map.	No Concern
1943	The Subject Property and surrounding properties appear similar to the previous topographic map.	No Concern
1949	The Subject Property and surrounding properties appear similar to the previous topographic map.	No Concern
1967	The Subject Property and surrounding properties appear similar to the previous topographic map.	No Concern
1973	The Subject Property and surrounding properties appear similar to the previous topographic map.	No Concern

Date	Description	Level of Environmental Concern
1984, 1985	The Subject Property and surrounding properties appear similar to the previous topographic map, with the exception of primary highways to the north and west of the Subject Property.	No Concern
1994	The Subject Property and surrounding properties appear similar to the previous topographic map.	No Concern
1995	The Subject Property and surrounding properties appear similar to the previous topographic map.	No Concern
2013, 2014	The Subject Property and surrounding properties appear similar to the previous topographic map.	No Concern
2016	The Subject Property and surrounding properties appear similar to the previous topographic map.	No Concern
2019	The Subject Property and surrounding properties appear similar to the previous topographic map.	No Concern

No readily apparent evidence of recognized environmental conditions at the Subject Property or adjoining properties was noted on the topographic maps reviewed.

3.4 Fire Insurance Maps

Fire insurance maps covering the Subject Property and adjoining properties were requested from EDR. Descriptions of the fire insurance maps reviewed are summarized in the table below (see Appendix E):

Fire Insurance Map Descriptions		
Date	**Description**	**Level of Environmental Concern**
1916	The Subject Property is developed with office buildings that cover the Subject property and adjacent parcel to the south. The map indicates that the structures were built in 1900 and 1905, and are primarily occupied by banks or financial tenants. The Subject Property is bordered to the north by Ranstead Street with the Bourse building, an office building and commodities exchange, located beyond. The onsite buildings extend to the south with Chestnut Street located beyond. The Subject Property is bordered to the east by South 4th Street with an office building beyond. The Subject Property is bordered to the west by additional bank buildings.	No Concern
1950	The Subject Property and surrounding properties appear similar to the previous Sanborn map, with the exception of the building in the eastern portion which has been demolished and has not been replaced.	No Concern
1976	The Subject Property is depicted as a surface parking lot with no structure. Surrounding properties appear similar to the previous Sanborn map.	No Concern
1980	The Subject Property and surrounding properties appear similar to the previous Sanborn map.	No Concern

Date	Description	Level of Environmental Concern
1989	The Subject Property and surrounding properties appear similar to the previous Sanborn map.	No Concern
2002	The Subject Property is developed with the present-day building, which is labeled as a 12-deck parking garage and movie theater. An Omni hotel is present on the south-adjacent parcel. Remaining surrounding properties appear similar to the previous Sanborn map.	No Concern
2004	The Subject Property and surrounding properties appear similar to the previous Sanborn map.	No Concern
2006	The Subject Property and surrounding properties appear similar to the previous Sanborn map.	No Concern

3.5 City Directories

City Directories were reviewed for the Subject Property and surrounding properties for the years 1920 through 2020. The Subject Property was listed under the name of Bourse Garage from 1995 through 2020. In addition, various retail tenants including a movie theater have been listed from 1995 through 2020 at the main Subject Property address. Bourse Cleaners was identified at alternative Subject Property address 44 South 4th Street from 1995 through 2020 and in the EDR radius report for the years 1996 through 2014. The radius report does not list the dry cleaning facility on any hazardous or regulated waste databases. Bourse Cleaners had recently vacated the Subject Property at the time of Progea's visit and the empty tenant space was thoroughly inspected. A prior report, dated January 2018 and reviewed in Section 3.9, indicated that the cleaners was a drop-off facility at the time of the inspection and, due to size limitations, did not appear able to support dry cleaning equipment or associated operations. Additionally, there were no signs of prior equipment or abandoned plumbing in the rear storeroom at the time. According to the site contact, no dry cleaning plants have ever been located at the Subject Property and the former Bourse Cleaners always operated as a drop-off business. Based on these observations, it is assumed the dry cleaner has always operated as a drop-off facility. Therefore, this listing is not considered a REC to the Subject Property. No other dry cleaning facilities or gas stations were listed in any of city directories reviewed for the Subject Property or adjoining properties. A copy of the City Directory listings is included in Appendix G.

3.6 Prior Ownership

In accordance with the ASTM 1527-21 User Questionnaire, the users must provide information pertaining to any environmental cleanup liens that are filed

or recorded against the Subject Property and/or any activity and land use limitations that are listed for the Subject Property (40 CFR 312.25). A title search was not included in the scope of work for this assessment. The current owner of the Subject Property is BOURSE GARAGE ASOCIATES LTD .

3.7 Additional Environmental Records Sources

Freedom of Information Act (FOIA) requests were filed with the entities listed in the table below.

FOIA Requests				
Agency	Date Contacted	Information Received	Comments	Level of Environmental Concern
Pennsylvania Department of Environmental Protection	03/23/2023	The Subject Property address was not identified on the PADEP Environmental Site Assessment Search Tool.	None.	Low
Department of Records	03/23/2023	As of the date of this Report no response has been received pertaining to this request.	If additional information is received and is considered a REC, the User will be notified.	Low
Philadelphia Fire Department	03/23/2023	As of the date of this Report no response has been received pertaining to this request.	If additional information is received and is considered a REC, the User will be notified.	Low
Division of Housing and Community Development	03/23/2023	As of the date of this Report no response has been received pertaining to this request.	If additional information is received and is considered a REC, the User will be notified.	Low
Department of Planning and Development	03/23/2023	The Department responded that there were no environmental health records for the Subject Property.	None.	Low

3.8 Other Agency Records

A review of applicable records for information regarding threatened/endangered species was made on the USFWS Online Database System website. No critical environmental habitats for threatened or

endangered species were identified on the Subject Property or on adjoining properties. In addition, no critical habitat features were identified during reconnaissance of the tract. The Subject Property has been fully developed since 1900 and the presence of threatened or endangered species is not considered a concern to the Subject Property.

Progea conducted a limited historical properties/archaeological resources review for the Subject Property. No obvious archaeological resources or structures of historical significance were observed at the Subject Property. The Subject Property was identified on the National Register of Historic Places as being located within the Independence National Historic Park, however, the onsite building was not listed as a contributing building, structure, or feature. The limited archaeological resources review is not considered a detailed cultural resources assessment. If federal, state, or local governments require such surveys, then additional assessment will be required.

Progea conducted a limited search of the Philadelphia County Clerk website of property records for the Subject Property. No environmental cleanup liens were filed or recorded against the Subject Property and no activity or land use limitations are listed for the Subject Property. A title search was not included in the scope of work for this assessment.

3.9 Previous Environmental Reports

The following environmental reports were reviewed in connection with this assessment and are summarized in the table below.

Summary of Previous Environmental Reports	
Report Title/Date	**Summary of Report**
Phase I ESA / Langan / November 11, 2015	No RECs, HRECs, or CRECs were identified for the Subject Property. Two environmental business risks were listed in the report which included; potential ACMs in the building and potential PCB-containing equipment in the building. No recommendations for further action were made. he Phase I ESA included an asbestos survey in the appendices, also performed by Langan in 2015. The survey included obtaining 17 representative samples of suspect ACMs. Results of the survey indicated ACM was not detected in any of the samples analyzed. No additional recommendations were made by Langan.
Phase I ESA (Draft) / Progea / January 11, 2019	No RECs, HRECs, or CRECs were identified for the Subject Property. No additional investigation was recommended.

4.0 REGULATORY DATABASE REVIEW

Available government database information prepared by EDR was reviewed to evaluate both the Subject Property and any listed sites within ASTM-recommended search distances which could potentially impact the Subject Property. Federal, state, and local databases reviewed are included in Appendix F.

4.1 Mapped Sites

Available government database information prepared by EDR was reviewed to evaluate both the Subject Property and any listed sites within ASTM-recommended search distances which could potentially impact the Subject Property. Federal, state, and local databases reviewed are included in Appendix F. The following table summarizes the regulated listings within the ASTM-specified radii of the Subject Property:

Regulatory Report Summary							
Database	Search Distance	Target Property	< 1/8	1/8 - 1/4	1/4 - 1/2	1/2 - 1	Total
NPL	1		0	0	0	0	0

The Subject Property was identified on the EDR Historic Cleaners database. Bourse Cleaners was listed at alternative Subject Property address 44 South 4th Street from 1996 through 2014. The radius report does not list the dry cleaning facility on any hazardous or regulated waste databases. Bourse Cleaners had recently vacated the Subject Property at the time of Progea's visit and the empty tenant space was thoroughly inspected. A prior report, dated January 2018 and reviewed in Section 3.9, indicated that the cleaners was a drop-off facility at the time of the inspection and, due to size limitations, did not appear able to support dry cleaning equipment or associated operations. Additionally, there were no signs of prior equipment or abandoned plumbing in the rear storeroom at the time. According to the site contact, no dry cleaning plants have ever been located at the Subject Property and the former Bourse Cleaners always operated as a drop-off business. Based on these observations, it is assumed the dry cleaner has always operated as a drop-off facility. Therefore, this listing is not considered an environmental concern to the Subject Property.

The following table summarizes the listings within 500 feet of the Subject Property. Other facilities identified in the environmental database in the surrounding area are not RECs or environmental concerns for the Subject Property due to regulatory status, distance from the Subject Property, or gradient position relative to the Subject Property.

Summary of Adjoining/Surrounding Database Listings	
Site Name:	PHILADELPHIA PARK SERVICE SECOND BANK INHP
Databases:	PA MANIFEST
Address:	420 CHESTNUT ST
Distance (ft):	102
Direction:	South
Elevation (ft above msl):	Lower
Comments:	This offsite facility is listed on the PA Manifest database for the removal of hazardous waste in 2007. No violations were listed for the offsite facility. Based on regulatory status, this listing is not an environmental concern to the Subject Property.

Site Name:	KEYSTONE SHIPPING CO., CHEM HERITAGE FOUNDATION
Databases:	RCRA NonGen / NLR, FINDS, ECHO, LUST, ARCHIVE UST
Address:	313 CHESTNUT ST
Distance (ft):	303
Direction:	ESE
Elevation (ft above msl):	Lower
Comments:	Keystone Shipping is listed on the RCRA NonGen, FINDS, and ECHO databases for the historic generation of ignitable and acidic wastes. No violations were reported. Chem Heritage Foundation historically operated six5,000-gallon heating oil USTs. At least two were installed in 1953. Four tanks have a status of "closed without permit" and two have a status of "exempt from state law". A release associated with the tanks was reported with soil impacts. The release received closure on March 2, 1995. Based on regulatory status, these listings are not an environmental concern to the Subject Property.

Site Name:	VOLKENS 1 HR CLEANERS
Databases:	EDR Hist Cleaner
Address:	412 MARKET
Distance (ft):	309
Direction:	North
Elevation (ft above msl):	Higher
Comments:	This tenant occupied the offsite address from 1986 to 1991. Based on interviews with the property manager and observations made during an inspection of the property, no dry cleaning plants have ever been located in the present-day building and the current building infrastructure does not appear to be able to support a dry cleaning business. Based on these observations and additional information, it is assumed that the dry cleaner was a drop-off facility. In addition, the Subject Property was redeveloped with the present-day building in 1970 and is underlain by a sub-grade parking level which covers the entire Subject Property footprint. Based on these mitigating circumstances, the former dry cleaner is not considered an environmental concern to the Subject Property.

Site Name:	COLONIAL PENN LIFE INS
Databases:	ARCHIVE UST
Address:	399 MARKET ST
Distance (ft):	447
Direction:	Northeast
Elevation (ft above msl):	Higher
Comments:	According to the PADEP Bureau of Environmental Cleanup and Brownfields Inactive Storage Tanks database, a 10,012-gallon heating oil UST was installed at this offsite address in 1975. It currently has an "exempt from state law" status. No notices of violation, release, or spills have been issued in relation to the UST. Based on regulatory status, this listing is not an environmental concern to the Subject Property.

Site Name:	BLUE BELL GULF
Databases:	EDR Hist Auto
Address:	399 MARKET ST
Distance (ft):	447
Direction:	Northeast
Elevation (ft above msl):	Higher

Comments:	Blue Bell Gulf, identified as a gasoline service station, reported occupied this offsite address from 2004 to 2008. A review of historic Sanborn maps indicates that this property has been developed with an office building since at least 1980. This listing is most likely related to an office tenant and therefore is not an environmental concern to the Subject Property.

Site Name:	WELLS FARGO
Databases:	AST
Address:	101 N INDEPENDENCE MALL E
Distance (ft):	509
Direction:	North
Elevation (ft above msl):	Higher
Comments:	This offsite tenant currently operates one 6,000-gallon diesel AST. The tank was installed on January 27, 2016 and has a "currently in use" status. According to the database listing, the AST has a registration expiration of February 4, 2023. No notices of violation, release, or spills have been issued in relation to the AST. Based on regulatory status, this listing is not an environmental concern to the Subject Property.

4.2 Unmappable Sites

Unmappable sites are sites that cannot be plotted with confidence, but can be located by zip code or city name. In general, a site cannot be geocoded due to inaccurate or missing information in the environmental database record provided by its applicable agency. Cross referencing addresses and site names, as well as a visual reconnaissance of surrounding properties, has been completed for the unmappable facility sites in the database report. The subject and adjacent properties were not identified on the unmappable sites listing in the environmental database report. No unmappable sites were identified with the potential to impact the Subject Property.

5.0 SUBJECT PROPERTY RECONNAISSANCE AND INTERVIEWS

Progea personnel conducted the Subject Property walkthrough portion of the assessment on April 6, 2023. The Subject Property visit consisted of a walk over the entire Subject Property area and a drive along streets surrounding the Subject Property perimeter.

Site Reconnaissance Summary	
Site Assessor	JJ Hipes
Date of Site Reconnaissance	April 6, 2023
Methodology	Interview and inspection at the Subject Property
Limiting Conditions	No significant limiting conditions

5.1 Interviews

Progea was accompanied by Mr. Mike Cassidy, Vice President with MRP, and Greg, the building engineer. These individuals answered general questions about the property and verbally provided Progea with answers to the questions regarding the Subject Property during the Subject Property tour. This data was utilized in the preparation of this report. Neither individual had any knowledge of any potential RECs associated with the Subject Property.

The prospective user of this report provided Progea with answers to the questions contained in the ASTM E 1527-21 User Questionnaire. This data was utilized in the preparation of this report. The User Questionnaire is contained in Appendix H. The prospective user had no knowledge of any potential RECs associated with the Subject Property.

5.2 General Observations

The table below summarizes the Subject Property inspection and findings. All items that are, or are known to have been present at the Subject Property are noted in the table. The table also notes items that may present concerns to the Subject Property. Additional information about items noted can be found in the referenced section of this report.

Site Inspection Findings Summary			
On-Site Environmental Feature	**Currently / Historically Present**	**Possible Environmental Condition**	**Report Section**
Hazardous Substances or Petroleum Products			5.3
Aboveground Storage Tanks			5.4.1
Underground Storage Tanks			5.4.2
Drums / Containers			5.5
Polychlorinated Biphenyls	Yes	No	5.6
Pits, Ponds, or Lagoons			5.7
Stressed Vegetation			5.8
Evidence of Spills or Releases			5.9
Stains or Corrosion			5.10
Stained Soil or Pavement / Pools of Liquid			5.11
Artificially Filled Areas			5.12
Waste Water			5.13
Drains and Sumps	Yes	No	5.14
Septic Sytem			5.15
Wells			5.16
Dry Cleaning Operations			5.17
Agricultural Use (Pesticides/ Herbicides)			5.18
Oil/Gas Production or Exploration			5.19
Railroad Spur			5.20

On-Site Environmental Feature	Currently / Historically Present	Possible Environmental Condition	Report Section
Asbestos-Containing Materials			5.21
Lead-Based Paint			5.22
Suspect Microbial Growth/Odor			5.23
Lead in Drinking Water			5.24
Wetlands			5.25
Threatened & Endangered Species			5.26
Historic Sites			5.27
Radon			5.28
Air Emissions (stacks, hoods, other point sources)			5.29
Remedial Activities			5.30
Vapor Encroachment Condition			5.31
Floodplain			5.32
Other			5.33

5.3 Hazardous Substances or Petroleum Products & Waste

The Subject Property was assessed for signs of storage, use, or disposal of hazardous materials. The assessment consisted of noting evidence (e.g., drums, unusual vegetation patterns, staining) indicating that hazardous materials are currently or were previously located on the Subject Property. No hazardous wastes are currently generated on the Subject Property and no bulk chemicals were observed on the Subject Property. None of the records reviewed indicated the historical use of large quantities of hazardous materials at the Subject Property.

The Subject Property contains various cleaning and maintenance products and materials. All materials were properly stored with no signs of leaking.

The mechanical rooms include typical plumbing and HVAC services. Floor drains are located in bathrooms and on the basement level. One trench drain is located at the entrance to the parking garage. According to the Subject Property contacts, there are no oil-water separators connected to any of the drains.

5.4 Storage Tanks

5.4.1 Aboveground Storage Tanks

The Subject Property was inspected for evidence of aboveground storage tanks (ASTs). No evidence of ASTs was observed at the Subject Property during the assessment. In addition, no features were observed at the Subject Property that

would have required ASTs to be present, and there are no ASTs registered with the Pennsylvania Department of Environmental Protection (PADEP).

5.4.2 Underground Storage Tanks

The Subject Property was inspected for evidence of underground storage tanks (USTs) (e.g., vent piping, dispensing equipment, and pavement variations). No evidence of USTs was observed at the Subject Property during the assessment. In addition, no features were observed at the Subject Property that would have required USTs to be present, and there are no USTs registered with the PADEP.

5.5 Drums/Containers

No drums or containers containing hazardous materials were observed during the Subject Property inspection.

5.6 Polychlorinated Biphenyls (PCBs)

The Subject Property was inspected for the presence of liquid-cooled electrical units (transformers, light ballasts, and capacitors), and major sources of hydraulic fluid (elevators and lifts). Such units are notable because they may be potential PCB sources.

The Subject Property contains a primary electrical switch room with electrical transformers located in a locked room in the basement. No signs of leakage or staining were observed around the transformers and all transformers were located on a concrete slab floor.

Two hydraulic compactors are located in the loading dock area as well as a hydraulic dock leveler. No signs of leakage were observed around the hydraulic equipment. According to the Subject Property contact, the two elevators are not hydraulically operated.

5.7 Pits, Ponds, or Lagoons

No pits, ponds, or lagoons were observed on the Subject Property at the time of the Subject Property inspection.

5.8 Stressed Vegetation

No areas of stressed vegetation were observed at the time of the Subject Property inspection.

5.9 Evidence of Spills or Releases

No visible evidence of spills or releases was observed at the time of the Subject Property inspection.

5.10 Stains or Corrosion

No evidence of significant staining or corrosion was identified on the Subject Property.

5.11 Stained Soil or Pavement / Pools of Liquid

No evidence of significantly stained soil, pavement, or pools of unknown liquids was observed on the Subject Property.

5.12 Artificially Filled Areas (Solid Waste Disposal)

Currently, only non-hazardous solid waste is generated on the Subject Property. No large scale areas of dumping or waste accumulation were observed on the Subject Property.

5.13 Waste Water

No issues with waste water were observed on the Subject Property. Subject Property waste water is directed to a public sanitary sewer system.

5.14 Drains and Sumps

Floor drains were located in bathrooms and on the basement level. One trench drain is located at the entrance to the parking garage. According to the Subject Property contacts, there are no oil-water separators connected to any of the drains.

One sump pump is located on the sub-basement level. According to the Subject Property contacts, the pump is not used for groundwater dewatering purposes.

5.15 Septic System

No evidence of current or former septic systems was observed on the Subject Property. The Subject Property currently utilizes the municipal sewer system.

5.16 Wells

According to EDR, there are no records of active, inactive, destroyed wells, or dry wells at the Subject Property. Additionally, during the Subject Property visit no wells were observed on Subject Property.

5.17 Dry Cleaning Operations

There are no dry cleaners currently located on the Subject Property. Bourse Cleaners was identified at alternative Subject Property address 44 South 4th Street from 1995 through 2020 and in the EDR radius report for the years 1996 through 2014. The radius report does not list the dry cleaning facility on any hazardous or regulated waste databases. Bourse Cleaners had recently vacated the Subject Property at the time of Progea's visit and the empty tenant space was thoroughly inspected. A prior report, dated January 2018 and reviewed in Section 3.9, indicated that the cleaners was a drop-off facility at the time of the inspection and, due to size limitations, did not appear able to support dry cleaning equipment or associated operations. Additionally, there were no signs of prior equipment or abandoned plumbing in the rear storeroom at the time. According to the site contact, no dry cleaning plants have ever been located at the Subject Property and the former Bourse Cleaners always operated as a drop-off business. Based on these observations, it was determined the dry cleaner has always operated as a drop-off facility. Therefore, this former tenant is not considered a REC to the Subject Property.

5.18 Agricultural Use (Pesticides/ Herbicides)

No agricultural use was observed on the Subject Property. No areas of material pesticide or herbicide storage or mixing were observed on the Subject Property.

5.19 Oil/Gas Production or Exploration

A review of historical documents and regulatory databases did not reveal any past or current oil/gas production or exploration activities at the Subject Property. No oil/gas production or exploration activities were observed at the time of the Subject Property inspection.

5.20 Railroad Spur

A review of historical documents did not reveal any evidence of historical railroad spurs located on or adjacent to the Subject Property. No railroad spurs were observed at the time of the Subject Property inspection.

5.21 Asbestos-Containing Materials

Use of asbestos in building materials was uncommon after approximately 1980.The Subject Property was developed as a parking garage in 1988. A visual inspection for friable and damaged non-friable suspect asbestos containing materials (ACMs) was conducted as part of this Phase I ESA. No friable or damaged materials were visually identified during the Subject Property inspection. Progea recommends continuing to follow the existing Asbestos Operations and Maintenance Plan to manage ACMs in place and as part of routine maintenance activities. Regardless of the date of construction, an asbestos survey will be required prior to any renovations or demolition activities.

5.22 Lead-Based Paint

Use of lead-based paint was uncommon after approximately 1977. The Subject Property was developed as a parking garage in 1988. No peeling or flaking paint was observed during the Subject Property inspection. A lead-based paint survey was beyond the scope of this assessment.

5.23 Suspect Microbial Growth/Odor

The Subject Property was inspected for visible evidence of suspect microbial growth (SMG) and moisture intrusion. No dismantling of building systems, building components, or physical testing was performed. Visible SMG and water damaged materials were not identified during the Subject Property inspection.

5.24 Lead in Drinking Water

Testing for lead in drinking water was beyond the scope of this assessment. The most recent Water Quality Report prepared by the Philadelphia Water Department (PWD) dated 2021 performed testing for regulated substances including lead and other organic and inorganic substances. According to the report, water quality is compared to the standards set by the USEPA. Analytical results indicated that lead in water was detected above the action level of 15

parts per billion (ppb) in only 2 of the 99 sites tested. Based on these results, the PWD considered that the potential for lead in water does not represent a concern. A copy of the most recent PWD Water Quality Report is included in Appendix I.

5.25 Wetlands

The Subject Property was inspected for the presence of sensitive ecological areas by noting environmental indicators (e.g., wetlands vegetation, floodplains) located on or immediately adjoining the Subject Property. There were no wetlands depicted on the US Fish and Wildlife Service, Wetland Mapper. Progea did not observe evidence of hydric soils or wetland vegetation during the Subject Property inspection.

5.26 Threatened & Endangered Species

A review of applicable records for information regarding threatened/endangered species was made on the USFWS Online Database System website. No critical environmental habitats for threatened or endangered species were identified on the Subject Property or on adjoining properties. In addition, no critical habitat features were identified during reconnaissance of the tract. The Subject Property has been fully developed since 1900 and the presence of threatened or endangered species is not considered a concern to the Subject Property.

5.27 Historic Sites

Progea conducted a limited historical properties/archaeological resources review for the Subject Property. No obvious archaeological resources or structures of historical significance were observed at the Subject Property. The Subject Property was identified on the National Register of Historic Places as being located within the Independence National Historic Park, however, the onsite building was not listed as a contributing building, structure, or feature. The limited archaeological resources review is not considered a detailed cultural resources assessment. If federal, state, or local governments require such surveys, then additional assessment will be required.

5.28 Radon

Radon is a naturally occurring radioactive gas formed by the decay of uranium in bedrock and soil. The potential adverse health effects associated with radon gas depend on various factors, such as the concentration of the gas and duration of exposure. The concentration of radon gas in a building depends on subsurface soil conditions, the integrity of the building's foundation, and the building's ventilation system.

Philadelphia County is located in EPA radon Zone 3. EPA radon Zone 3 has predicted average screening concentrations of less than 2 pCi/L. The EPA action level is 4.0 pCi/L. Radon is not expected to represent an environmental concern to current/future occupants or workers at the Subject Property.

5.29 Air Emissions (stacks, hoods, other point sources)

Progea did not observe sources of regulated air emissions at the Subject Property at the time of the reconnaissance.

5.30 Remedial Activities

No environmental remediation activities are known to have occurred at the Subject Property.

5.31 Vapor Encroachment Condition

As part of Progea's evaluation of the potential for chemicals of concern (COCs) to be present at the Subject Property or migrate onto the Subject Property, Progea conducted a limited Vapor Encroachment Screening (VES). The goal of the VES is to identify potential vapor impacts in the subsurface or within Subject Property buildings caused by the release of COCs into the soil or groundwater at the Subject Property or in near proximity to the Subject Property. As such, Progea reviewed all local, state, and federal database information as well as historical maps and aerial photographs. During the Subject Property visit, Progea did not observe potential contaminant sources that would contribute or cause COCs to be present at the Subject Property. Additionally, Progea did not observe any surrounding facilities that would have potentially caused COCs to migrate onto the Subject Property. Based on Progea's professional opinion, the potential for Vapor Encroachment Condition (VEC) to be present at the Subject Property is minimal and is not considered an environmental concern.

5.32 Floodplain

The FEMA FIRM for Philadelphia County, number 4207570184H, dated November 18, 2015, was reviewed for the Subject Property. The Subject Property is located within Zone X. Zone X includes areas determined to be outside of the 0.2% annual chance floodplain.

5.33 Other

No other significant environmental issues were observed during the Subject Property inspection.

6.0 FINDINGS, OPINIONS, AND CONCLUSIONS

Based on the findings of this assessment, there are no obvious indicators that point to the presence or likely presence of contamination at the Subject Property. **This assessment has revealed no evidence of RECs, HRECs, or CRECs, as defined by ASTM, in connection with the Subject Property.**

7.0 SIGNATURE(S), DECLARATION, AND SEAL OF ENVIRONMENTAL PROFESSIONAL(S)

"I declare that to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in 40 CFR 312.10."

"I have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the Subject Property. I have developed and performed the all appropriate inquires in conformance with the standards and practices set forth in 40 CFR Part 312."

Resumes of Environmental Professionals

Jacquelin Hipes

Executive Director

Education

BS, Biological Sciences, Louisiana State University, Spring 2012
MS, Biological Oceanography, University of South Florida, Spring 2015

Honors and Activities

- *Phi Beta Kappa, Academic Honor Society*
  Member, Spring 2012 – Present

- *Gamma Beta Phi, Academic Honor Society*
  President, Fall 2011 – Spring 2012
  Vice President, Fall 2010 – Spring 2011
  Member, Fall 2009 – Present

Experience 2015 - 2022

- Works closely with clients to manage environmental assessments and overall environmental compliance.

- Interfaces with customers, clients, subcontractors demonstrating excellent organizational and communication skills in a fast paced environment.

- Provides managerial expertise and oversight in environmental assessments and sampling protocols, including shallow soils and hazardous building materials.

- Personally performed over 350 Phase I Environmental Assessments on various types of real estate including multi-family residential properties, retail assets, land development sites, agricultural properties, medical office and assisted living facilities, office properties, industrial and warehouse facilities, oil and gas production assets, marinas, and petroleum storage tank sites.

- Experienced in site evaluations for the development and maintenance of Stormwater Pollution Prevention Plans (SWPPPs) and Spill Prevention, Control, and Countermeasure (SPCC) plans.

Charles Summers

Principal

Professional Licenses

Professional Geoscientist, Texas, License #1283
LEED Accredited Professional, Operations and Maintenance
OSHA HAZWOPER 40-hour certified
Confined Space Entry certified

Education

Baylor University, Bachelor's Degree - Geology, 1995

Experience 1995-2015

- Works closely with public and private clients to manage environmental assessments, site remediation, regulatory permitting and industrial environmental compliance.
- Provides environmental support and risk quantification for various real estate opportunity funds, private equity transactions, loan acquisitions and originations, infrastructure acquisitions, and physical commodities plays in over 20 countries.
- Part of sustainability team that is pursuing LEED building certifications and overall energy efficiency measures within and outside the US for institutional real estate clients.
- Writing and amending global environmental policies and procedures for private and industrial clients, providing independent environmental risk quantification to deal teams, managing third party contractors, environmental contract negotiations, insurance recommendations, general deal team support, Fin 47 reporting.
- Provides both managerial and field-level expertise on projects that involved petroleum contamination of soil and groundwater, including underground storage tanks (USTs) removal sites and retail gasoline and/or auto repair sites.
- Participated and directed *In Situ* Chemical Oxidation (ISCO) treatments of petroleum and chlorinated solvent contaminated sites using hydrogen peroxide, potassium permanganate, and sodium permanganate.
- Conducts soil, indoor air and groundwater fieldwork, including the advancement and characterization of soil borings, installation of monitoring wells, aquifer/groundwater flow testing, soil gas surveys, indoor air quality surveys, mold surveys and site surveys.
- Interfaces with customers, clients, subcontractors demonstrating excellent organizational and communication skills in a fast paced environment.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Progea, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Sanborn® Library search results

Certification #: 15AB-4A10-B01D

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Progea, Inc. (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 01/25/2023 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 01/25/2023 has revealed that there are 8 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/06/2023 has revealed that there are 2

RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/06/2023 has revealed that there are 6 RCRA-SQG sites within approximately 0.25 miles of the target property.

Lists of state and tribal voluntary cleanup sites

PA VCP: The VCP listings included Completed Sites, Sites in Progress and Act 2 Non-Use Aquifer Determinations Sites. Formerly known as the Act 2, the Land Recycling Program encourages the voluntary cleanup and reuse of contaminated commercial and industrial sites.

A review of the PA VCP list, as provided by EDR, and dated 10/03/2022 has revealed that there are 7 PA VCP sites within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Landfill / Solid Waste Disposal Sites

PA HIST LF: The report provides facility information recorded in the Pennsylvania Department of Environmental Protection ALI database. Some of this information has been abstracted from old records and may not accurately reflect the current conditions and status at these facilities.

A review of the PA HIST LF list, as provided by EDR, has revealed that there is 1 PA HIST LF site

within approximately 0.5 miles of the target property.

Local Lists of Registered Storage Tanks

PA ARCHIVE UST: The list includes tanks storing highly hazardous substances that were removed from the DEP's Storage Tank Information database because of the Department's policy on sensitive information. The list also may include tanks that are removed or permanently closed.

A review of the PA ARCHIVE UST list, as provided by EDR, and dated 12/05/2022 has revealed that there are 11 PA ARCHIVE UST sites within approximately 0.25 miles of the target property.

Local Land Records

PA ACT 2-DEED: This listing pertains to sites where the Department has approved a cleanup requiring a deed acknowledgment under Act 2. This list includes sites remediated to a non-residential Statewide health standard (Section 303(g)); all sites demonstrating attainment of a Site-specific standard (Section 304(m)); and sites being remediated as a special industrial area (Section 305(g)). Persons who remediated a site to a standard that requires a deed acknowledgment shall comply with the requirements of the Solid Waste Management Act or the Hazardous Sites Cleanup Act, as referenced in Act 2. These statutes require a property description section in the deed concerning the hazardous substance disposal on the site. The location of disposed hazardous substances and a description of the type of hazardous substances disposed on the site shall be included in the deed acknowledgment. A deed acknowledgment is required at the time of conveyance of the property.

A review of the PA ACT 2-DEED list, as provided by EDR, and dated 04/23/2010 has revealed that there are 2 PA ACT 2-DEED sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/06/2023 has revealed that

there are 6 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 01/03/2022 has revealed that there is 1

PFAS ECHO site within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
BLUE BELL GULF	399 MARKET ST	NE 0 - 1/8 (0.085 mi.)	D8	20

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 2 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
PA-EFACTS (Pennsylvania - Environmental Facility Application

KEYSTONE SHIPPING CO. (Continued) **1000389332**

Compliance Tracking System) is a Department-wide database that provides a holistic view of clients and sites (including facilities) that DEP regulates.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
PA-EFACTS (Pennsylvania - Environmental Facility Application Compliance Tracking System) is a Department-wide database that provides a holistic view of clients and sites (including facilities) that DEP regulates.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	IGNITABLE WASTE
Waste Code:	D002
Waste Description:	CORROSIVE WASTE
Waste Code:	D004
Waste Description:	ARSENIC
Waste Code:	D005
Waste Description:	BARIUM
Waste Code:	D006
Waste Description:	CADMIUM
Waste Code:	D007
Waste Description:	CHROMIUM
Waste Code:	D008
Waste Description:	LEAD
Waste Code:	D009
Waste Description:	MERCURY
Waste Code:	D010

CVS PHARMACY #0771 (Continued) **1014960772**

Waste Description: SELENIUM

Waste Code: D011
Waste Description: SILVER

Waste Code: D016
Waste Description: 2,4-D (2,4-DICHLOROPHENOXYACETIC ACID)

Waste Code: D018
Waste Description: BENZENE

Waste Code: D024
Waste Description: M-CRESOL

Waste Code: D026
Waste Description: CRESOL

Waste Code: D027
Waste Description: 1,4-DICHLOROBENZENE

Waste Code: D035
Waste Description: METHYL ETHYL KETONE

Waste Code: D039
Waste Description: TETRACHLOROETHYLENE

Waste Code: P001
Waste Description: 2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3% (OR) WARFARIN, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%

Waste Code: P012
Waste Description: ARSENIC OXIDE AS2O3 (OR) ARSENIC TRIOXIDE

Waste Code: P042
Waste Description: 1,2-BENZENEDIOL, 4-[1-HYDROXY-2-(METHYLAMINO)ETHYL]-, (R)- (OR) EPINEPHRINE

Waste Code: P075
Waste Description: NICOTINE, & SALTS (OR) PYRIDINE, 3-(1-METHYL-2-PYRROLIDINYL)-,(S)-, & SALTS

Waste Code: P081
Waste Description: 1,2,3-PROPANETRIOL, TRINITRATE (R) (OR) NITROGLYCERINE (R)

Waste Code: P188
Waste Description: BENZOIC ACID, 2-HYDROXY-, COMPD. WITH (3AS-CIS)-1,2,3,3A,8,8A-HEXAHYDRO-1,3A,8-TRIMETHYLPYRROLO[2,3-B]INDOL-5-YL METHYLCARBAMATE ESTER (1:1) (OR) PHYSOSTIGMINE SALICYLATE

Waste Code: U002
Waste Description: 2-PROPANONE (I) (OR) ACETONE (I)

Waste Code: U010
Waste Description: AZIRINO [2',3':3,4]PYRROLO[1,2-A]INDOLE-4,7-DIONE, 6-AMINO-8-[[(AMINOCARBONYL)OXY]METHYL]-1,1A,2,8,8A,8B-HEXAHYDRO-8A-METHOXY-5-METHYL-, [1AS-(1AALPHA, 8BETA, 8AALPHA, 8BALPHA)]- (OR)

CVS PHARMACY #0771 (Continued) **1014960772**

MITOMYCIN C

Waste Code: U031
Waste Description: 1-BUTANOL (I) (OR) N-BUTYL ALCOHOL (I)

Waste Code: U034
Waste Description: ACETALDEHYDE, TRICHLORO- (OR) CHLORAL

Waste Code: U035
Waste Description: BENZENEBUTANOIC ACID, 4-[BIS(2-CHLOROETHYL)AMINO]- (OR) CHLORAMBUCIL

Waste Code: U044
Waste Description: CHLOROFORM (OR) METHANE, TRICHLORO-

Waste Code: U058
Waste Description: 2H-1,3,2-OXAZAPHOSPHORIN-2-AMINE, N,N-BIS(2-CHLOROETHYL)TETRAHYDRO-, 2-OXIDE (OR) CYCLOPHOSPHAMIDE

Waste Code: U059
Waste Description: 5,12-NAPHTHACENEDIONE, 8-ACETYL-10-[(3-AMINO-2,3,6-TRIDEOXY)-ALPHA-L-LYXO-HEXOPYRANOSYL)OXY]-7,8,9,10-TETRAHYDRO-6,8,11-TRIHYDROXY-1-METHOXY-, (8S-CIS)- (OR) DAUNOMYCIN

Waste Code: U070
Waste Description: BENZENE, 1,2-DICHLORO- (OR) O-DICHLOROBENZENE

Waste Code: U072
Waste Description: BENZENE, 1,4-DICHLORO- (OR) P-DICHLOROBENZENE

Waste Code: U089
Waste Description: DIETHYLSTILBESTEROL (OR) PHENOL, 4,4'-(1,2-DIETHYL-1,2-ETHENEDIYL)BIS, (E)-

Waste Code: U122
Waste Description: FORMALDEHYDE

Waste Code: U129
Waste Description: CYCLOHEXANE, 1,2,3,4,5,6-HEXACHLORO-, (1ALPHA, 2ALPHA, 3BETA, 4ALPHA, 5ALPHA, 6BETA)- (OR) LINDANE

Waste Code: U132
Waste Description: HEXACHLOROPHENE (OR) PHENOL, 2,2'-METHYLENEBIS[3,4,6-TRICHLORO-

Waste Code: U150
Waste Description: L-PHENYLALANINE, 4-[BIS(2-CHLOROETHYL)AMINO]- (OR) MELPHALAN

Waste Code: U151
Waste Description: MERCURY

Waste Code: U154
Waste Description: METHANOL (I) (OR) METHYL ALCOHOL (I)

Waste Code: U165
Waste Description: NAPHTHALENE

Waste Code: U188

CVS PHARMACY #0771 (Continued) **1014960772**

Waste Description: PHENOL

Waste Code: U200
Waste Description: RESERPINE (OR) YOHIMBAN-16-CARBOXYLIC ACID, 11,17-DIMETHOXY-18-[(3,4,5-TRIMETHOXYBENZOYL)OXY]-, METHYL ESTER, (3BETA, 16BETA, 17ALPHA, 18BETA, 20ALPHA)-

Waste Code: U201
Waste Description: 1,3-BENZENEDIOL (OR) RESORCINOL

Waste Code: U204
Waste Description: SELENIOUS ACID (OR) SELENIUM DIOXIDE

Waste Code: U205
Waste Description: SELENIUM SULFIDE (OR) SELENIUM SULFIDE SES2 (R,T)

Waste Code: U206
Waste Description: D-GLUCOSE, 2-DEOXY-2-[[(METHYLNITROSOAMINO)-CARBONYL]AMINO]- (OR) GLUCOPYRANOSE, 2-DEOXY-2-(3-METHYL-3-NITROSOUREIDO)-,D- (OR) STREPTOZOTOCIN

Waste Code: U210
Waste Description: ETHENE, TETRACHLORO- (OR) TETRACHLOROETHYLENE

Waste Code: U279
Waste Description: U279

Waste Code: U411
Waste Description: U411

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
PA-EFACTS (Pennsylvania - Environmental Facility Application Compliance Tracking System) is a Department-wide database that provides a holistic view of clients and sites (including facilities) that DEP regulates.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
PA-EFACTS (Pennsylvania - Environmental Facility Application Compliance Tracking System) is a Department-wide database that provides a holistic view of clients and sites (including facilities) that DEP regulates.

Feature Description:	The site C03PA1053, N.W. Ayer & Sons, was located in Philadelphia, Philadelphia County, Pennsylvania. The Department of Defense (DOD) began occupying approximately 47,240 sq ft of the N.W. Ayer & Sons Building in Philadelphia, Pennsylvania between 1942 and 1943. This space was used by the U.S. Ordnance Department for the operation of the Small Arms Ammunition Sub-Office. The Rubin Organization currently owns the building with the underlying ground and leases space on several floors to different companies. According to a representative of the current owner, there is no known evidence of DOD-related hazards at the site.

Feature Description:	The site C03PA1075, Keystone Building, is located in Philadelphia, Philadelphia County, Pennsylvania. The Department of Defense (DoD) leased approximately 72,334 sq ft of the Keystone Building located at 261 North Broad Street in Philadelphia, Pennsylvania beginning after the fall of 1942. The site was formerly used by the U.S. Army, RCA Signal Corp Training School; the U.S. Army, Signal Corps, Stock Numbering Agency; and the U.S. Army, Philadelphia Ordnance District, Safety and Security Branch for office space. There is no evidence that

KEYSTONE BUILDING (Continued) **1024899586**

OEW was manufactured, stored, used, or disposed of at this site. The site is no longer owned or used by the DOD.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 01/25/2023

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

NJ SHWS: Known Contaminated Sites in New Jersey

The Known Contaminated Sites in New Jersey includes sites under the purview of the Site Remediation Program which have contamination present at levels greater than the applicable cleanup criteria for soil and/or groundwater standards. The sites appearing in Known Contaminated Sites in New Jersey are classified as either active, where the site is assigned to a specific remedial program area, or pending, where the site is awaiting assignment to a specific remedial program area. Sites where no further action (NFA) designation has been given are not included in this report unless there are other areas of identified contamination which have not been remediated. This report includes sites being remediated under all of the various regulatory programs administered by the Site Remediation Program such as: Federal Superfund Program, Federal Resource Conservation and Recovery Act (RCRA), New Jersey's Industrial Site Recovery Act (ISRA), New Jersey's Underground Storage of Hazardous Substances Act, New Jersey's Spill Compensation and Control Act, New Jersey's Solid Waste Management Act, New Jersey's Water Pollution Control Act.

Lists of state and tribal brownfield sites

PA BROWNFIELDS: Brownfields Sites

Brownfields are generally defined as abandoned or underused industrial or commercial properties where redevelopment is complicated by actual or perceived environmental contamination. Brownfields vary in size, location, age and past use. They can range from a small, abandoned corner gas station to a large, multi-acre former manufacturing plant that has been closed for years.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

PA ACT 2-DEED: Act 2-Deed Acknowledgment Sites

This listing pertains to sites where the Department has approved a cleanup requiring a deed acknowledgment under Act 2. This list includes sites remediated to a non-residential Statewide health standard (Section 303(g)); all sites demonstrating attainment of a Site-specific standard (Section 304(m)); and sites being remediated as a special industrial area (Section 305(g)). Persons who remediated a site to a standard that requires a deed acknowledgment shall comply with the requirements of the Solid Waste Management Act or the Hazardous Sites Cleanup Act, as referenced in Act 2. These statutes require a property description section in the deed concerning the hazardous substance disposal on the site. The location of disposed hazardous substances and a description of the type of hazardous substances disposed on the site shall be included in the deed acknowledgment. A deed acknowledgment is required at the time of conveyance of the property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

PA PFAS: Sites With Known PFAS Contamination

Perfluoroalkyl and polyfluoroalkyl substances (PFAS) are man-made chemicals, are resistant to heat, water and oil, and persist in the environment and the human body. PFAS are not found naturally in the environment. They have been used to make cookware, carpets, clothing, fabrics for furniture, paper packaging for food, and other materials that are resistant to water, grease, or stains. They are also used in firefighting foams and in a number of industrial processes.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health

Longitude (West):	75.147841 - 75ˆ 8’ 52.23’’
Universal Tranverse Mercator:	Zone 18
UTM X (Meters):	487370.7
UTM Y (Meters):	4421926.5
Elevation:	25 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	14072064 PHILADELPHIA, PA
Version Date:	2019

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

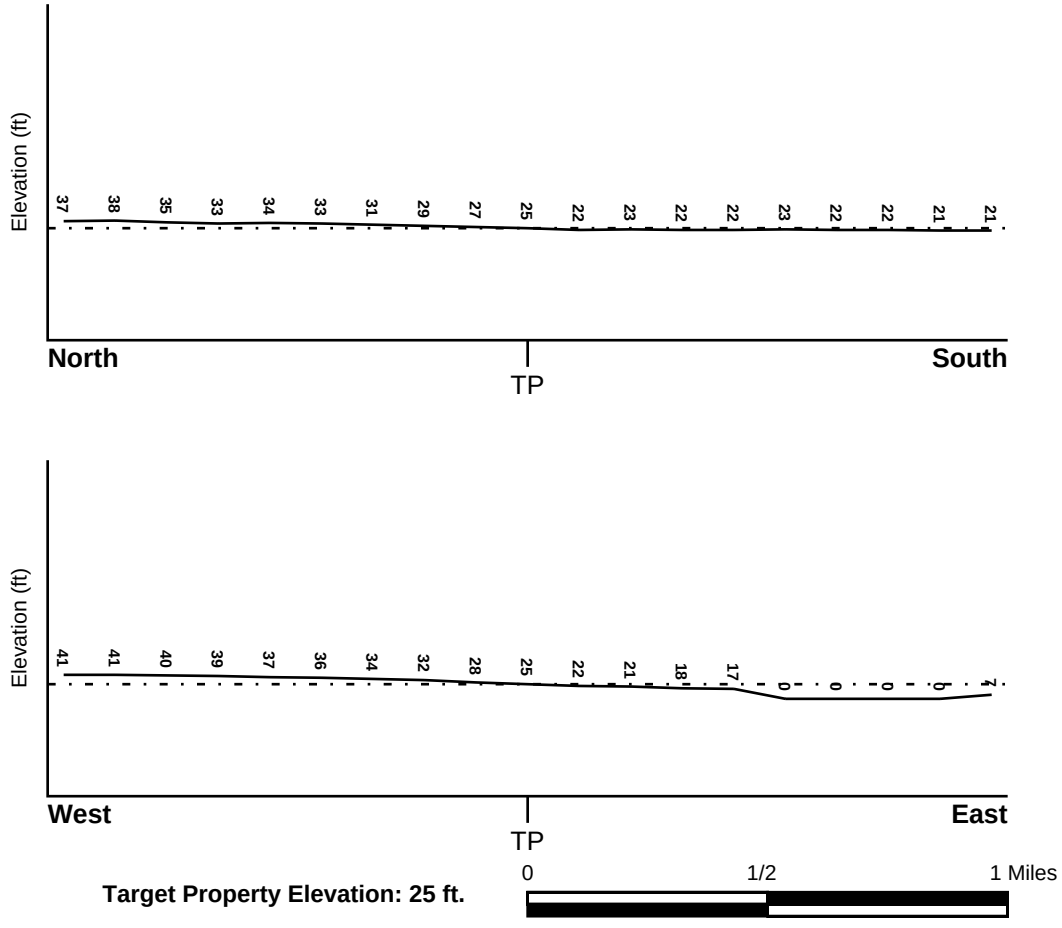
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ESE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Target Property Elevation: 25 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
4207570184H	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
4207570183G	FEMA FIRM Flood data
4207570191H	FEMA FIRM Flood data
4207570192H	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
PHILADELPHIA	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
98	1/2 - 1 Mile NW	Not Reported
1G	1/2 - 1 Mile NW	Not Reported

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	5 inches	variable	Not reported	Not reported	Max: Min:	Max: Min:

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory
Source: Pennsylvania Spatial Data Access
Telephone: 610-344-6105

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Source: Department of Conservation and Natural Resources
Telephone: 717-702-2045

OTHER STATE DATABASE INFORMATION

Pennsylvania Oil and Gas Locations
Source: Pennsylvania Department of Environmental Protection
Telephone: 814-863-0104
An Oil and Gas Location is a DEP primary facility type related to the Oil & Gas Program. The sub-facility types related to Oil and Gas that are included in this layer are:Land Application -- An area where drilling cuttings or waste are disposed by land application; Well-- A well associated with oil and/or gas production; Pit -- An approved pit that is used for storage of oil and gas well fluids. Some sub facility types are not included in this layer due to security policies.

RADON

State Database: PA Radon
Source: Department of Environmental Protection
Telephone: 717-783-3594
Radon Test Results Statistics by Zip Code

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: A review of the SEMS list, as provided by EDR, and dated 01/25/2023 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

BOURSE GARAGE
400 RANSTEAD STREET
PHILADELPHIA, PA 19106

TARGET PROPERTY COORDINATES

Latitude (North):	39.949263 - 39ˆ 56’ 57.35’’
Longitude (West):	75.147841 - 75ˆ 8’ 52.23’’
Universal Tranverse Mercator:	Zone 18
UTM X (Meters):	487370.7
UTM Y (Meters):	4421926.5
Elevation:	25 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	14072064 PHILADELPHIA, PA
Version Date:	2019

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

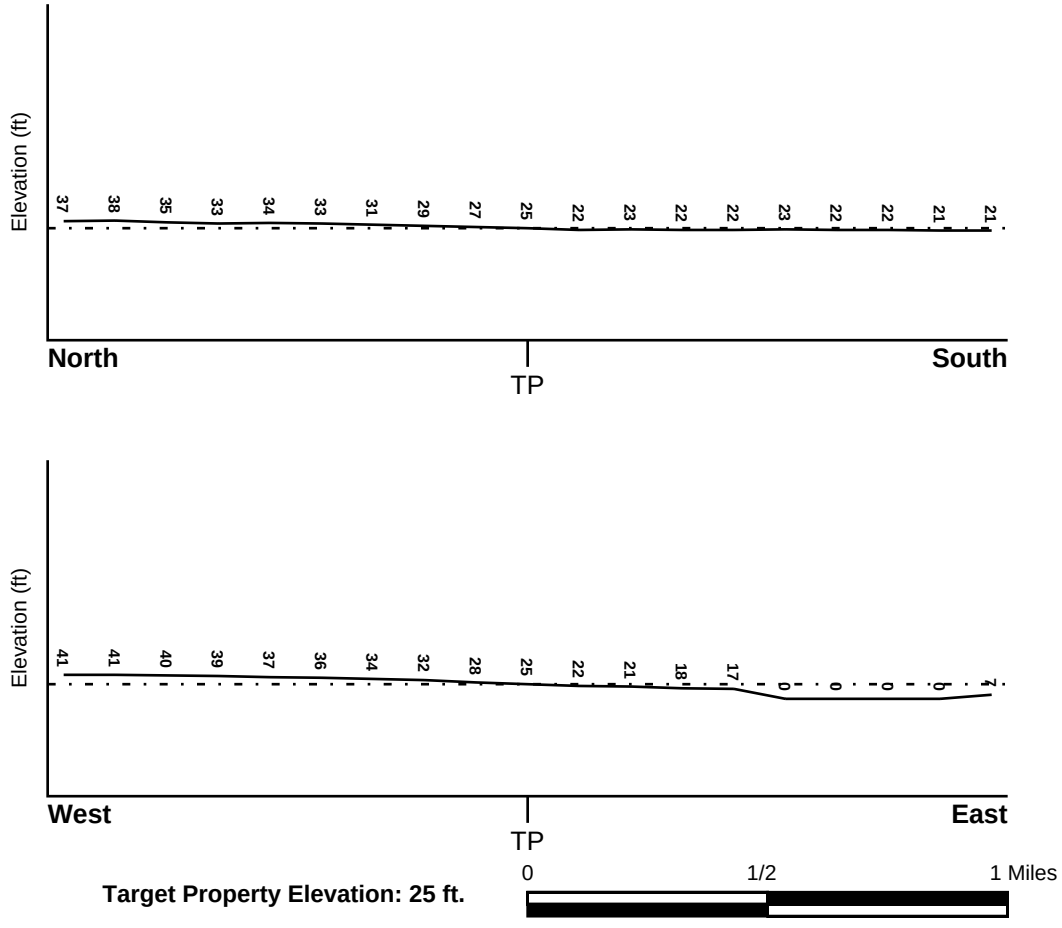
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ESE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Target Property Elevation: 25 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
98	1/2 - 1 Mile NW	Not Reported
1G	1/2 - 1 Mile NW	Not Reported

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	5 inches	variable	Not reported	Not reported	Max: Min:	Max: Min:

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

Note: Zone 1 indoor average level > 4 pCi/L.
: Zone 2 indoor average level >= 2 pCi/L and <= 4 pCi/L.
: Zone 3 indoor average level < 2 pCi/L.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory

Telephone: 610-344-6105

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Pennsylvania Oil and Gas Locations
Source: Pennsylvania Department of Environmental Protection
Telephone: 814-863-0104
An Oil and Gas Location is a DEP primary facility type related to the Oil & Gas Program. The sub-facility types related to Oil and Gas that are included in this layer are:Land Application -- An area where drilling cuttings or waste are disposed by land application; Well-- A well associated with oil and/or gas production; Pit -- An approved pit that is used for storage of oil and gas well fluids. Some sub facility types are not included in this layer due to security policies.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.
