ASTM E 1527-21 User Questionnaire

URGENT and CONFIDENTIAL FAX BACK TO 214-203-0650

USER QUESTIONNAIRE for PHASE Is

AS REQUIRED by new ASTM Standard E1527-21 (published November, 2021)

To:	Ms. Tehina Santillan	From:	Charles Summers
At:	Independence Collection Holdings, LLC	At:	ProGEA
Fax:		Pages:	1
Phone:	972-368-2245	Date:	March 21, 2023

Site Name: Bourse Garage
Address: 400 Ranstead Street, Philadelphia, Pennsylvania 19106

The person who will use the Phase I should provide the following information. Please fill in this form to the best of your ability, explaining any Yes answers on a separate sheet of paper. Without these answers, our report would have to note that the Phase I is incomplete, and your Landowner Liability Protections could be at risk. We need these answers before we conduct the site visit.

1. **Environmental Cleanup Liens.** ASTM requires the User to check for environmental liens that may be filed or recorded against the subject property under federal, tribal, state or local law. In Colorado, such liens might be listed in the "exceptions to coverage" in the property's title insurance commitment or policy. Failure to check for these liens could put your Landowner Liability Protections at risk.

   Have you checked for these environmental cleanup liens? ❑ Yes ■ No
   Are you aware of any such liens against the subject property? ❑ Yes ■ No

2. **Activity and Use Limitations (AULs).** These include engineering controls (e.g., slurry walls, caps) and land use restrictions or institutional controls (e.g., deed restrictions, covenants) that may be in place at the site or filed under federal, tribal, state or local law. In Colorado, the title commitment or policy might also list AULs.

   Are you aware of any possible AULs involving the subject site? ❑ Yes ■ No

3. **Specialized Knowledge.** This involves personal knowledge or experience related to the subject property or nearby properties. For example, if you are involved in the same line of business as the current or former occupants of the property or an adjoining property, you would probably know of any chemicals, oil, degreasers, gasoline, or other hazardous substances commonly used in that type of business.

   Do you have any specialized knowledge that might indicate the past or present use of such substances on the subject or nearby properties? ❑ Yes ■ No

4. **Fair Market Value (FMV).** A purchase price significantly below FMV may indicate an environmental problem. Please note that this question does not require an appraisal of the property. If the price is significantly below FMV, the User should consider whether it might be because contamination may be present at the property.

   Is the purchase price significantly below fair market value? ❑ Yes ■ No

5. **Obvious Indicators.** This involves past or present spills, stains, releases, cleanups, etc. on or near the site.

   Do you know of any obvious indicators of possible contamination on or near the site? ❑ Yes ■ No

6. **Common Knowledge.** Please use a separate sheet if necessary.

   a. Describe the past uses of the property: Unknown

   b. Describe any specific chemicals that may have been present at the property: _____

   c. Describe any other information that may help us identify possible contamination: _____

(for Tehina Santillan) March 21, 2023

Your Signature **Date** Explain Yes answers on a separate sheet.

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:15,800.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service
Web Soil Survey URL:
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Philadelphia County, Pennsylvania
Survey Area Data: Version 18, Sep 6, 2022

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Jun 5, 2022—Jul 4, 2022

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

2021 Drinking Water Quality Report

PHILADELPHIA WATER DEPARTMENT

Published in 2022

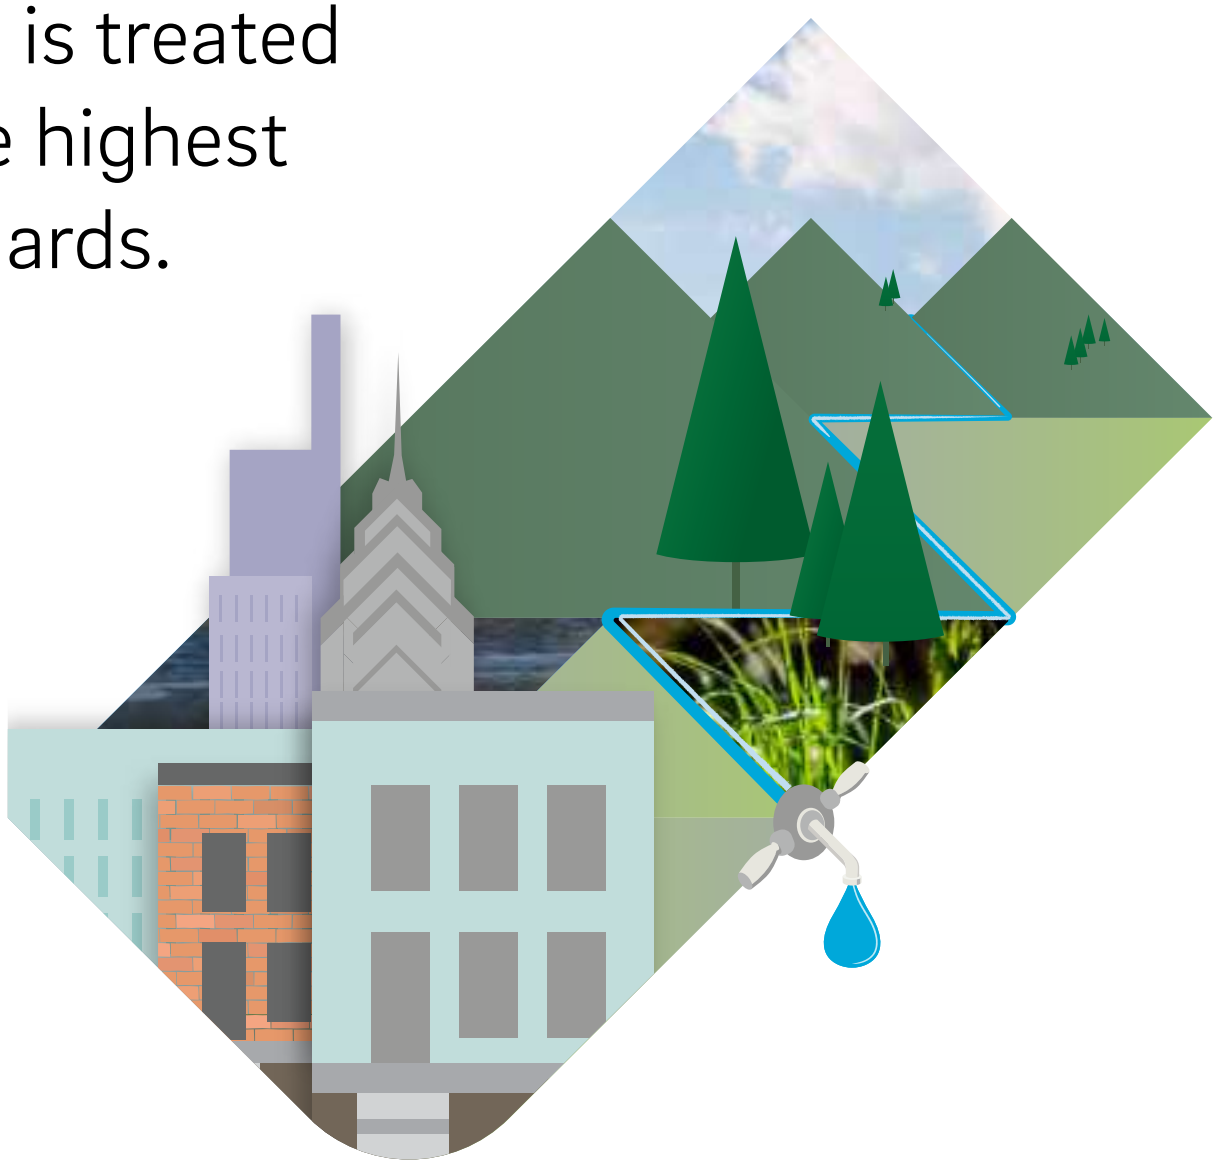
NOTE: Industrial and commercial customers, including hospitals, medical centers and health clinics, please forward this report to your Environmental Compliance Manager.

This report is produced for you as a requirement of the Federal Safe Drinking Water Act.

PWD's Public Water System Identification #PA1510001

Your tap is locally sourced.

Water from our rivers is treated to the highest standards.



A message from the Commissioner

Philadelphia Is Investing in Clean Water

This year's Drinking Water Quality Report is a testament to the fact that we are continuing to meet our mission of providing 1.6 million people with some of the best water in the country.

Delivering hundreds of millions of gallons of safe, clean water every day—and ensuring all of our services are affordable—doesn't happen by accident.

The maintenance and improvements we have planned require major work and investment, and we are actively securing funds that allow us to make critical investments and reduce costs for our customers.

For example, we recently received a $40.4 million loan for water main replacement from the state-run Pennsylvania Infrastructure Investment Authority, PENNVEST.

An additional $125 million loan will go toward building new basins at our Baxter Drinking Water Treatment Plant, helping to ensure reliable clean water now and in the future.

Our Torresdale Filtered Water Pumping Station was awarded an $80.8 million loan to fund what amounts to its biggest makeover since it was constructed more than 70 years ago.

We are also currently planning improvements that will essentially rebuild our Queen Lane Drinking Water Treatment Plant in the coming years.

All of these investments will result in direct health and safety benefits for the people of Philadelphia.

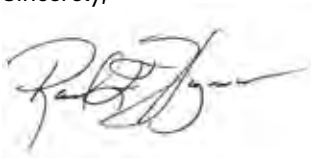
Our strong record of planning for big investments will pay off as cities and states begin to access resources made available by the Bipartisan Infrastructure Law passed in 2021.

While it is still unclear how much Philadelphia will receive from Pennsylvania's share of the funds, this is the opportunity of a generation. We look forward to the support of local stakeholders and officials.

Thanks to our team of dedicated staff, Philadelphia is poised to take advantage of this historic moment to further invest in the health and sustainability of our city.

Learn more about our plans to invest in clean drinking water: see page 11 to read about the 25-year Water Revitalization Plan.

Sincerely,



Randy E. Hayman, Esq.
Water Commissioner

Sharing this report

Please share this report with all people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools and businesses). You can do this by posting this notice in a public place or distributing copies by hand and mail.

To receive a printed copy of this report, please email: waterquality@phila.gov.

People with special health concerns

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons, such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS and other immune system disorders, and some elderly people and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers.

U.S. Environmental Protection Agency (EPA)/Centers for Disease Control CDC guidelines on appropriate means to lessen the risk of drinking water contaminants are available from the Safe Drinking Water Hotline: (800) 426-4791.

2021 Data Tables & More

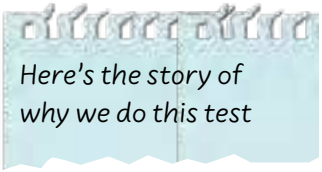
pages 15–23

Look for these quick guides throughout the report:

Charts and graphs let you see the data in a new way. ➤



Handwritten notes explain how and why we do these tests. ➤

☑ RESULT:
All results are better than the recommended federal levels.

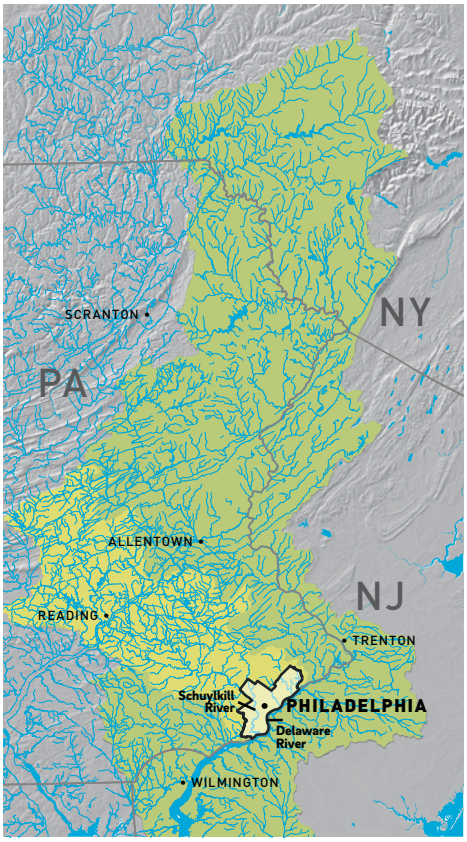
Look here for key takeaways. ➤

Part One

Source & Treatment

Your water begins in freshwater streams.

Philadelphia's water comes from the Delaware River Watershed. The watershed begins in New York State and extends 330 miles south to the mouth of the Delaware Bay. The Schuylkill River is part of the Delaware River Watershed.



Philadelphia source watersheds

- Delaware River Watershed
- Schuylkill River Watershed

Protection starts at the sources.

We take a holistic approach, beginning with Philadelphia's water supply. We monitor actual pollution sources and look for potential sources of contamination. We keep track of water availability and flow.

Our wide range of tools includes:

Research

- We study regional influences, such as natural gas drilling and global influences, like sea level rise.

Projects in the field

- We protect against stormwater and agricultural runoff.
- We monitor water contaminants.

Partnerships

- We team up with organizations across the region to protect our entire watershed.

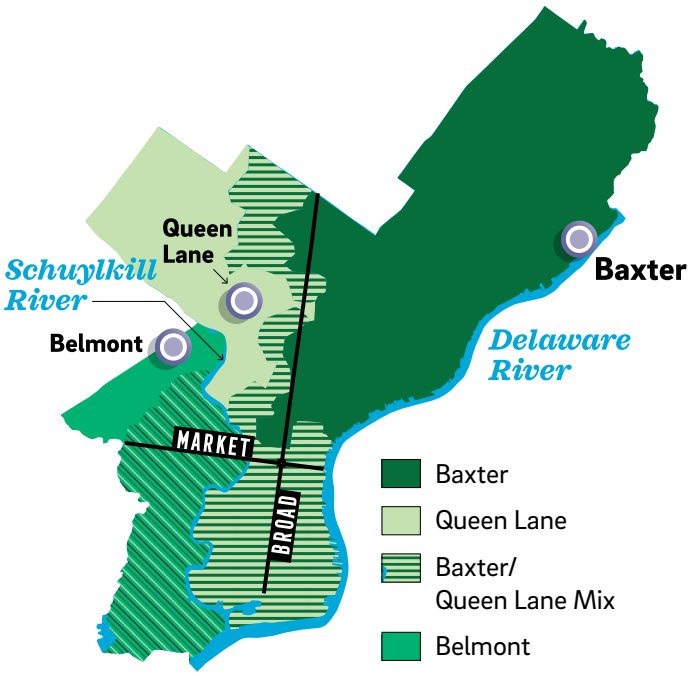
Looking closely for potential threats

Cryptosporidium, a microscopic organism sometimes found in freshwater, can cause illness in humans. We are one of the nation's leaders in *Cryptosporidium* research. We work closely with the Philadelphia Department of Public Health to ensure our tap water is free of *Cryptosporidium* and other organisms.

Per- and polyfluoroalkyl substances (PFAS) are potentially harmful chemicals that have been used in industry and many consumer products. We voluntarily test for PFAS in the city's rivers and creeks. PWD's water sampling has not detected amounts at or above the EPA's health advisory levels.

A recent independent test by the Pennsylvania Department of Environmental Protection showed no detectable PFAS concentrations in Philadelphia's treated drinking water.

We take water from the Delaware River at one of our three treatment plants in Philadelphia.



One city. **Two** rivers. **Three** treatment plants.

Philadelphia has two rivers that provide our drinking water: the Delaware River and the Schuylkill River. PWD operates three water treatment plants: **Baxter**, **Queen Lane**, and **Belmont**.

Where you live in Philadelphia determines which plant(s) treat your water!

High-quality staff. High-quality results.

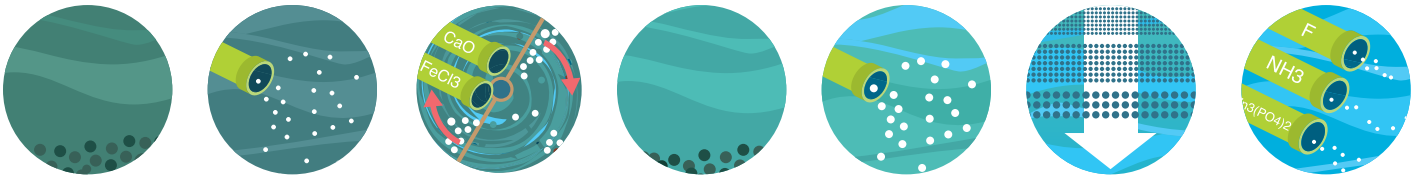
The experts working at our treatment plants take pride in using water drawn from our local rivers.

Hundreds of millions of gallons of top-quality drinking water are produced every day.

Drinking Water Treatment Plants:
An important early step in water's journey.

Treatment processes

Once collected, river water goes through multiple processes to ensure it's crystal clear and safe.



Gravity settling

River water is pumped to reservoirs. Sediment settles.

Disinfection

We add Sodium Hypochlorite to kill harmful organisms.

Coagulant, flocculation, and pH

Gentle mixing helps particles clump together. We also adjust the acidity.

Additional settling

Clumps of particles settle and are removed.

Additional disinfection

We add Sodium Hypochlorite a second time to kill any remaining harmful organisms.

Filtration

Filters remove more microscopic particles.

Additional treatment

Ingredients like Fluoride, Zinc Phosphate, and Ammonia help keep water healthy and safe

Before it leaves the plant

We test our treated water for about 100 regulated contaminants, ranging from organisms like bacteria to chemicals like nitrate.

In 2021, we found no violations under state and federal regulations.

Final touches

Chlorine + Ammonia

Chlorine protects us from organisms found in untreated water that can cause disease. Ammonia is added to make the chlorine last longer and reduce the bleach-like smell.

Fluoride

All water contains some fluoride. We adjust the natural levels slightly to help protect your teeth against decay.

Zinc orthophosphate

Zinc orthophosphate is a compound that helps form a protective coating form on pipes. It prevents corrosion (or breaking down over time).

A CLOSER LOOK

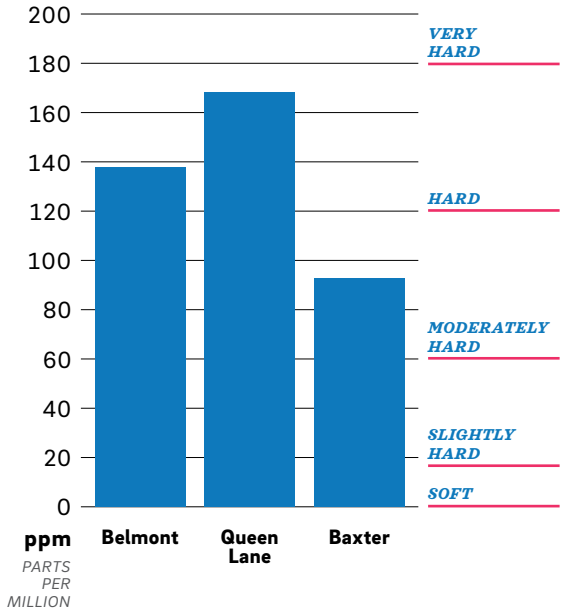
Hardness

The hardness of water is determined by the minerals naturally dissolved in it.

Hardness can vary based on natural conditions – for example, a drought can impact hardness.

Hardness matters if you use your water for activities, such as brewing beer or keeping a home aquarium. Customers often ask about hardness when researching appliances like dishwashers.

2021 Results



What this means for you

☑ RESULT: Philadelphia's water is *moderately hard* or *hard*, depending on which treatment plant serves your neighborhood.

Hardness matters if you use your water for activities like brewing beer or keeping a home aquarium.

Most customers don't need to monitor their water's hardness.

Part Two

Delivery

A safe path through the system

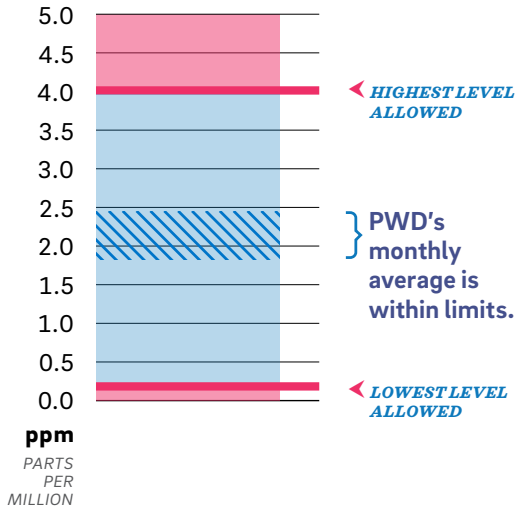
We have about 3,100 miles of water mains that deliver clean tap to customers. To ensure water stays safe as it moves from the plant to you, we take samples and monitor real-time water quality data 24/7.

A CLOSER LOOK

Residual Chlorine

This test is done throughout the system. It checks that the chlorine added at plants remains at levels that keep water fresh and safe while staying within regulations.

2021 Results



What this means for you

☑ RESULT: Better than standards.

We travel the city to collect samples of drinking water from fire and police stations, pumping stations, and more.

We do over 400 of these tests every month!

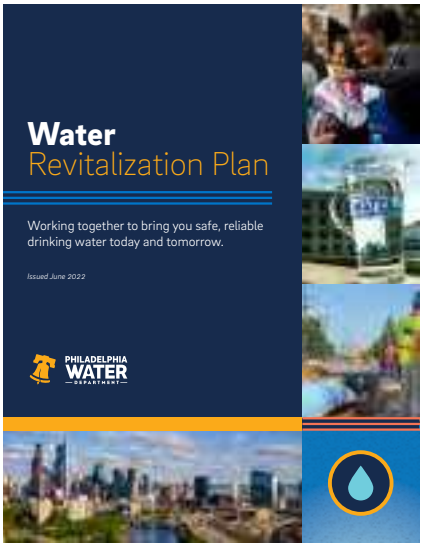
Large scale water mains help transport water from treatment plants to customers.

Water Revitalization Plan

Philadelphia has a 25-year plan to upgrade and strengthen essential drinking water infrastructure.

From facilities to water mains, we're keeping the system safe, reliable, and resilient for the future.

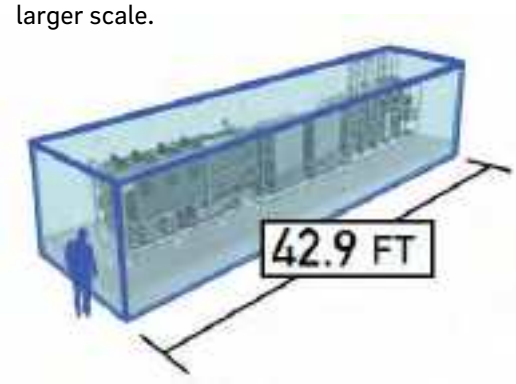
We've coordinated several large-scale projects to maximize benefits for Philadelphians while reducing interruptions and service impacts.



PLAN SPOTLIGHT:

A Mini Water Treatment Plant

Within a container about the size of a trailer, PWD scientists are testing the methods planned for an upgraded treatment plant. This mini laboratory allows us to test processes before they're used at a larger scale.



Learn more: water.phila.gov/revitalization

Part Three

At Home

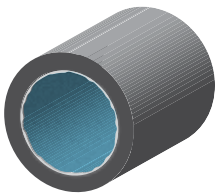
Your Service Line: The final stretch

Once it leaves our water main and enters your service line, you and your property's plumbing can play a role in keeping water safe.

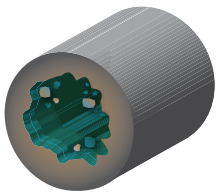
The service line leading to your water meter is part of your home's plumbing.

Corrosion Control

Philadelphia has a corrosion control program mandated by federal law and optimized over the past two decades. It minimizes the release of lead from service lines, indoor pipes, fixtures, and solder by creating a coating designed to keep lead from leaching into the water.



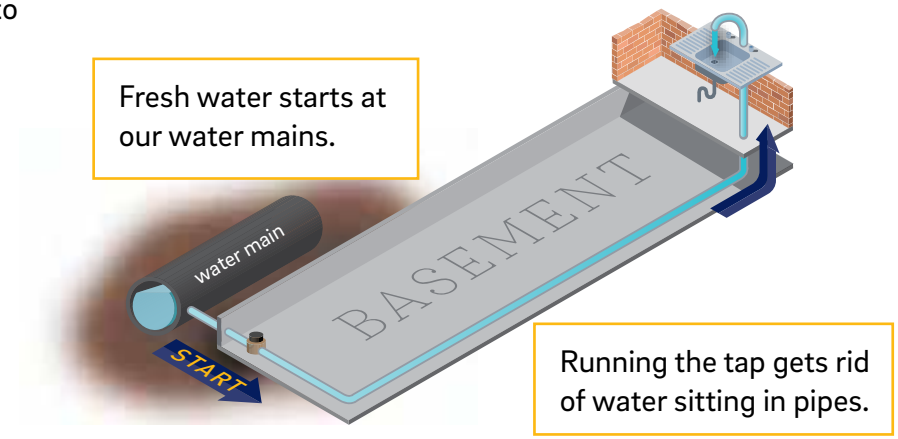
With corrosion control

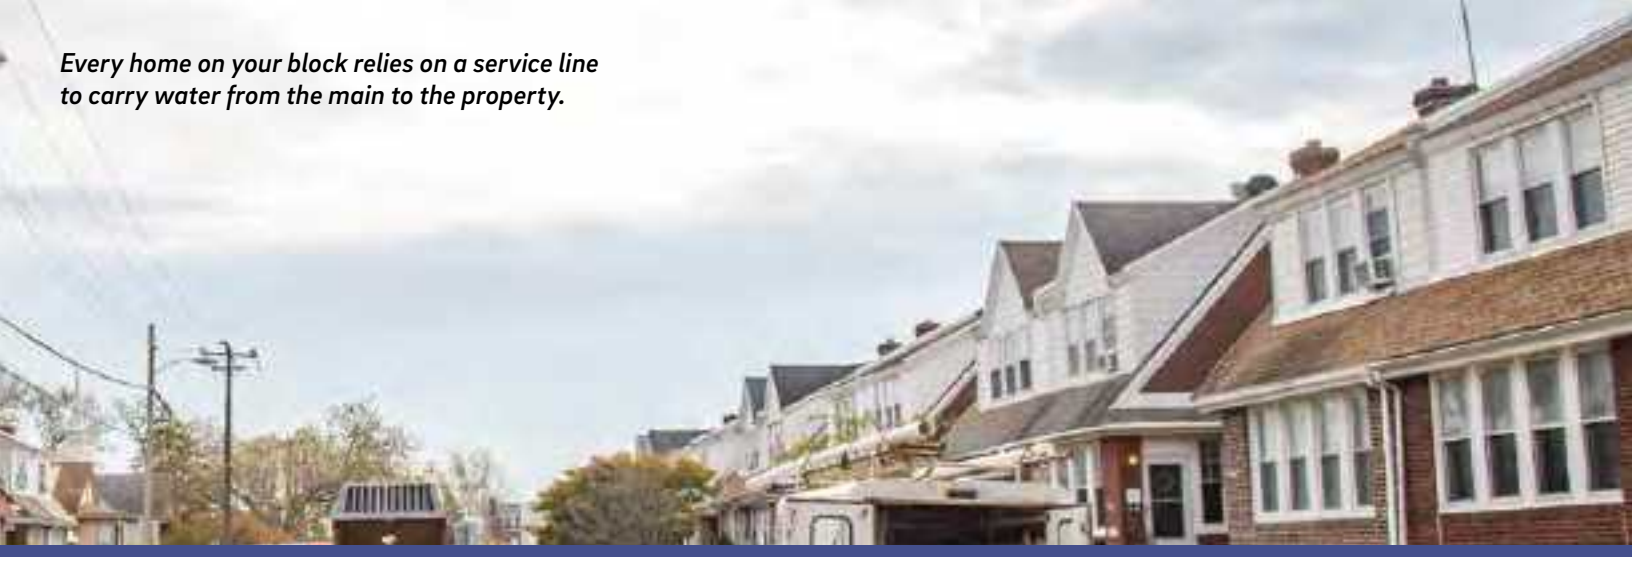


Without corrosion control

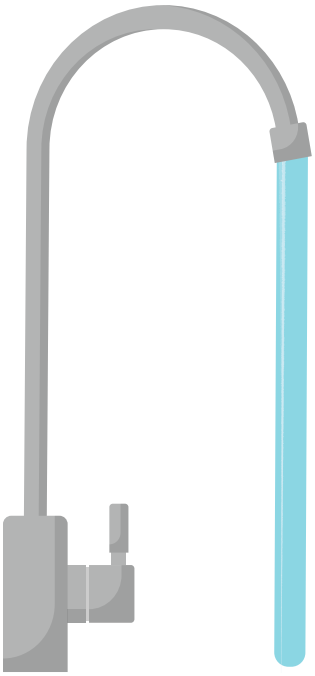
What do we mean by "flushing your pipes"?

Flushing pushes the water that is sitting in pipes out and down your drain until fresh water comes through the tap. When pipes are disturbed during construction or repairs, they might require flushing.





Every home on your block relies on a service line to carry water from the main to the property.



Healthy home habit

If you haven't used water for 6 hours or more: Run your cold water for 3–5 minutes. This will flush out water that's been sitting in your pipes.

It only costs a penny or two to ensure top-quality tap!

Talking about tap water

In neighborhoods across Philadelphia, our customers tell us what matters to them. When it comes to tap water, there's a lot to talk about!

For starters, some residents are surprised they can get great drinking water right at home for less than a penny per gallon.

In each conversation, we hear loud and clear: **Safe drinking water is a top priority, and lead is a topic people want to learn more about.**

Our drinking water mains are not made of lead.

However, some older buildings may have lead plumbing.

Lead in a property's plumbing

A home's older fixtures & valves:
Lead can be found in older fixtures and valves, and in old solder, where pipes are joined.

Service Line:
This pipe connects a property's plumbing to the water main in the street and is the responsibility of the property owner.

A CLOSER LOOK

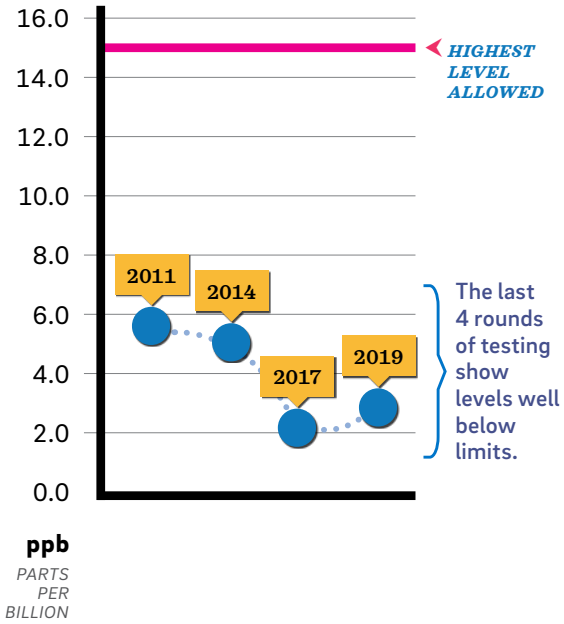
Carefully monitoring Lead

In addition to conducting regular tests in customer homes, every three years we complete a rigorous round of sampling for lead and copper. We take samples from homes that have lead service lines.

We share the results with the EPA and the public.

The EPA requires that 90% of homes show lead levels less than 15 ppb.

Recent results



What this means for you

Soon, the EPA will update their guidelines for sampling. This will impact future results. We support this effort to make sure sampling is accurate, and to help identify homes with lead plumbing.

☑ RESULT:
Lead levels are consistently lower than limits set by the EPA.

US EPA Guidance

The EPA requires public water providers like the Philadelphia Water Department to monitor drinking water for lead at customer taps. If lead levels are higher than 15 parts per billion (ppb) in more than 10% of taps sampled, water providers must inform customers and take steps to reduce lead in water.

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from material and components associated with service lines and home plumbing.

The Philadelphia Water Department is responsible for providing safe drinking water but cannot control the variety of materials used in plumbing components. If you haven't turned on your tap for several hours, you can minimize the potential for lead exposure by flushing your tap before using water for drinking and cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline (800) 426-4791 or at: www.epa.gov/safewater/lead.

We offer a zero-interest loan for replacing lead service lines.
The Homeowners Emergency Loan Program (HELP) can cover the cost of a replacement.

➤ Learn more & apply: **www.phila.gov/water/helploan**

2021 Data tables & More

All of PWD's results are better than the required and recommended federal levels designed to protect public health.

This data shows how our process keeps your drinking water safe.

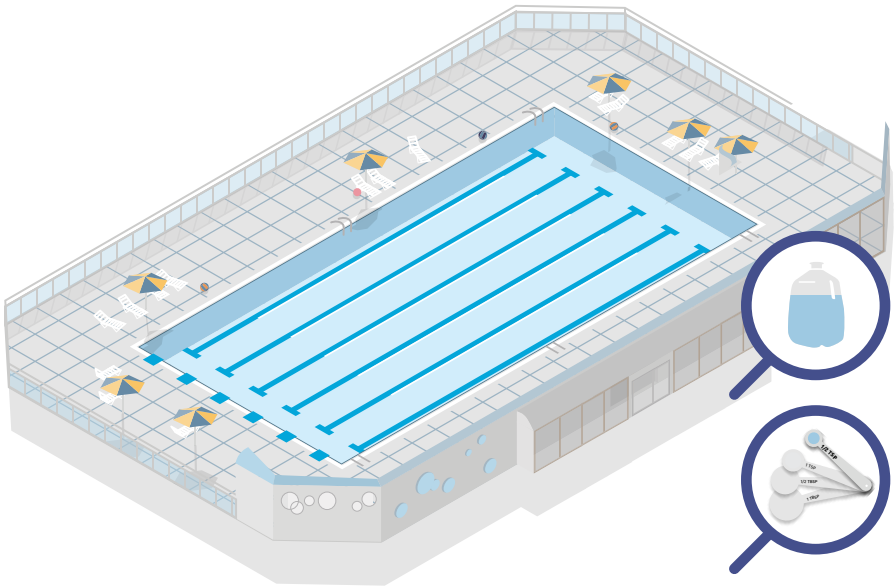
By reporting these results in these tables, we are meeting a requirement of the EPA.

Some contaminants may pose a health risk at certain levels to people with special health concerns. Others are used as indicators for treatment plant performance.

What's a "PPM"?

Many of these results are reported as "**parts per million (ppm)**" or "**parts per billion (ppb)**".

Here's what that looks like:



PPM vs. PPB

ppm (parts per million):
Denotes 1 part per 1,000,000 parts, which is equivalent to **two-thirds of a gallon** in an Olympic-sized swimming pool.

ppb (parts per billion):
Denotes 1 part per 1,000,000,000 parts, which is equivalent to **half a teaspoon** in an Olympic-sized swimming pool.

For more abbreviations and their definitions, visit the Glossary on page 22.

Illustration: GoodStudio / Shutterstock.com, and Philadelphia Water Department

What we test for and how

Public drinking water systems monitor their treated drinking water for approximately 100 regulated contaminants. These regulatory parameters are defined within federal rules such as the Revised Total Coliform Rule, Surface Water Treatment Rule, Disinfectants and Disinfection Byproducts Rules, Lead and Copper Rule, and the Radionuclides Rule.

We monitor for the regulated parameters listed below.

Any contaminants found are noted in the tables on the following pages:

Inorganic Chemicals

Antimony
Arsenic
Barium
Beryllium
Cadmium
Chromium
Copper
Cyanide
Fluoride
Lead
Mercury
Nickel
Nitrate
Nitrite
Selenium
Thallium

Synthetic Organic Chemicals

2,3,7,8 - TCDD (Dioxin)
2,4 – D, 2,4,5 - TP (Silvex)
Alachlor

Vinyl Chloride

Other factors that can impact drinking water

Appealing to Your Senses

We work to ensure your water looks, tastes, and smells the way it should.

To meet all water quality taste and odor guidelines, we test for the following: alkalinity, aluminum, chloride, color, hardness, iron, manganese, odor, pH, silver, sodium, sulfate, surfactants, total dissolved solids, turbidity, and zinc.

Temperature and Cloudiness

The temperature of the Schuylkill and Delaware Rivers varied seasonally in 2021 from approximately 34°–82° Fahrenheit. PWD does not treat the water for temperature.

Cloudiness in tap water most commonly happens in the winter, when the cold water from the water main is warmed up quickly in household plumbing. Cold water and water under pressure can hold more air than warmer water and water open to the atmosphere.

When really cold winter water comes out of your tap, it's simultaneously warming up and being relieved of the pressure it was under inside the water main and in your plumbing. The milky white color is actually just tiny air bubbles. If you allow the glass to sit undisturbed for a few minutes, you will see it clear up gradually.

2021 Data tables

Sodium, Hardness, and Alkalinity in tap water

The parameters listed below are not part of EPA's requirements and are provided for information purposes.

WATER TIP:

Parameters like these matter if you use your water for activities like brewing beer or keeping a home aquarium.

SODIUM IN TAP WATER

	Baxter WTP One Year Average	Belmont WTP One Year Average	Queen Lane WTP One Year Average
Average (ppm)	24 ppm	43 ppm	44 ppm
Average (mg in 8 oz. glass of water)	6 mg	10 mg	10 mg
Range (ppm)	16–64 ppm	30–84 ppm	29–121 ppm
Range (mg in 8 oz. glass of water)	4–15 mg	7–20 mg	7–29 mg

HARDNESS IN TAP WATER

	Baxter WTP One Year Average	Belmont WTP One Year Average	Queen Lane WTP One Year Average
Average	92 ppm or 5 gpg	139 ppm or 8 gpg	169 ppm or 10 gpg
Minimum	75 ppm or 4 gpg	110 ppm or 6 gpg	123 ppm or 7 gpg
Maximum	114 ppm or 7 gpg	170 ppm or 10 gpg	209 ppm or 12 gpg

Hardness defines the quantity of minerals, such as calcium and magnesium, in water. These minerals react with soap to form insoluble precipitates and can affect common household chores such as cooking and washing. Philadelphia's water is considered "medium" hard.

ALKALINITY IN TAP WATER

	Baxter WTP One Year Average	Belmont WTP One Year Average	Queen Lane WTP One Year Average
Average	35 ppm	68 ppm	77 ppm
Minimum	25 ppm	41 ppm	53 ppm
Maximum	45 ppm	92 ppm	98 ppm

Secondary Chemicals

EPA has established National Secondary Drinking Water Regulations (NSDWRs) that set non-mandatory water quality standards. EPA does not enforce these "secondary maximum contaminant levels" (SMCLs). They are established as guidelines to assist public water systems in managing their drinking water for aesthetic considerations, such as taste, color, and odor. These contaminants are not considered to present a risk to human health at the SMCL.

SECONDARY MCLs: AESTHETIC IMPACTS IN TAP WATER

	EPA's SMCL	Baxter WTP One Year Range*	Belmont WTP One Year Range*	Queen Lane WTP One Year Range*	Violation**
Chloride	250 ppm	50–143 ppm	64–171 ppm	75–261 ppm	No
Copper	1.0 ppm	<0.001–0.002 ppm	0.006–0.019 ppm	0.020–0.046 ppm	No
Fluoride	2 ppm***	0.62 ppm	0.71 ppm	0.71 ppm	No
Iron	0.3 ppm	<0.010–0.016 ppm	<0.010 ppm	<0.010–0.020 ppm	No
pH	6.5–8.5	7.10–7.25	7.10–7.30	6.97–7.34	No
Sulfate	250 ppm	7.35–34.20 ppm	12.30–49.50 ppm	17.40–47.90 ppm	No
Total Dissolved Solids	500 ppm	136–346 ppm	200–468 ppm	230–576 ppm	No

PWD also monitored for Aluminum, Color, Manganese, and Silver in 2021; all results were below respective parameter detection limits.

*Ranges with a less than symbol "<" indicate some results were below the method detection limit for 2021.

**Individual results are averaged monthly. Compliance is based on locational running annual average.

***EPA's MCL and MCLG is 4 ppm, but PADEP has set this lower MCL and MCLG which takes precedence.

Sources of Secondary Chemicals

Chloride	Copper	Fluoride	Iron	pH	Sulfate	Total Dissolved Solids
Main component of many salts, may increase in winter months; Erosion of natural minerals; Used in the water treatment process in the form of ferric chloride.	Corrosion of copper pipes in premise plumbing; Erosion of natural deposits.	Erosion of natural deposits; Water additive that promotes strong teeth; Discharge from fertilizer and aluminum factories.	Corrosion of iron water mains and premise plumbing; Erosion of natural minerals; Used in the water treatment process in the form of ferric chloride.	Adjusted during the water treatment process.	Erosion of natural minerals; Runoff from mining operations.	Erosion of natural minerals; May increase during winter months due to road salt runoff or during drought conditions.

LEAD & COPPER – Tested at customers' taps: *Testing is done every 3 years. Most recent tests were done in 2019.*

	EPA's Action Level - for a representative sampling of customer homes	Ideal Goal (EPA's MCLG)	90% of PWD customers' homes were less than	Number of homes considered to have elevated levels	Violation	Source
Lead	90% of homes must test less than 15 ppb	0 ppb	3.0 ppb	2 out of 99	No	Corrosion of household plumbing; Erosion of natural deposits
Copper	90% of homes must test less than 1.3 ppm	1.3 ppm	0.28 ppm	0 out of 99	No	Corrosion of household plumbing; Erosion of natural deposits; Leaching from wood preservatives

INORGANIC CHEMICALS (IOC) – PWD monitors for IOC more often than required by EPA.

Chemical	Highest Level Allowed (EPA's MCL)	Ideal Goal (EPA's MCLG)	Highest result	Range of Test Results for the Year	Violation	Source
Antimony	6 ppb	6 ppb	0.3 ppb	0–0.3 ppb	No	Discharge from petroleum refineries; fire retardants; ceramics; electronics; solder
Barium	2 ppm	2 ppm	0.051 ppm	0.028–0.051 ppm	No	Discharges of drilling wastes; Discharge from metal refineries; Erosion of natural deposits
Chromium	100 ppb	100 ppb	3 ppb	0–3 ppb	No	Discharge from steel and pulp mills; Erosion of natural deposits
Fluoride	2 ppm*	2 ppm*	0.71 ppm	0.62–0.71 ppm	No	Erosion of natural deposits; Water additive which promotes strong teeth; Discharge from fertilizer and aluminum factories
Nitrate	10 ppm	10 ppm	3.84 ppm	0.64–3.84 ppm	No	Runoff from fertilizer use; Leaching from septic tanks; Erosion of natural deposits

*EPA's MCL and MCLG is 4 ppm, but PADEP has set this lower MCL and MCLG which takes precedence.

TOTAL CHLORINE RESIDUAL – Continuously monitored at Water Treatment Plants

Sample Location	Minimum Disinfectant Residual Level Allowed	Lowest Level Detected	Yearly Range	Violation	Source
Baxter WTP	0.2 ppm	2.39 ppm	2.39–3.88 ppm	No	Water additive used to control microbes
Belmont WTP		1.63 ppm	1.63–2.87 ppm		
Queen Lane WTP		2.02 ppm	2.02–3.99 ppm		

TOTAL CHLORINE RESIDUAL – Tested throughout the Distribution System. Over 360 samples collected throughout the City every month.

Sample Location	Maximum Disinfectant Residual Allowed	Highest Monthly Average	Monthly Average Range	Violation	Source
Distribution System	4.0 ppm	2.46 ppm	1.86–2.46 ppm	No	Water additive used to control microbes

TOTAL ORGANIC CARBON – Tested at Water Treatment Plants

Treatment Technique Requirement	Baxter WTP One Year Average	Belmont WTP One Year Average	Queen Lane WTP One Year Average	Violation	Source
Percent of Removal Required	35–45%	25–35%	25–35%	n/a	Naturally present in the environment.
Percent of Removal Achieved*	0–72%	7–67%	19–72%	No	
Number of Quarters out of Compliance*	0	0	0		

*PWD achieved TOC removal requirements in all quarters of 2021 at all WTPs. Compliance is based on a running annual average computed quarterly. The numbers shown represent a range of TOC results in weekly samples.

TURBIDITY, A MEASURE OF CLARITY – Tested at Water Treatment Plants

	Baxter WTP One Year Average	Belmont WTP One Year Average	Queen Lane WTP One Year Average	Violation	Source
Treatment Technique Requirement: *95% of samples must be at or below 0.300 NTU*	100% below 0.300 NTU	100% below 0.300 NTU	100% below 0.300 NTU	n/a	Soil runoff, river sediment
Highest single value for the year	0.096 NTU	0.080 NTU	0.196 NTU	No	

The turbidity of Philadelphia's water in 2021 was 86 percent below the maximum level of 0.3 NTU allowed by the State and Federal Regulations and was 57 percent below the Partnership for Safe Water turbidity goal of 0.1 NTU.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not your drinking water meets health standards. PWD continuously operates and monitors water quality from a total of 160 filters at three drinking water treatment plants.

DISINFECTION BYPRODUCTS

	Highest Level Allowed (EPA's MCL) - One Year Average	Running Annual Average 2021*	System Wide Range of Results	Violation	Source
Total Trihalomethanes (TTHMs)	80 ppb	49 ppb	13–101 ppb	No	Byproduct of drinking water disinfection
5 Haloacetic acids (HAA5)	60 ppb	46 ppb	10–88 ppb	No	Byproduct of drinking water disinfection

*Monitoring is conducted at 16 locations throughout the City of Philadelphia. This result is the highest locational running annual average in 2021.

UNREGULATED CONTAMINANT MONITORING (UCMR)[1]			
Chemical	**Testing Period**	**Average**	**Range**
Anatoxin-a	07/14/2020–10/20/2020	0.00125 ppb	0–0.03 ppb
Bromide[2]	1/14/2020	0.034 ppm	0–0.052 ppm
Total Organic Carbon (TOC)[2]	1/14/2020	2.27 ppm	2.19–2.34 ppm
HAA5 Total[3]	1/14/2020	21.3 ppb	14.8–31.3 ppb
HAA6Br Total[4]	1/14/2020	7.1 ppb	3.8–10.3 ppb
HAA9 Total[5]	1/14/2020	28.2 ppb	23.6–35.5 ppb
Manganese	1/15/2020	0.55 ppb	0–0.95 ppb

[1] Unless otherwise noted, samples were collected from finished water sampling locations.

[2] Bromide and TOC represent source water samples.

[3] HAA5 Total - Dibromoacetic Acid, Dichloroacetic Acid, Monobromoacetic Acid, Monochloroacetic Acid, and Trichloroacetic Acid

[4] HAA6Br Total - Bromochloroacetic Acid, Bromodichloroacetic Acid, Dibromoacetic Acid, Dibromochloroacetic Acid, Monobromoacetic Acid, and Tribromoacetic Acid

[5] HAA9 Total - Bromochloroacetic Acid, Bromodichloroacetic Acid, Chlorodibromoacetic Acid, Dibromoacetic Acid, Dichloroacetic Acid, Monobromoacetic Acid, Monochloroacetic Acid, Tribromoacetic Acid, and Trichloroacetic Acid

In 2020, PWD performed special monitoring as part of the Unregulated Contaminant Monitoring Rule (UCMR), a nationwide monitoring effort conducted by the EPA. Unregulated contaminants are those that do not yet have a drinking water standard set by the EPA. The purpose of monitoring for these contaminants is to help the EPA decide whether the contaminants should have a standard. For more information concerning UCMR, visit these websites: *https://www.epa.gov/dwucmr/fourth-unregulated-contaminant-monitoring-rule* or *https://drinktap.org/Water-Info/Whats-in-My-Water/Unregulated-Contaminant-Monitoring-Rule-UCMR*

UNREGULATED CONTAMINANTS NOT DETECTED AT ANY OF THE SAMPLING LOCATIONS:

1-Butanol, 2-Methoxyethanol, 2-Propen-1-ol, alpha-Hexachlorocyclohexane, anatoxin-a, Butylated Hydroxyanisole, Chlorpyrifos, Cylindrospermopsin, Dimethipin, Ethoprop, Germanium, Microcystin Total, Nodularin, o-Toluidine, Oxyfluorfen, Permethrin Total, Profenofos, Quinoline, Tebuconazole, Tribufos

CRYPTOSPORIDIUM – Tested at Source Water to Water Treatment Plants prior to treatment in 1/1/2017–3/31/2017				
Treatment Technique Requirement	**Baxter WTP One Year Average**	**Belmont WTP One Year Average**	**Queen Lane WTP One Year Average**	**Source**
Total Number of Samples Collected	6	6	6	Naturally present in the environment.
Number of *Cryptosporidium* Detected	15	2	6	
	0.250 count/L	0.033 count/L	0.100 count/L	

Cryptosporidium is a microbial pathogen found in surface water throughout the U.S. Although filtration removes *Cryptosporidium*, the most commonly-used filtration methods cannot guarantee 100 percent removal. Our monitoring indicates the presence of these organisms in our source water. Current test methods do not allow us to determine if the organisms are dead or if they are capable of causing disease.

Glossary

Here are definitions for some of the words and phrases we use in the report and in our data tables.

Action Level: The concentration of a contaminant which, if exceeded, triggers treatment or other requirements that a water system must follow. The action level is not based on one sample; instead, it is based on many samples.

Alkalinity: A measure of the water's ability to resist changes in the pH level and a good indicator of overall water quality. Although there is no health risk from alkalinity, we monitor it to check our treatment processes.

E. coli (Escherichia coli): A type of coliform bacteria that is associated with human and animal fecal waste.

gpg (grains per gallon): A unit of water hardness. One grain per gallon is equal to 17.1 parts per million.

MCL (Maximum Contaminant Level): The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

MCLG (Maximum Contaminant Level Goal): The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

MRDL (Maximum Residual Disinfection Level): The highest level of disinfectant that is allowed in drinking water. The addition of a disinfectant is necessary for the control of microbial contaminants.

MRDLG (Maximum Residual Disinfection Level Goal): The level of a disinfectant in drinking water below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

Minimum Residual Disinfectant Level: The minimum level of residual disinfectant required at the entry point to the distribution system.

NTU (nephelometric turbidity units): Turbidity is measured with an instrument called a nephelometer. Measurements are given in nephelometric turbidity units.

Pathogens: Bacteria, virus, or other microorganisms that can cause disease.

pCi/L (Picocuries per liter): A measure of radioactivity.

ppm (parts per million): Denotes 1 part per 1,000,000 parts, which is equivalent to two-thirds of a gallon in an Olympic-sized swimming pool.

ppb (parts per billion): Denotes 1 part per 1,000,000,000 parts, which is equivalent to half a teaspoon in an Olympic-sized swimming pool.

µg/L (Microgram per liter): One microgram per liter is equal to one part per billion.

ppt (parts per trillion): Denotes 1 part per 1,000,000,000,000 parts, which is equivalent to one drop in 20 Olympic-sized swimming pools.

SMCL (Secondary Maximum Contaminant Level): Non-enforceable Federal water quality guidelines that are established for managing aesthetic and cosmetic conditions of water (e.g. taste, odor, color).

SOC (Synthetic Organic Chemical): Commercially made organic compounds, such as pesticides and herbicides.

Total Coliform: Coliforms are bacteria that are naturally present in the environment. Their presence in drinking water may indicate that other potentially harmful bacteria are also present.

THAAs (Total Haloacetic Acids): A group of chemicals known as disinfection byproducts. These form when a disinfectant reacts with naturally occurring organic and inorganic matter in the water.

TOC (Total Organic Carbon): A measure of the carbon content of organic matter. This measure is used to indicate the amount of organic material in the water that could potentially react with a disinfectant to form disinfection byproducts.

TTHMs (Total Trihalomethanes): A group of chemicals known as disinfection byproducts. These form when a disinfectant reacts with naturally occurring organic and inorganic matter in the water.

Treatment Technique: A required process intended to reduce the level of a contaminant in drinking water.

Turbidity: A measure of the clarity of water related to its particle content. Turbidity serves as an indicator for the effectiveness of the water treatment process. Low turbidity measurements, such as ours, show the significant removal of particles that are much smaller than can be seen by the naked eye.

VOC (Volatile Organic Chemicals): Organic chemicals that can be either man-made or naturally occurring. These include gases and volatile liquids.

WTP: Water Treatment Plant.

Top customer questions

How do I get my water tested?

We offer free lead and copper tests for residential customers who have concerns about their water.

➤ To request an appointment
Call (215) 685-6300

How hard is Philadelphia's water?

Philadelphia's water is considered moderately hard. Hardness depends on the treatment plant that serves your area of the city.

➤ See *A Closer Look at Hardness*
Page 9

Why does water have an earthy flavor sometimes?

Earthy or musty flavors occur naturally in drinking water and are among the most commonly reported worldwide. When certain algae-type organisms grow in our rivers, detectable levels of these odors can make their way into the treated drinking water.

These natural compounds have no known health effects at their natural levels, and are found in various foods.

We take steps to reduce their presence when detected.

Why do water utilities add fluoride to water?

It's a natural element that helps prevent cavities. Philadelphia's Health Department (and dentists) recommend we add fluoride to a level that helps protect children's teeth.

Can I replace a lead service line?

Yes. If you don't want to contact a plumber directly, apply for our Homeowners Emergency Loan Program (HELP).

A zero-interest loan can cover the cost of replacement.

➤ Learn more & apply
www.phila.gov/water/helploan

Also: PWD will replace lead service lines for free if they are discovered during planned work on water mains.

Why does my tap water smell like a pool sometimes?

The smell of chlorine means your water is safe and treated to remove harmful organisms. You can reduce the smell by keeping a pitcher of fresh water in the refrigerator. This also reduces the earthy odor sometimes produced by algae in the rivers during spring.

Working together

You can help protect Philadelphia's water quality.

Keep trash out of our waterways.
Protect our rivers and streams by properly disposing of garbage and recyclable materials.

Don't flush anything but toilet paper.
Even "flushable" wipes can lead to clogs and backups affecting our homes and streets.

Always properly recycle or dispose of household hazardous wastes.
Don't flush them down the toilet or down the sink, and don't pour them into storm drains.

EXECUTIVE SUMMARY

Goldman Sachs & Co. LLC (GS) retained ProGEA, Inc. (ProGEA) to conduct a Phase I Environmental Site Assessment (ESA) on the parking garage structure located at 400 Ranstead Street in Philadelphia, Philadelphia County, Pennsylvania 19106, and commonly known as the Bourse Garage (the "Site"). The objective of the assessment was to provide an independent, professional opinion regarding recognized environmental conditions (RECs), as defined by ASTM, associated with the Site. GS requested this Phase I ESA for the purpose of qualifying for the landowner liability protections to CERCLA liability.

This Phase I ESA was performed in accordance with ASTM E 1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process and the U.S. Environmental Protection Agency's (EPA's) All Appropriate Inquiry Rule (40 CFR 312.10). Any exceptions to, additions to, or deletions from these guidelines are described in Sections 1.2 and 1.3 of the report. In addition, this report was prepared in accordance with Goldman Sachs Phase I Environmental Site Assessment Scope of Work dated May 2017. Details of the work performed, sources of information, and findings are presented in the report. Limitations of the assessment are described in Sections 1.2 and 1.3.

Environmental professionals involved in the preparation and review of this Phase I ESA meet the qualifications for environmental professionals included in 40 CFR 312.10. This final report and all appropriate inquiries conducted in conjunction with this report were carried out in accordance with the requirements of the final rule.

The Site is currently developed with one 11-story parking garage with a basement level and street level retail tenants. The parking garage extends from the ground floor to the 11th story and reportedly contains 453 parking spaces. The street level tenants include Evergreen Deli, Bourse Cleaners (a drop off dry cleaning business), and a movie theater. The movie theater has a street level entrance that leads to five theater rooms which are located on the basement level. A loading dock is located on the north side of the building which contains two hydraulic trash compactors that are reportedly shared with an office building located across the street. At the time of the ProGEA inspection, two 55-gallon drums containing waste cooking oil were also located in the loading dock area. There are two elevators located on-Site, neither of which are hydraulically operated. According to the Philadelphia County Assessor, the Site is located on one rectangular-shaped tract of land encompassing approximately 0.35 acres with an approximate net rentable area of 200,365 square feet (SF). The building was constructed in 1988 and has not had any significant renovations since that time. The current use of the Site is not considered a REC.

Review of aerial photographs (1940 – 2017), historic topographic maps, (1891 – 2014), and Sanborn maps (1916 – 2006) indicate that the Site was developed from at least 1900 as office buildings with financial tenants until at least 1950 when the eastern portion of the Site was razed leaving a surface parking area. By 1962 all on-Site buildings had been razed and the Site is depicted as a surface parking lot until the present-day parking garage

DRAFT

structure was developed in 1988. The Site building has remained in use as a parking garage since that time with various street level retail tenants along South 4th Street.

Bourse Cleaners was listed at the Site address in the city directories and in the EDR radius report for the years 1996 through 2014. The radius report does not list the dry cleaning facility on any hazardous or regulated waste databases. Bourse Cleaners was present at the time of the Site inspection and was thoroughly inspected. At the time of the Site inspection, the cleaners was a drop off facility and, due to the size limitations, did not appear able to support dry cleaning equipment or associated operations. The rear storeroom was inspected with no signs of prior equipment or abandoned plumbing. According to the Site contact, no dry cleaning plants have ever been located on-Site and the tenant has always been a drop off business. The owner of the business was interviewed and also confirmed that no dry cleaning has ever taken place at this location. Based on these observations, it is assumed that the dry cleaner has always operated as a drop off facility. Therefore the dry cleaner listing is not considered a REC.

No evidence of aboveground storage tanks (ASTs) or underground storage tanks (USTs) were observed at the Site during the assessment. In addition, no features were observed at the Site that would have required ASTs or USTs to be present, and there are no ASTs or USTs registered with the Pennsylvania Department of Environmental Protection (PADEP).

The Site was inspected for the presence of sensitive ecological areas by noting environmental indicators (e.g., wetlands vegetation, floodplains) located on or immediately adjoining the Site. Evidence of wetlands was not depicted on the U.S. Fish and Wildlife Service, National Wetlands Inventory Map, or observed during the Site inspection.

The Federal Emergency Management Agency (FEMA) flood Insurance rate map (FIRM) for Philadelphia County, number 4507570184H, dated November 18, 2015, was reviewed for the subject property. The Site is located within Zone X. Zone X includes areas determined to be outside of the 0.2% annual chance floodplain.

Philadelphia County is located in the US Environmental Protection Agency (USEPA) radon Zone 3. USEPA radon Zone 3 has predicted average screening concentration levels less than 2 pCi/L. The EPA recommended action level is 4 pCi/L. Radon is not expected to represent an environmental concern to guests or workers in the building.

A review of applicable records for information regarding threatened/endangered species was made on the USFWS Online Database System website http://www.eso.fws.gov/. Several threatened or endangered species were listed for Philadelphia County. Given the Site has been developed in its current state since 1988; the presence of these species in the area does not represent a concern to the Site.

The Site was inspected for visible evidence of suspect microbial growth (SMG) and moisture intrusion. No dismantling of building systems, building components, or physical testing was performed. Visible SMG was not identified during the Site inspection.

DRAFT

A visual inspection for friable and damaged non-friable suspect asbestos containing materials (ACMs) was conducted. No friable or damaged materials were visually identified during the Site inspection. ProGEA reviewed a previous asbestos containing materials (ACMs) survey performed by Langan in 2015. The survey included obtaining 17 representative samples of suspect ACMs. Results of the survey indicated ACM was not detected in any of the samples analyzed. ProGEA recommends managing all suspect ACMs under the Asbestos Operations and Maintenance Plan that has been provided under separate cover. In addition, an asbestos survey and subsequent abatement should be undertaken prior to any renovation or demolition activities performed at the Site.

As part of ProGEA's evaluation of the potential for chemicals of concern (COCs) to be present at the Site or migrate onto the subject property, ProGEA conducted a limited Vapor Encroachment Screening (VES). The goal of the VES is to identify potential vapor impacts in the subsurface or within Site buildings caused by the release of COCs into the soil or groundwater at the Site or in near proximity to the Site. As such, ProGEA reviewed all local, state, and federal database information as well as historical maps and aerial photographs. No RECs were identified in association with the Site and/or surrounding facilities. During the Site visit, ProGEA did not observe potential contaminant sources that would contribute or cause COCs to be present at the Site. Additionally, ProGEA did not observe any surrounding facilities that would have potentially caused COCs to migrate onto the subject property. Therefore, based on ProGEA's professional opinion and due to the regulatory status of the Site and surrounding facilities, distance from the Site, or gradient position relative to the Site, the potential for a Vapor Encroachment Condition (VEC) to be present at the Site is minimal and is not considered an environmental concern.

Any data gaps identified herein are not considered to have significantly affected the ability to identify recognized environmental conditions (RECs) at this Site.

Based on the findings of this assessment, there are no obvious indicators that point to the presence or likely presence of contamination at the Site. **This assessment has revealed no evidence of recognized environmental conditions (RECs), as defined by ASTM, in connection with the subject property.**

The following environmental condition, which is not considered to be a recognized environmental condition, as defined by ASTM, was revealed during this assessment:

- ProGEA recommends managing all suspect ACMs under the Asbestos Operations and Maintenance Plan that has been provided under separate cover. In addition, an asbestos survey and subsequent abatement should be undertaken prior to any renovation or demolition activities performed at the Site.

DRAFT

1.0 INTRODUCTION

Goldman Sachs & Co. LLC (GS) retained ProGEA, Inc. (ProGEA) to conduct a Phase I Environmental Site Assessment (ESA) on the parking garage structure located at 400 Ranstead Street in Philadelphia, Philadelphia County, Pennsylvania 19106, and commonly known as the Bourse Garage (the "Site"). GS requested this assessment in association with a real estate transaction.

1.1 PURPOSE

The purpose of this environmental site assessment is to qualify the user for the landowner liability protections to CERCLA liability, and to evaluate *business environmental risk*, defined as a risk which can have an impact on the business associated with the current or planned use of a parcel of commercial real estate.

Good commercial and customary practice for conducting environmental site assessments has the goal of providing an independent, professional opinion regarding *recognized environmental conditions*, as defined by ASTM, associated with the subject property. The term *recognized environmental conditions* (RECs) is defined as the presence or likely presence of any *hazardous substances* or *petroleum products* in, on, or at a *property*: (*1*) due to release to the environment; (*2*) under conditions indicative of a *release* to the *environment*; or (*3*) under conditions that pose a *material threat* of a future *release* to the *environment*. The term is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not RECs.

DRAFT

1.2 METHODOLOGY AND EXCEPTIONS

The assessment was prepared and performed by a qualified environmental professional and all appropriate inquiries were prepared and carried out in accordance with ASTM E 1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. Any exceptions to, additions to, or deletions from these guidelines are described in the report. Details of the work performed, sources of information, and findings are presented in the report.

The assessment included the following components:

- A site walkthrough inspection of the Site building and surrounding areas for visual evidence of potential environmental concerns including existing or potential soil and groundwater contamination, as evidenced by soil or pavement staining, discoloration, or stressed vegetation; indications of waste dumping or burial, pits, ponds, or lagoons; containers of hazardous substances or petroleum products; electrical and hydraulic equipment that may contain polychlorinated biphenyls (PCBs), such as electrical transformers and hydraulic hoists; and underground and aboveground storage tanks.

- An investigation of historical use of the Site by examining available aerial photographs and other readily available historical information such as fire insurance maps and historical topographic maps for evidence of prior land use that could have led to RECs.
- A visual assessment of potential asbestos containing materials. No sampling was conducted as part of the asbestos assessment.
- A visual assessment of SMG in common areas and tenant spaces. No sampling was conducted as part of the visual SMG assessment.
- A review of information available on general geology and topography of the subject property, local groundwater conditions, sources of water, power, and sewer, and proximity to ecologically sensitive receptors, such as streams, that might be impacted by recognized environmental conditions and environmental issues.
- A review of environmental records available from the property owner or site contact including regulatory agency reports, permits, registrations, and consultants' reports for evidence of recognized environmental conditions.
- A Site property line visual assessment of adjacent properties for evidence of potential offsite environmental conditions that may affect the subject property.
- A review of a commercial database summary of federal and state regulatory agency records pertinent to the subject property and offsite facilities located within ASTM-specified search distances from the subject property.
- Interviews with key site personnel, as available, regarding current and previous uses of the property, particularly activities involving hazardous substances and petroleum products.
- Evaluation of information gathered and development of this report.

This assessment did not include sampling or analysis of groundwater, surface water, soil, air, or building materials.

Mr. Charles Summers, Principal, from ProGEA's Dallas, Texas, office conducted the site walkthrough portion of the assessment on January 8, 2019. Resumes for environmental professionals involved in this assessment are included in Appendix A. Photographs taken at the time of the assessment are included in the *Photographs* section.

1.3 LIMITING CONDITIONS OF ASSESSMENT

Information for the assessment was obtained from sources listed in Appendix B. This information, to the extent it was relied on to form our opinion, is assumed to be correct and complete. ProGEA is not responsible for the quality or content of information from these sources. Any data gaps identified herein are not considered to have significantly affected the ability to identify RECs at this Site.

The information and opinions rendered in this report are exclusively for use by Goldman Sachs & Co. LLC. ProGEA will not distribute or publish this report without consent except as required by law or court order. The information and opinions expressed in this report

DRAFT

are given in response to a limited assignment and should be considered and implemented only in light of that assignment. The services provided by ProGEA in completing this project were consistent with normal standards of the profession. No other warranty, expressed or implied, is made.

2.0 SUBJECT PROPERTY DESCRIPTION

2.1 LOCATION AND LEGAL DESCRIPTION

The Site is located at 400 Ranstead in Philadelphia, Philadelphia County, Pennsylvania 19106. According to the Philadelphia County Tax Records website, the Site is located on one rectangular-shaped tract of land encompassing approximately 0.35 acres. An additional address noted for the Site includes 44 South 4th Street.

The Site legal descriptions are as follows:

Parcel Identification Number: 883409600

Abbreviated Legal Description: GAR W/COMM AREA MASONRY

2.2 CURRENT USE OF SUBJECT PROPERTY

The Site is currently developed with one 11-story parking garage with a basement level and street level retail tenants. The parking garage extends from the ground floor to the 11th story and reportedly contains 453 parking spaces. The street level tenants include Evergreen Deli, Bourse Cleaners (a drop off dry cleaning business), and a movie theater. The movie theater has a street level entrance that leads to five theater rooms which are located on the basement level. A loading dock is located on the north side of the building which contains two hydraulic trash compactors that are reportedly shared with an office building located across the street. At the time of the ProGEA inspection, two 55-gallon drums containing waste cooking oil were also located in the loading dock area. There are two elevators located on-Site, neither of which are hydraulically operated. According to the Philadelphia County Assessor, the Site building has an approximate net rentable area of 200,365 SF. The building was constructed in 1988 and has not had any significant renovations since that time. The current use of the Site is not considered a REC.

ProGEA conducted walkthroughs and interviews at representative locations on the Site. A complete listing of walkthrough observations and interviews is beyond the scope of this report; therefore, only potentially environmentally significant tenants/activities/ observations are discussed in this report.

Site utilities are provided by the following companies:

Water & Sewer: Philadelphia Water and Sewer

Electricity: PECO

Natural Gas: Philadelphia Gas Works - Constellation

DRAFT

2.3 CURRENT USES OF ADJOINING/NEARBY PROPERTIES

In general, the Site is surrounded by commercial retail businesses and office buildings. The Site is bordered to the north by Ranstead Street with the Bourse office building, Ludlow Street, and an office building located beyond. The Renaissance Philadelphia Downtown Hotel borders the Site to the south with Chestnut Street, the Thomas Jefferson Garden and Second Bank of the United States located beyond. The Site is bordered to the east by South 4th Street with Fox 29 Philadelphia, Benjamin Franklin Museum, commercial buildings, Market Street, Wilson Park and the Delaware River located beyond. The Site is bordered to the west by hotel and restaurant buildings with South Independence Mall East, Independence National Historical Park, the Liberty Bell and commercial buildings located beyond. No gas stations, dry cleaners, or manufacturing facilities are currently located on surrounding properties other than drop off dry cleaning businesses.

2.4 PHYSICAL SETTING

The subject property is located in the Atlantic Coastal Plain Province of the Physiographic Provinces of Pennsylvania. The subject property location is shown on the 2013/2014 USGS Topographic Map of the Philadelphia, Pennsylvania Quadrangle. The subject property and land in the immediate vicinity are generally flat with a gentle slope to the east towards the Delaware River. Elevation at and around the subject property is approximately 25 feet above mean sea level (msl) (USGS, 2013).

According to the U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) website in conjunction with the EDR Radius search, the following soil type was identified as being predominately present at the Site: Urban Land. Typically, the Urban soils complex consists of areas that are up to 25 percent improvements and structures. Most of the rainfall in those areas runs off and reaches major drainage ways rapidly. It also includes small areas of soils that have been covered by fill material. The soils that make up Urban soils have been altered and obscured to the extent that they cannot be classified.

According to the Bedrock geologic map of a portion of the Philadelphia quadrangle, the Site is underlain by Coastal Plain Sediments. Coastal Plain Sediments are described as unconsolidated to poorly consolidated sand and gravel underlain by schist, gneiss, and other metamorphic rocks (Pennsylvania Geological Survey, 2008).

The subject property appears to be underlain by the Crystalline-rock aquifers of the Piedmont and Blue Ridge aquifers. The main types of crystalline rocks are coarse-grained gneisses and schists of various mineral composition; however, fine-grained rocks, such as phyllite and metamorphosed volcanic rocks, are common in places (USGS, 1995).

The regional shallow groundwater flow direction is inferred to be east. However, topography is not always a reliable basis for predicting groundwater flow direction. The local gradient under the subject property may be influenced naturally by zones of higher or lower permeability, or artificially by nearby pumping or recharge, and may deviate from the regional trend. The depth to groundwater is expected to be between 25 and 50 feet below ground surface.

DRAFT

3.0 HISTORICAL REVIEW

3.1 SUMMARY OF HISTORICAL REVIEW

The historical research presented in this section has established the use of the Site since 1891 (earliest topographic map).

Review of aerial photographs (1940 – 2017), historic topographic maps, (1891 – 2014), and Sanborn maps (1916 – 2006) indicate that the Site was developed from at least 1900 as office buildings with financial tenants until at least 1950 when the eastern portion of the Site was razed leaving a surface parking area. By 1962 all on-Site buildings had been razed and the Site is depicted as a surface parking lot until the present-day parking garage structure was developed in 1988. The Site building has remained in use as a parking garage since that time with various street level retail tenants along South 4th Street.

Bourse Cleaners was listed at the Site address in the city directories and in the EDR radius report for the years 1996 through 2014. The radius report does not list the dry cleaning facility on any hazardous or regulated waste databases. Bourse Cleaners was present at the time of the Site inspection and was thoroughly inspected. At the time of the Site inspection, the cleaners was a drop off facility and, due to the size limitations, did not appear able to support dry cleaning equipment or associated operations. The rear storeroom was inspected with no signs of prior equipment or abandoned plumbing. According to the Site contact, no dry cleaning plants have ever been located on-Site and the tenant has always been a drop off business. The owner of the business was interviewed and also confirmed that no dry cleaning has ever taken place at this location. Based on these observations, it is assumed that the dry cleaner has always operated as a drop off facility. Therefore the dry cleaner listing is not considered a REC.

A chronological summary of the historic use of the site based on information gathered from various sources is presented below. Details regarding the sources of this information are presented in the following sections.

3.2 AERIAL PHOTOGRAPHS

Aerial photographs, including the subject and adjoining properties, were obtained from EDR. Aerial photographs from 1940, 1945, 1950, 1962, 1965, 1971, 1975, 1981, 1988, 1999, 2006, 2010, 2013 and 2017 were reviewed (see Appendix C). The findings of the aerial photographs reviewed are presented in Table 1 below:

DRAFT

Table 1
Aerial Photograph Descriptions

Date of Aerial	Collection / Scale	Description	Level of Environmental Concern
1940	EDR/ 1"=500'	The Site is located on the southwest corner of Ranstead and South 4th Street and is occupied by adjoining commercial buildings that also extend to the parcel of land south of the Site. Additional commercial buildings adjoin the Site buildings to the west. Remaining surrounding properties appear developed for urban commercial or residential use.	No Concern
1945	Aerial Viewpoint/ 1"=500'	The Site and surrounding properties appear similar to the 1940 aerial photograph.	No Concern
1950	USGS/ 1"=500'	The eastern half of the Site appears to have been converted to a surface parking lot. I-95 is apparent to the east of the Site. Remaining surrounding properties appear similar to the 1945 aerial photograph.	No Concern
1962	Aerial Viewpoint/ 1"=500'	The entirety of the Site now appears to be a surface parking lot. Additional park land is apparent south and southeast of the Site. Remaining surrounding properties appear similar to the 1950 aerial photograph.	No Concern
1965	EDR/ 1"=500'	The Site appears similar to the 1962 aerial photograph. Independence National Historical Park and Franklin Park are apparent to the north-northwest of the Site. I-676 is apparent north of the Site. Remaining surrounding properties appear similar to the 1962 aerial photograph.	No Concern
1971	USDA/ 1"=500'	The Site and surrounding properties appear similar to the 1965 aerial photograph.	No Concern
1975	EDR/ 1"=500'	The Site and surrounding properties appear similar to the 1971 aerial photograph.	No Concern
1981	USDA/ 1"=500'	The Site and surrounding properties appear similar to the 1975 aerial photograph.	No Concern
1988	NAPP / 1"=500'	The Site and surrounding properties appear similar to the 1981 aerial photograph.	No Concern
1999	USGS/DOQQ/ 1"=500'	The present-day parking garage structure is now visible on the Site. The parcel adjoining the south of the Site is now developed as a hotel building. Additional surrounding properties appear similar to the 1988 aerial photograph.	No Concern

DRAFT

Table 1 Aerial Photograph Descriptions			
Date of Aerial	**Collection / Scale**	**Description**	**Level of Environmental Concern**
2006	USDA/NAIP/ 1"=500'	The Site and surrounding properties appear similar to the 1999 aerial photograph.	No Concern
2010	USDA/NAIP/ 1"=500'	The Site and surrounding properties appear similar to the 2006 aerial photograph.	No Concern
2013	USDA/NAIP/ 1"=500'	The Site and surrounding properties appear similar to the 2010 aerial photograph.	No Concern
2017	USDA/NAIP/ 1"=500'	The Site and surrounding properties appear similar to the 2013 aerial photograph.	No Concern

No readily apparent evidence of recognized environmental conditions at the Site or adjoining properties was noted on the aerial photographs reviewed.

3.3 USGS TOPOGRAPHIC MAPS

Historic topographic maps for the subject property and vicinity were obtained from EDR. Topographic maps for the years 1891, 1894, 1896, 1898, 1901, 1906, 1920, 1943, 1949, 1967, 1973, 1984/1985, 1994, 1995 and 2013/2014 were provided (Appendix D). The findings of the topographic maps reviewed are presented in Table 2 below:

DRAFT

Table 2 USGS Topographic Map Descriptions			
Date of Topographic Map	**Quadrangle/ Scale/ Series**	**Description**	**Level of Environmental Concern**
1891	Philadelphia, PA/ 1:62,500/ 15-minute	The Site is located in an urban, developed area of Philadelphia. The Delaware River is depicted to the east of the site. Railroads run east-west both north and south of the Site, and a railroad runs north-south to the east of the Site.	No Concern
1894	Philadelphia, PA/ 1:62,500/ 15-minute	The Site and surrounding properties appear similar to the 1891 topographic map.	No Concern
1896	Philadelphia, PA/ 1:62,500/ 15-minute	The Site and surrounding properties appear similar to the 1894 topographic map.	No Concern
1898	Philadelphia, PA/ 1:62,500/ 15-minute	The Site and surrounding properties appear similar to the 1896 topographic map.	No Concern

Table 2
USGS Topographic Map Descriptions

Date of Topographic Map	Quadrangle/ Scale/ Series	Description	Level of Environmental Concern
1901	Philadelphia, PA/ 1:125,000/ 30-minute	The Site and surrounding properties appear similar to the 1898 topographic map.	No Concern
1906	Philadelphia, PA/ 1:62,500/ 15-minute	The Site and surrounding properties appear similar to the 1901 topographic map.	No Concern
1920	Philadelphia, PA/ 1:62,500/ 15-minute	The Site and surrounding properties appear similar to the 1906 topographic map.	No Concern
1943	Philadelphia, PA/ 1:50,000/ 15-minute	The Site appears similar to the 1920 topographic map. An unnamed bridge (presently known as the Ben Franklin Bridge) appears northeast of the Site, spanning the Delaware River. Additional surrounding properties appear similar to the 1920 topographic map.	No Concern
1949	Philadelphia, PA/ 1:24,000/ 7.5-mintue	The Site and surrounding properties appear similar to the 1943 topographic map.	No Concern
1967	Philadelphia, PA/ 1:24,000/ 7.5-mintue	The Site appears similar to the 1949 topographic map and is depicted as built up. Development of Independence Mall State Park appears immediately to the west of the Site. Additional surrounding properties appear similar to the 1949 topographic map.	No Concern
1973	Philadelphia, PA/ 1:24,000/ 7.5-mintue	The Site appears similar to the 1967 topographic map. Development of I-67 appears to the northeast and southeast of the Site. Development of Independence National Historical Park appears to the south of the Site. Additional surrounding properties appear similar to the 1967 topographic map.	No Concern
1984/1985	Philadelphia, PA/ 1:24,000/ 7.5-mintue	The Site appears similar to the 1973 topographic map. Development of I-67 to the east of the Site appears complete. Additional surrounding properties appear similar to the 1973 topographic map.	No Concern

DRAFT

Table 2 USGS Topographic Map Descriptions			
Date of Topographic Map	**Quadrangle/ Scale/ Series**	**Description**	**Level of Environmental Concern**
1994	Philadelphia, PA/ 1:24,000/ 7.5-mintue	The Site appears similar to the 1984/1985 topographic map. Development of I-676 appears north of the Site. Additional surrounding properties appear similar to the 1984/1985 topographic map.	No Concern
1995	Philadelphia, PA/ 1:24,000/ 7.5-mintue	The Site and surrounding properties appear similar to the 1994 topographic map.	No Concern
2013/2014	Philadelphia, PA/ 1:24,000/ 7.5-mintue	The Site and surrounding properties appear similar to the 1995 topographic map with the exception that no buildings are depicted on the map.	No Concern

No readily apparent evidence of recognized environmental conditions at the Site or adjoining properties was noted on the topographic maps reviewed.

3.4 FIRE INSURANCE MAPS

Fire insurance maps or Sanborn maps covering the Site and adjoining properties were requested from EDR. Fire insurance maps were available for the subject and adjoining properties for the years 1916, 1950, 1976, 1980, 1989, 2002, 2004 and 2006 were provided (Appendix E). The findings of the Sanborn maps reviewed are presented in Table 3 below:

Table 3 Sanborn Map Descriptions		
Date of Sanborn Map	**Description**	**Level of Environmental Concern**
1916	The Site is located on the southwest corner of Ranstead and South 4th Street. The Site is occupied by office buildings that cover the Site and adjacent parcel to the south. The maps indicate the structures were built in 1900 and 1905 and are primarily occupied by banks or financial tenants. The building across Ranstead to the north is the Bourse Building and is used as a commodities exchange. The on-Site buildings also extend south of the Site with Chestnut Street located beyond. An office building is located across South 4th Street to the east. Additional bank buildings are located west of the Site.	No Concern

DRAFT

Table 3 Sanborn Map Descriptions		
Date of Sanborn Map	**Description**	**Level of Environmental Concern**
1950	The Site and surrounding properties appear to have similar office and financial uses as the 1916 Sanborn map with the exception that the building along the eastern portion of the Site has been demolished and there is no structure depicted in its place.	No Concern
1976	The Site is depicted as a surface parking lot with no structure. Surrounding properties and their uses appear similar to the 1950 Sanborn map.	No Concern
1980	The Site and surrounding properties appear similar to the 1976 Sanborn map.	No Concern
1989	The Site and surrounding properties appear similar to the 1980 Sanborn map.	No Concern
2002	The present-day Site building is depicted on-Site and is labeled as a 12-deck parking garage and movie theater. An Omni hotel is located on the south adjoining parcel. Other surrounding properties remain similar to the 1989 Sanborn map.	No Concern
2004	The Site and surrounding properties appear similar to the 2002 Sanborn map.	No Concern
2006	The Site and surrounding properties appear similar to the 2004 Sanborn map.	No Concern

No readily apparent evidence of recognized environmental conditions at the Site or adjoining properties was noted on the Sanborn maps reviewed.

3.5 CITY DIRECTORIES

City Directories were reviewed for the Site and surrounding properties for the years 1920 through 2014. The Site was listed under the name of Bourse Garage in the years 1993 through 2015. In addition, various retail tenants including the movie theater and Bourse Cleaners have been listed for the years 2006, 2010, and 2014 at the main Site address and the address of 44 South 4th Street.

Bourse Cleaners was listed at the Site address in the city directories and in the EDR radius report for the years 1996 through 2014. The radius report does not list the dry cleaning facility on any hazardous or regulated waste databases. Bourse Cleaners was present at the time of the Site inspection and was thoroughly inspected. At the time of the Site inspection, the cleaners was a drop off facility and, due to the size limitations, did not appear able to support dry cleaning equipment or associated operations. The rear storeroom was inspected with no signs of prior equipment or abandoned plumbing. According to the Site contact, no dry cleaning plants have ever been located on-Site and the tenant has always been a drop off business. The owner of the business was interviewed and also confirmed that no dry cleaning has ever taken place at this location.

DRAFT

Based on these observations, it is assumed that the dry cleaner has always operated as a drop off facility. Therefore the dry cleaner listing is not considered a REC.

None of the offsite listings represent a REC to the Site. A copy of the City Directory listings is included in Appendix G.

3.6 PRIOR OWNERSHIP

In accordance with the ASTM 1527-13 *User Questionnaire*, the *users* must provide information pertaining to any environmental cleanup liens that are filed or recorded against the Site and/or any activity and land use limitations that are in place on the Site (40 CFR §312.25). A title search was not included in the scope of work for this assessment.

3.6.1 Building, Planning, and/or Zoning Departments

Freedom of Information Act (FOIA) requests were filed with Division of Housing and Community Development, Department of Records and with that Department of planning and Development. The FOIA requests cover the building, planning, and zoning departments as well as applicable personnel responsible for health and environmental services. The agencies contacted have not yet responded to information requests submitted by ProGEA. If a response is received and the information provided indicates a potential REC, a revision to this report will be provided.

3.6.2 Fire Department

A general FOIA request was filed with the Philadelphia Fire Department regarding available fire department records pertaining to the Site address. The Philadelphia Fire Department has not yet responded to information requests submitted by ProGEA. If a response is received and the information provided indicates a potential REC, a revision to this report will be provided.

3.6.3 Departments of Health/Environmental Services

A general FOIA request was filed with the PADEP. The request covers the environmental and health department as well as other environmental departments. The PADEP has not yet responded to information requests submitted by ProGEA. If a response is received and the information provided indicates a potential REC, a revision to this report will be provided. The Site was not listed on the PADEP eFACTS database or eMapPA database.

3.6.4 Other Agency Records

A review of applicable records for information regarding threatened/endangered species was made on the USFWS Online Database System website http://www.eso.fws.gov/. Several threatened or endangered species were listed for Philadelphia County. Given the Site has been developed in its current state since 1988; the presence of these species in the area does not represent a concern to the Site.

ProGEA conducted a limited historical properties/archeological resources review for the Site. No obvious archeological resources or structures of historical significance were observed at the Site. The Site was not listed on the National Register of Historic Places

DRAFT

and was not identified in research conducted through the Natural Resource Conservation Service website.

3.7 PREVIOUS ENVIRONMENTAL REPORTS

A Phase I ESA Final Draft report prepared by Langan and dated November 11, 2015, was provided for review. The Phase I ESA did not identify and RECs, CRECs, or HRECs. Two environmental business risks were listed in the report which included; potential ACMs in the building and potential PCB-containing equipment in the building. No recommendations for further action were made.

ProGEA reviewed a previous ACM survey performed by Langan in 2015. The survey included obtaining 17 representative samples of suspect ACMs. Results of the survey indicated ACM was not detected in any of the samples analyzed. No additional recommendations were made by Langan.

4.0 STANDARD ENVIRONMENTAL RECORD SOURCES, FEDERAL, STATE, AND LOCAL

Available government database information prepared by Environmental Database Resources, Inc.© (EDR) was reviewed to evaluate both the Site and any listed sites within ASTM-recommended search distances which could potentially impact the Site. The full list of federal, state, and local databases reviewed along with all of the on-Site and offsite listings are included in Appendix F. Only the pertinent listings are summarized below.

The Site is listed on the EDR Historic Cleaners Database. Bourse Cleaners was listed at the Site address for the years 1996 through 2014. The radius report does not list the dry cleaning facility on any hazardous or regulated waste databases. Bourse Cleaners was present at the time of the Site inspection and was thoroughly inspected. At the time of the Site inspection, the cleaners was a drop off facility and, due to the size limitations, did not appear able to support dry cleaning equipment or associated operations. The rear storeroom was inspected with no signs of prior equipment or abandoned plumbing. According to the Site contact, no dry cleaning plants have ever been located on-Site and the tenant has always been a drop off business. The owner of the business was interviewed and also confirmed that no dry cleaning has ever taken place at this location. The Bourse Cleaners listing is not considered a REC.

Philadelphia Park Service Second Bank INHP is listed at 420 Chestnut Street which is approximately 100 feet south of the Site (crossgradient). The offsite facility is listed on the PA Manifest database for removal of hazardous waste in 2007. There were no violations listed for the offsite facility. The Philadelphia Park Service Second Bank INHP is not considered a REC.

Volkens Cleaners (Volkens Cleaners) located at 412 Market Street, approximately 200 feet north of the Site (crossgradient), was identified in the EDR Historic Cleaners database. Volkens 1 Hour Cleaners occupied this address from 1986 to 1991. The radius report does not list the dry cleaning facility on any hazardous or regulated waste databases. The listing was not provided in the city directories researched; however, the directories did not include listings from 1982 until 1993. According to the Site contact, no dry cleaning

DRAFT

plants have ever been located at the 412 Market Street address and the current building infrastructure at that address does not appear to be able to support a dry cleaning business. Based on these observations and additional information, it is assumed that the dry cleaner was a drop off facility. In addition, the entire footprint of the offsite building is underlain by a subgrade parking structure. Based on these mitigating circumstances, the dry cleaner listing is not considered a REC.

Wells Fargo (Wells Fargo) located at 101 North Independence Mall East, approximately 300 feet north of the Site (crossgradient), was identified in the Philadelphia AST (PA AST) database. Review of the database listing indicated that Well Fargo has one 6,000-gallon AST containing diesel fuel. The AST was installed on January 27, 2016 and has a "currently in use" status. According to the database listing, the AST has a registration expiration date of February 4, 2019. No notices of violation, release or spills have been issued in relation to the AST. Based on regulatory status, Wells Fargo is not considered a REC to the Site.

Blue Bell Gulf (Blue Bell) located at 399 Market Street, approximately 340 feet northeast of the Site (downgradient), was identified in the EDR Historic Auto Station database. According to the database listing, Blue Bell, identified as a Gasoline Service Station, occupied this address from 2004 to 2008. Review of Sanborn Maps indicated that this offsite address has been occupied by an office building from at least 1980. The EDR Historic Auto Station database listing is most likely related to an office tenant. Based on regulatory status, Blue Bell is not considered a REC to the Site.

Colonial Pennsylvania Life Insurance Co. (Colonial Penn) located at 399 Market Street, approximately 340 feet northeast of the Site (downgradient), was identified in the Philadelphia Archive UST database. According to the PADEP Bureau of Environmental Cleanup and Brownfields Inactive Storage Tanks database, the 10,012-gallon UST, containing heating oil, has an "exempt from state law" status. No notices of violation, release or spills have been issued in relation to the UST. Based on regulatory status, Colonial Penn is not considered a REC to the Site.

Other facilities identified in the environmental database are not RECs or environmental concerns for the Site due to regulatory status, distance from the Site, or gradient position relative to the Site. The full list of federal, state, and local databases reviewed along with all of the on-Site and offsite listings are included in Appendix F.

Unmappable sites are sites that cannot be plotted with confidence, but can be located by zip code or city name. In general, a site cannot be geocoded due to inaccurate or missing information in the environmental database record provided by its applicable agency. Cross referencing addresses and site names, as well as a visual reconnaissance of surrounding properties, has been completed for the unmappable facility sites in the database report. The subject and adjacent properties were not identified on the unmappable sites listing in the environmental database report. No unmappable sites were identified with the potential to impact the Site.

DRAFT

5.0 SITE RECONNAISSANCE AND INTERVIEWS

5.1 METHODOLOGY AND LIMITATIONS

Mr. Charles Summers, Principal, from ProGEA's Dallas, Texas, office conducted the site walkthrough portion of the assessment on January 8, 2019. The Site visit consisted of a walk over the perimeter and central areas of the Site and a drive along streets surrounding the Site perimeter.

5.2 GENERAL OBSERVATIONS

The Site is currently developed with one 11-story parking garage with a basement level and street level retail tenants. The parking garage extends from the ground floor to the 11th story and reportedly contains 453 parking spaces. The street level tenants include Evergreen Deli, Bourse Cleaners (a drop off dry cleaning business), and a movie theater. The movie theater has a street level entrance that leads to five theater rooms which are located on the basement level. A loading dock is located on the north side of the building which contains two hydraulic trash compactors that are reportedly shared with an office building located across the street. At the time of the ProGEA inspection, two 55-gallon drums containing waste cooking oil were also located in the loading dock area. There are two elevators located on-Site, neither of which are hydraulically operated. According to the Philadelphia County Assessor, the Site is located on one rectangular-shaped tract of land encompassing approximately 0.35 acres with an approximate net rentable area of 200,365 SF. The building was constructed in 1988 and has not had any significant renovations since that time. The current use of the Site is not considered a REC.

No evidence of ASTs or USTs were observed at the Site during the assessment. In addition, no features were observed at the Site that would have required ASTs or USTs to be present, and there are no ASTs or USTs registered with the PADEP.

No hazardous waste is currently generated on-Site. The Site contains various cleaning and maintenance products and materials. All materials were properly stored with no signs of leaks.

Table 4 summarizes the Site inspection and findings. All items that are, or are known to have been present at the subject property are noted in the table. The table also notes items that may present concerns to the subject property. Additional information about items noted can be found in the referenced section of this report.

Table 4
Site Inspection Findings Summary

Onsite Environmental Features	Currently/ Historically Present (Y/N)	Possible Environmental Condition (Y/N)	Report Section
Hazardous Substances or Petroleum Products	N	N	
Underground Storage Tanks	N	N

5.3 INTERVIEWS

ProGEA interviewed Mr. Mike Cassidy, with the property management company, and the building engineer, Greg. These individuals were interviewed regarding current and past activities at the Site and provided additional detail on the history and operations at the Site over the past 20 years. Neither individual was aware of any environmental issues related to the Site. Both individuals stated the Site has never operated USTs and none of the materials stored on-Site have resulted in spills. Mr. Cassidy indicated asbestos surveys are performed, as needed, as part of tenant improvements.

GS, the prospective user of this report, provided ProGEA with answers to the questions contained in the ASTM E 1527-13 *User Questionnaire*. This data was utilized in the preparation of this report. The GS *User Questionnaire* is contained in Appendix H. GS had no knowledge of any potential RECs associated with the Site.

5.4 HAZARDOUS MATERIAL AND WASTE

The Site was assessed for signs of storage, use, or disposal of hazardous materials. The assessment consisted of noting evidence (e.g., drums, unusual vegetation patterns, staining) indicating that hazardous materials are currently or were previously located on the Site.

No significant volumes of hazardous waste are currently generated on-Site. The Site contains various cleaning and maintenance products. All materials were properly stored with no signs of leaks. At the time of the ProGEA inspection, two 55-gallon drums containing waste cooking oil were also located in the loading dock area. The drums were properly stored with no signs of leakage.

The mechanical rooms include typical plumbing and HVAC services. Floor drains were located in bathrooms and in the basement level and a trench drain was located at the entrance to the parking garage. According to the Site contacts there are no oil water separators connected to any of the drains.

5.5 STORAGE TANKS

5.5.1 Underground Storage Tanks

The subject property was inspected for evidence of USTs (e.g., vent piping, dispensing equipment, and pavement variations). No evidence of USTs was observed at the Site during the assessment. In addition, no features were observed at the Site that would have required USTs to be present, and there are no USTs registered with the PADEP.

5.5.2 Aboveground Storage Tanks

The subject property was inspected for evidence of ASTs. No evidence of ASTs was observed at the Site during the assessment and there are no ASTs registered with the PADEP for the Site address.

5.6 INDICATIONS OF SOLID WASTE DISPOSAL

Currently, non-hazardous solid waste is generated on-Site and serviced by a private contractor. No areas of excessive dumping or trash were observed at the Site.

5.7 INDICATIONS OF POLYCHLORINATED BIPHENYLS (PCBS)

The subject property was inspected for the presence of liquid-cooled electrical units (transformers, light ballasts, and capacitors), and major sources of hydraulic fluid (elevators and lifts). Such units are notable because they may be potential PCB sources.

The Site contains a primary electrical switch room with electrical transformers located in a locked room in the basement. No signs of leakage or staining were observed around the transformers and all transformers were located on a concrete slab floor.

DRAFT

Two hydraulic compactors are located in the loading dock area as well as a hydraulic dock leveler. No signs of leakage were observed around the hydraulic equipment. According to the Site contact, the two elevators are not hydraulically operated.

No other electrical or hydraulic equipment that would be suspect of containing PCBs was observed on the Site at the time of the site visit.

5.8 WELLS

According to EDR, there are no records of active, inactive, destroyed water wells, or dry wells at the Site. Additionally, during the site visit no wells or monitoring wells were observed. Two sump pumps are located in the sub-basement level. According to the Site contacts, the pumps are not used for groundwater dewatering purposes.

5.9 ASBESTOS-CONTAINING MATERIALS

A visual inspection for friable and damaged non-friable suspect ACMs was conducted. No friable or damaged materials were visually identified during the Site inspection. ProGEA reviewed a previous asbestos containing materials (ACMs) survey performed by Langan in 2015. The survey included obtaining 17 representative samples of suspect ACMs. Results of the survey indicated ACM was not detected in any of the samples analyzed. ProGEA recommends managing all suspect ACMs under the Asbestos Operations and Maintenance Plan that has been provided under separate cover. In addition, an asbestos survey and subsequent abatement should be undertaken prior to any renovation or demolition activities performed at the Site.

5.10 RADON

Radon is a naturally occurring radioactive gas formed by the decay of uranium in bedrock and soil. The potential adverse health effects associated with radon gas depend on various factors, such as the concentration of the gas and duration of exposure. The concentration of radon gas in a building depends on subsurface soil conditions, the integrity of the building's foundation, and the building's ventilation system.

Philadelphia County is located in the USEPA radon Zone 3. USEPA radon Zone 3 has predicted average screening concentration levels less than 2 pCi/L. The EPA recommended action level is 4 pCi/L. Radon is not expected to represent an environmental concern to guests or workers in the building.

5.11 MOLD AND MICROBIAL ISSUES

The Site was inspected for visible evidence of SMG and moisture intrusion. No dismantling of building systems, building components, or physical testing was performed. Visible SMG was not identified during the Site inspection.

5.12 LEAD-BASED PAINT

Use of lead-based paint was uncommon after approximately 1977. A lead-based paint (LBP) survey was beyond the scope of this assessment. No significant peeling or detached paint was observed during the Site reconnaissance.

DRAFT

5.13 WETLANDS

The Site was inspected for the presence of sensitive ecological areas by noting environmental indicators (e.g., wetlands vegetation, floodplains) located on or immediately adjoining the Site. Evidence of wetlands was not depicted on the U.S. Fish and Wildlife Service, National Wetlands Inventory Map, or observed during the Site inspection.

The FEMA FIRM for Philadelphia County, number 4507570184H, dated November 18, 2015, was reviewed for the subject property. The Site is located within Zone X. Zone X includes areas determined to be outside of the 0.2% annual chance floodplain.

5.14 THREATENED & ENDANGERED SPECIES

A review of applicable records for information regarding threatened/endangered species was made on the USFWS Online Database System website http://www.eso.fws.gov/. Several threatened or endangered species were listed for Philadelphia County. Given the Site has been developed in its current state since 1988; the presence of these species in the area does not represent a concern to the Site.

5.15 HISTORIC SITES

ProGEA conducted a limited historical properties/archeological resources review for the Site. No obvious archeological resources or structures of historical significance were observed at the Site. The Site was not listed on the National Register of Historic Places and was not identified in research conducted through the Natural Resource Conservation Service website.

5.16 AIR EMISSIONS

ProGEA did not observe sources of regulated air emissions at the Site at the time of the site reconnaissance.

5.17 DRY CLEANING OPERATIONS

There are no dry cleaning plants located on-Site. No dry cleaners were listed for the Site or adjoining addresses. Bourse Cleaners was listed at the Site address in the city directories and in the EDR radius report for the years 1996 through 2014. The radius report does not list the dry cleaning facility on any hazardous or regulated waste databases. Bourse Cleaners was present at the time of the Site inspection and was thoroughly inspected. At the time of the Site inspection, the cleaners was a drop off facility and, due to the size limitations, did not appear able to support dry cleaning equipment or associated operations. The rear storeroom was inspected with no signs of prior equipment or abandoned plumbing. According to the Site contact, no dry cleaning plants have ever been located on-Site and the tenant has always been a drop off business. The owner of the business was interviewed and also confirmed that no dry cleaning has ever taken place at this location. Based on these observations, it is assumed that the dry cleaner has always operated as a drop off facility. Therefore the dry cleaner listing is not considered a REC.

DRAFT

5.18 VAPOR ENCROACHMENT CONDITION

As part of ProGEA's evaluation of the potential for chemicals of concern (COCs) to be present at the Site or migrate onto the subject property, ProGEA conducted a limited Vapor Encroachment Screening (VES). The goal of the VES is to identify potential vapor impacts in the subsurface or within Site buildings caused by the release of COCs into the soil or groundwater at the Site or in near proximity to the Site. As such, ProGEA reviewed all local, state, and federal database information as well as historical maps and aerial photographs. No RECs were identified in association with the Site and/or surrounding facilities. During the Site visit, ProGEA did not observe potential contaminant sources that would contribute or cause COCs to be present at the Site. Additionally, ProGEA did not observe any surrounding facilities that would have potentially caused COCs to migrate onto the subject property. Therefore, based on ProGEA's professional opinion and due to the regulatory status of the Site and surrounding facilities, distance from the Site, or gradient position relative to the Site, the potential for a Vapor Encroachment Condition (VEC) to be present at the Site is minimal and is not considered an environmental concern.

DRAFT

6.0 FINDINGS, OPINIONS, AND CONCLUSIONS

Based on the findings of this assessment, there are no obvious indicators that point to the presence or likely presence of contamination at the Site. **This assessment has revealed no evidence of recognized environmental conditions (RECs), as defined by ASTM, in connection with the subject property.**

The following environmental condition, which is not considered to be a recognized environmental condition, as defined by ASTM, was revealed during this assessment:

- ProGEA recommends managing all suspect ACMs under the Asbestos Operations and Maintenance Plan that has been provided under separate cover. In addition, an asbestos survey and subsequent abatement should be undertaken prior to any renovation or demolition activities performed at the Site.

DRAFT

7.0 SIGNATURE(S), DECLARATION, AND SEAL OF ENVIRONMENTAL PROFESSIONAL(S)

"I declare that to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in 40 CFR §312.10."

"I have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. I have developed and performed the all appropriate inquires in conformance with the standards and practices set forth in 40 CFR Part 312."

EXECUTIVE SUMMARY

Langan Engineering and Environmental Services, Inc. (Langan) has completed a Phase I Environmental Site Assessment (ESA) for the Bourse Garage (Property), 400 Ranstead Street, Philadelphia, PA 19106. This Phase I ESA was performed in accordance with a contract between MidAtlantic Realty Partners, LLC (Client) and Langan, and in conformance with the ASTM E 1527-13 standard and standard industry practice.

It is our understanding that the Client requested this assessment in connection with its proposed acquisition of the building, to demonstrate that it conducted All Appropriate Inquiries as necessary to qualify for purchaser liability defenses under CERCLA. The purpose of the Phase I ESA was to conduct proper due diligence and inquiry to identify recognized environmental conditions (RECs) in accordance with ASTM E 1527-13. Limitations to and deviations from ASTM E 1527-13 are provided in Sections 1.3 and 9.0 of this report. This Phase I ESA consisted of reviewing historical and environmental records, interviews with ownership and conducting a site reconnaissance. The following are the pertinent findings of this assessment.

The Property is located at 400 Ranstead Street in Philadelphia, PA 19106. The Property is an 11-story, mixed-use building consisting of a 453-space garage, a 23,741 square feet, 5-screen movie theater and 3,267 square feet of ground floor retail. It is located in the heart of Philadelphia's historic Old City district. The building was constructed in 1988.

The Property is currently owned by Bourse Garage Associates, LP and the Kaiserman Company. The building encompasses approximately 200,365 square feet of improvement area, within a 15,442 square feet lot. The building has 11 stories and a basement level. The property is listed by the Philadelphia Office of Public Records on Book 1037, Page 241; and on Property Map number 001S03. It has a property identifier number of 883409600. No liens or Activity Use Limitations (AULs) were found. A copy of the property record is in Appendix B.

Langan was granted access to the Property and escorted during the site reconnaissance by Tim McDonald (representing the property broker, East Dil Secured); and by John DiLorenzo (management staff from Kaiserman Companies) on 8 and 16 September 2015.

Adjoining the properties consist of many office and mixed-use buildings: the Omni Hotel building of 1960s to 1980s vintage; older buildings, such as the late 19th Century and early 20th Century Bourse Building and Lafayette Building/Hotel Monaco; a few newer structures with some very recently constructed, such as, the National Museum of Jewish-American History (completed in 2010).

The Property was not listed in any of the United States Environmental Protection Agency (EPA) or Pennsylvania Department of Environmental Protection (PADEP) databases searched. No violations were noted from these sources in the database report. No violations from the City of Philadelphia Licenses & Inspections unit were noted. No hazardous waste issues were noted in these records.

It is our opinion that this assessment has not revealed evidence of RECs in connection with the Property or surrounding properties.

Langan identified the following potential areas of environmental business risk:

- Potentially PCB-containing equipment within the building
- Potential asbestos containing materials (ACM) within the building

DRAFT

1.0 INTRODUCTION

Langan Engineering and Environmental Services, Inc. (Langan) has completed a Phase I Environmental Site Assessment (ESA) for the Bourse Garage (Property), 400 Ranstead Street, Philadelphia, PA 19106. The Property location is depicted on the site location map provided in Appendix A.

This Phase I ESA was performed in accordance with a contract between MidAtlantic Realty Partners, LLC (Client) and Langan, and in conformance with the ASTM E 1527-13 standard and standard industry practice.

1.1 Purpose

The objective of the Phase I ESA was to conduct proper due diligence and inquiry to identify RECs associated with the Property in conformance with and as defined by ASTM E 1527-13:

> *"A recognized environmental condition means the presence or likely presence of any hazardous substances or petroleum products on a Property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the Property or into the ground, groundwater, or surface water of the Property."*

1.2 Detailed Scope of Services

The scope of work for the Phase I ESA is described in the following four tasks:

Task 1 - Records Review - Historical Information/Environmental Database

Langan reviewed readily available data for information on the historical development and uses of the Property, including aerial photographs; topographic maps; city directory abstract, and a Sanborn fire insurance map report.

Langan reviewed a current listing of environmental databases of federal, state and local environmental agencies for information regarding identified sites of environmental concern, compliance enforcement actions, investigations involving hazardous materials and wastes, and of registered and leaking underground storage tanks (USTs). The radial search distances were in accordance with ASTM E 1527-13.

Task 2 - Site Reconnaissance

On 8 September and 16 September 2015 (with follow-up visits on 30 September and 14 October), Langan conducted a site reconnaissance of the Property. The purpose of the reconnaissance was to observe:

- The Property, to assess current use and the potential for impact to soil, groundwater, and surface water based on the identified use;
- Evidence of stressed vegetation, disturbed topography, and soil/pavement staining;
- Evidence of use or dumping of hazardous materials, solid waste, or construction and demolition debris;
- Topographic features that indicate extensive use of non-native fill;
- The exterior and the interior of existing structures;

DRAFT

- Evidence of the use of petroleum products or other chemicals (e.g., USTs, above ground storage tanks (ASTs), drums, etc.) and other obvious environmental indicators (e.g., monitoring wells);
- Evidence of potable wells, irrigation wells, septic tanks, or other underground structures; and,
- Neighboring sites, to the extent practical, to assess the possible environmental impact of their operations on the Property.

Task 3 – Interviews
For this Phase I ESA, Langan interviewed John DiLorenzo and Frank Cianfrani, from the building management staff. Langan also submitted an environmental owner questionnaire, but it was not returned.

In addition, Langan also submitted an environmental client questionnaire to Charley McGrath, Principal of MidAtlantic Realty Partners, LLC, the Client. Mr. McGrath filled out the questionnaire, which is included in Appendix C.

Task 4 - Data Interpretation and Reporting of Results
Langan evaluated the information collected in Tasks 1 through 3 to assess the potential for known or suspect environmental concerns and RECs. Section 7.0 presents our findings and opinions with respect to known or suspect environmental concerns and RECs. Section 8.0 presents the conclusions of this evaluation.

1.3 Limitations and Exceptions
Langan's services have been provided in accordance with generally accepted industry practices, including ASTM Practice E 1527-13. No expressed or implied representation or warranty is included or intended in our report, except that our services were performed within the limits prescribed by the Client, and with the customary thoroughness and competence of our profession.

1.4 Special Terms and Conditions and User Reliance
The Client requested no special terms or conditions regarding this study. Langan has prepared this report specifically for the use of MidAtlantic Realty Partners, LLC and its affiliates, attorneys, lenders, investors, insurers, successors and assigns. Other parties cannot rely on this Phase I ESA, and the conclusions thereof, unless Langan receives a written request from the Client, at which time a "Reliance Letter" will be prepared for the interested party. The relying party will be subject to the same limitations as agreed to by the Client.

2.0 PROPERTY DESCRIPTION

2.1 Location and Legal Description
The Property is located at 400 Ranstead Street in Philadelphia, PA 19106. The Property is an 11-story, mixed-use building consisting of a 453-space garage, a 23,741 square feet 5-screen movie theater and 3,267 square feet of ground floor retail. It is located in the heart of Philadelphia's historic Old City district. The building was constructed in 1988.

DRAFT

The Property is currently owned by Bourse Garage Associates, LP and the Kaiserman Company. The building encompasses approximately 200,365 square feet of improvement area, within a 15,442 square feet lot. The building has 11 stories and a basement level. The property is listed by the Philadelphia Office of Public Records on Book 1037, Page 241; and on Property Map number 001S03. It has a property identifier number of 883409600. No liens or Activity Use Limitations (AULs) were found. A copy of the property record is in Appendix B.

2.2 Property and Vicinity General Characteristics

The Property is located in the historic Old City neighborhood of Philadelphia. As such, it is part of the heavily urbanized downtown business district. The sites adjoining the Property consist of many office mixed-use buildings and the Omni Hotel building of 1960s to 1980s vintage; older buildings, such as the late 19th Century and early 20th Century Bourse Building and Lafayette Building/Hotel Monaco; as a few newer construction structures, some as recent as the National Museum of Jewish-American History (completed in 2010).

2.3 Current Use of the Property and Adjoining Properties

The greater portion of the Property square footage is used as a garage, with some ground-floor retail and the Ritz at the Bourse movie theater in the basement. No manufacturing or industrial processes are located in the building.

The sites adjoining the Property consist of similar multi-story buildings, most of which are office or mixed-use, including:

- On the north
  - The historic Bourse building, which houses offices and a tourist-focused food court
- On the south
  - Omni Hotel
- On the west
  - Hotel Monaco (former Lafayette office building)
  - 431 Chestnut Street and 425-29 Chestnut Street (American Philosophical Society buildings)
  - 421 Chestnut (residential condominium)
- On the east
  - 27-41 South 4th Street (Charter High Tech High School)
  - 325 Chestnut Street (Constitution Place office building)

Finally, not far west, across 5th Street, is Independence Mall with restroom facilities and landscaped seating spaces closest to the street, the main lawn behind it, and the Liberty Bell Pavilion across the mall on 6th Street.

2.4 Descriptions of Structures, Roads, and Other Property Improvements

The Bourse Garage building was reportedly completed in 1988, following the design of architects Oldham & Seltz. It has 11 stories and a basement level. The building framing is structural steel and concrete, with concrete foundation and concrete decks. Exterior walls are made of pre-cast concrete and steel, and are largely open on the garage levels. The ground floor retail has plate glass windows in metal frames. The Ritz at the Bourse movie theater has

DRAFT

its entrance right at the corner of 4th Street and Ranstead Street. From the ground-floor lobby, escalators, a stair and an elevator provide access to the basement-level screening rooms.

An elevator lobby and a bank of two elevators provide pedestrian access to garage levels from the Ranstead Street side of the building. Ramps provide vehicular access into the garage from 4th Street and out of the garage on Ranstead Street. A loading dock is located between the elevator lobby and the Ranstead Street garage exit. (The loading dock shares service with Bourse Building across the street)

3.0 USER PROVIDED INFORMATION

Langan submitted an environmental client questionnaire to Charley McGrath, Principal of MidAtlantic Realty Partners, LLC. Mr. McGrath filled out the questionnaire. The User Questionnaire for the Property was completed in accordance with the All Appropriate Inquiry Rule (40 CFR312). The completed questionnaire is included in Appendix C.

3.1 Title Records

The Client did not provide chain-of-title or other Property ownership records to Langan.

3.2 Environmental Liens or Activity and Use Limitations

The Client informed Langan that they are not aware of any environmental cleanup or liens or use limitations in connection with the Property.

3.3 Specialized Knowledge

The Client informed Langan that they have no specialized knowledge of the Property.

3.4 Commonly Known and Reasonable Ascertainable Information

The Client informed Langan that they are not aware of any commonly known and reasonable ascertainable information regarding the Property.

3.5 Valuation Reduction for Environmental Issues

The Client informed Langan that the question on the value of the Property relative to environmental issues was not applicable to this Phase I ESA.

3.6 Owner, Property Manager, and Occupant Information

For this Phase I ESA, Langan interviewed John DiLorenzo and Frank Cianfrani, from the maintenance staff for the building. Both stated they were unaware of any potential hazardous waste issues or concerns.

Langan also submitted an environmental owner questionnaire, which was not returned.

Should it become available and provide any relevant information, we will submit an Addendum to this report.

3.7 Reason for Performing Phase I ESA

It is our understanding that the Client requested this assessment in connection with its proposed acquisition of the property to qualify for Purchaser Liability Defenses under CERCLA.

DRAFT

4.0 RECORDS REVIEW

4.1 Standard Environmental Record Sources

Langan reviewed an environmental database search report, prepared by Environmental Data Resources, Inc. (EDR) of Milford, Connecticut, for the Property and surrounding area. The report contains database information from the EPA and the PA Department of Environmental Protection (PADEP). This information is reported to Langan by EDR, and to EDR by government sources; therefore, neither Langan nor EDR can verify the completeness and accuracy of the database information. Appendix D contains a copy of the report, with specific source and Property descriptions, and the dates of the last update for each database searched. The following table lists the ASTM standard and supplemental databases with regulated sites and corresponding search distances:

U.S. Manufactured Gas Plant sites	1.0	0
U.S. Historical Auto Stations	0.25	5
U.S. Historical Cleaners	0.25	11

The Property was not listed in the EDR database report.

The environmental database report identified 104 database listings within the applicable ASTM designated search radius. They are shown on a digital custom-plotted map included in the database report in Appendix D.

The remaining 19 listings shown in the report could not be mapped (i.e., orphan sites). According to the vendor, an orphan property is a property that cannot be mapped due to poor or inadequate address information. Upon further research, Langan concluded that two of the orphan sites appears to be within applicable search distances to the Property – one within ¼-mile and one within ¾-mile from the site.

DRAFT

The table below presents the regulated sites listed in the database report which located within one-eighth mile from the Property; as well as the two orphan sites listed above.

EDR Map No.	Facility	Database
A1	44 S 4th Street	EDR US Historical Cleaners
B2	21 S 5th Street	EDR Historical Auto Stations
B3	1 Independence Place	EDR US Historical Cleaners
4	Colonial Penn Life Insurance Co.	PA Archive UST
A5	Philadelphia Park Service Second Bank INHP	PA Manifest
A6	Chestnut Holdings LP	PA Archive UST
B7	US Independence Hall	RCRA-SQG
C8	Chemical Heritage Foundation	PA LUST, PA Archive UST
C9	Keystone Shipping Co	RCRA NonGen / NLR, FINDS
D10	Rohm & Haas Co	RCRA-SQG
D11	Rohm & Haas Co	PA Archive UST
E12	615 Chestnut Street	EDR US Historical Cleaners
F13	24 N 3rd Street	EDR Historical Auto Stations
E14	620 Chestnut Street	EDR US Historical Cleaners
F15 *	2601-13 N 3rd Street	US Brownfields, FINDS
D16 *	2615-21 N 3rd Street	US Brownfields, FINDS
F17 *	1019-27 N 3rd Street	US Brownfields, FINDS
G18	Chilton Co	RCRA NonGen / NLR, FINDS
Unmapped – approx. ¾ mile	Reading Terminal	CERC-NFRAP
Unmapped – approx.. ¼ mile	312-320 Walnut Street and 319 Willings Alley	PA VCP

Please note that three sites that are listed on North 3rd Street (the three shaded and with an asterisk "*") are not located within the search radius. The database report misrepresents the locations of these sites, which are in fact located well over 2 miles from the site.

Langan performed the following evaluation to determine whether additional environmental records with respect to these facilities should be reviewed:

- Case status (i.e., whether a No Further Action letter has been issued or a case has been closed);

DRAFT

- Type of database and whether the presence of soil or ground water contamination is known;
- Distance of the site from the Property; and
- Ground water flow direction. A determination of whether the database site is located up-gradient or down-gradient of the Property was based on local topography and any available information on local groundwater flow direction.

One notable item is the number of historical dry cleaning shops and historical auto stations that are or were present in surrounding blocks. In general, typical operations associated with facilities are commonly found to have potential releases of petroleum and/or hazardous substances that could adversely impact the environment. However, no confirmed or reported release or presence of soil or groundwater contamination was ascertained for any of these locations listed in the database.

In addition, only one leaking underground storage tank listing was reported within the ¼-mile search distance, the Chemical Heritage Foundation site. The records indicate that a leak or spill occurred related to two 5,000-gallon Number 2 fuel oil tanks formerly present onsite. The site received an administrative closeout for the reported release associated with the two tanks on March 2, 1995.

Twenty-seven other sites located between ¼-mile and 1 mile from the Property presented evidence of spills, leaks, or releases:

Leaking USTs:

1. The 320 Walnut property, listed as owned by the Archdiocese of Philadelphia, reported an unregulated, leaking Number 4 fuel oil UST of undetermined date with no report of site closure. However, this property is located nearly 900 feet away from the Property; the property is located at a lower elevation than the Property. Even if contamination were still present at that property, because of distance and topography, it is unlikely that environmental conditions at that site would pose a concern to the Property.

2. The City of Philadelphia Parking Garage located at the corner of 6th and Arch Streets reported a leaking diesel UST with impacts to soil in 1999. As of March 18, 2003, Interim or Remedial Actions had been initiated. No further information was

DRAFT

available. However, due to age of the spill and this property's distance to the Property and it is unlikely that this site would pose a concern to the Property.

3. The Byrne Green Federal Complex, located at 600 Arch Street reported in February 2010 a leaking Number 2 fuel oil UST with impacts to soil. The cleanup was reportedly completed by the end of September 2010.

4. The Five Star Parking facility located at 727-35 Chestnut Street, reported in August 2003 a leaking leaded gasoline UST with impacts to only soil. The cleanup was completed by the end of November 2003.

5. The 327 Spruce Street property reported in February 2010 a leaking Number 2 fuel oil UST with impacts to only soil, with no evidence of site closure. However, this site is located over 1,600 feet away from the Property; and the site is located at a lower elevation than the Property. Even if contamination were still present at that site, it is unlikely that the environmental conditions at that site would pose a concern to the Property.

6. The American College of Physicians property located at 6th & Race Streets reported an undated Number 2 fuel oil release, with no evidence of site closure. However, this site is located over 1,600 feet away from the Property. Even if contamination were still present at that site, it is unlikely that the environmental conditional at that site would pose a concern to the Property.

7. The Police Headquarters located at 8th & Race Streets reported an unleaded gasoline release to soil in August 1989. Cleanup was completed in August 1995.

8. The Sheikholeslai Residential property located at 319 Pine Street reported a Number 2 fuel oil release, with no evidence of site closure. However, the property is unlikely to present a risk to the Property – the distance to the Property is over 2,200 feet; and the property is located at a lower elevation than the Property. Because of distance and topography, it is unlikely that environmental conditions at that site would pose a concern to the Property.

9. The Zitin Residential property located at 430 Pine Street reported a diesel fuel release, with no evidence of site closure. However, the property is unlikely to present a risk to the Property – the distance to the Property is over 2,100 feet; and

DRAFT

the property is located at a lower elevation than the Property. Because of distance and topography, it is unlikely that environmental conditions at that site would pose a concern to the Property.

10. The Greyhound Lines property located at 1001 Filbert Street was listed on the leaking UST database, with impacts to soil. The cleanup was completed by the end of February 1994.

11. The MKT CTL OFC property located at 900 Race Street was listed on the Leaking UST database and reported in 1989 a leaking diesel UST with impacts to soil. The cleanup was completed in June 1994.

12. The Philadelphia Marine Center, located at Pier 12 North was listed on the Leaking UST database and reported in 1989 a leaking unleaded gasoline UST with impacts to groundwater. The cleanup was completed in February 1992.

13. The Abbotts Court Apartments located at 3rd & Lombard Streets was listed on the PA Unregulated Leaking UST database and reported a leaking unleaded gasoline UST. The cleanup was completed in April 1996.

PA Voluntary Cleanup Program (VCP):

14. The Athenaeum of Philadelphia, located at 219 South 6th Street entered the PADEP Act 2 voluntary cleanup program for an unleaded gasoline release to soil and the project closeout was approved on September 21, 2005; with deed restrictions posted to acknowledge the presence of potential inorganics, lead, PAH and unleaded gasoline contaminants that remain in the ground but do not pose a current environmental risk.

15. The vacant parcel (proposed Safeguard) located at 212 Walnut Street entered the PADEP Act 2 voluntary cleanup program for the presence of inorganics in soil, for which a Site-Specific Standard was approved on May 15, 2003. No further information was available. However, due to age of the spill, and this site's distance to the Property, it is unlikely that this property would pose a concern to the Property.

DRAFT

16. The Lattari Residential property located at 101 Market Street entered the PADEP Act 2 voluntary cleanup program for a Number 2 fuel oil release to soil and the project closeout was approved on October 20, 2011.

17. The Society Hill Shopping Center parcel located at 314-326 South 5th Street entered the PADEP Act 2 voluntary cleanup program in May 2015 for a chlorinated solvent release to soil and groundwater. No further information was available. The property is unlikely to present a risk to the Property because the distance to the Property is over 1,800 feet and the property is located at a lower elevation than the Property. Because of distance and topography, it is unlikely that environmental conditions at that site would pose a concern to the Property.

18. The Assouline & Ting property located at 501-509 Vine Street entered the PADEP Act 2 voluntary cleanup program in August 2002 for a remediation of PAHs and inorganics in soil and groundwater. No further information was available. The project closeout was approved on August 22, 2002; with deed restrictions recorded because of potential inorganics, and PAHs remaining in the ground. Because of this site's distance to the Property (over 2,200 feet) and regulatory status, it is unlikely that this site would pose a concern to the Property.

19. The Kee property located at 319-329 Vine Street was listed on both the Unregulated Leaking Tanks database, as well as the PADEP Act 2 voluntary cleanup program for a leaded gasoline release, with no evidence of site closure. Because of this site's distance to the Property (over 2,300 feet), it is unlikely that this site would pose a concern to the Property.

CERCLIS and CERCLIS-NFRAP listings:

20. The Beck Engraving property, located at 105 South 7th Street, reported the discovery of a spill on October 3, 1989. The property went through the CERCLIS process, for which a Preliminary Assessment was completed, achieving No Further Remedial Action Planned (NFRAP) and Archive Site status on October 1, 1992 because the property did not qualify for the NPL based on existing information. The property is unlikely to present a risk to the Property – the Beck Engraving Company has not operated for decades; the EPA does not require any further clean up action or further investigation; and the historic building currently houses the Charter High School for Architecture and Design and the ITT Technical Institute.

DRAFT

21. The NL IND Inc Tatham Brothers property, located at 226 South 5th Street, went through the CERCLIS process, starting with Discovery on June 1, 1981. The property achieved No Further Remedial Action Planned (NFRAP) status in 1987 because it did not qualify for the NPL based on existing information. The property is unlikely to present a risk to the Property – the distance to the Property is over 1,100 feet; the property is located at a lower elevation than the Property; and the EPA does not require any further clean up action or further investigation. Even if contamination were still present at that property, because of distance and topography, it is unlikely that environmental conditions at that site would pose a concern to the Property.

22. The Sansom Street Jewelry Fire incident, which occurred at 740 Sansom Street, went through the CERCLIS process, undergoing a Removal Assessment on January 10, 1992 and a Preliminary Assessment on April 24, 1992. The site achieved No Further Remedial Action Planned (NFRAP) and Archive Status status in at the conclusion of the Preliminary Assessment because the property did not qualify for the NPL based on existing information. The property is unlikely to present a risk to the Property – the distance to the Property is over 1,200 feet; and the EPA does not require any further clean up action or further investigation. Even if contamination were still present at that property, because of distance, it is unlikely that environmental conditions at that site would pose a concern to the Property.

23. The Sable Diamonds / US Metals & Coins property at 733 Sansom Street was listed in both the CERCLIS and PRP lists due to a complaint from a neighbor that the facility had an air release of mercury in May 1987. A Preliminary Assessment was completed in April 1989. The property is listed as achieving No Further Remedial Action Planned (NFRAP) status first at the conclusion of the Preliminary Assessment on April 25, 1989, and again on September 26, 2000, because the property did not qualify for the NPL based on existing information. It is unclear why the property is still listed on the CERCLIS database instead of the CERCLIS-NFRAP database. However, the property is unlikely to present a risk to the Property because the distance to the Property is over 1,400 feet, an air release most likely has dissipated after a quarter-century, and the EPA does not require any further clean up action or further investigation. Even if contamination were still present at that property, because of distance, it is unlikely that environmental conditions at that site would pose a concern to the Property.

DRAFT

24. The Wellness Center – Mercury ER incident occurred at 841 Chestnut Street, basement Level 1 in March 1995. A Preliminary Assessment was completed in August 1996. The property is listed as achieving No Further Remedial Action Planned (NFRAP) status at the conclusion of the Preliminary Assessment because the property did not qualify for the NPL based on existing information; and the incident was archived in 2001. The property is unlikely to present a risk to the Property because the distance to the Property is over 1,600 feet, and the EPA does not require any further clean up action or further investigation. Even if contamination were still present at that property, because of distance, it is unlikely that environmental conditions at that site would pose a concern to the Property.

25. The NL IND Inc Western White Lead, reported but not confirmed to be at 231 S Front Street, went through the CERCLIS process, with the Discovery on June 1, 1981 and Preliminary Assessment between February and April 1987. The property achieved No Further Remedial Action Planned (NFRAP) status at the conclusion of the Preliminary Assessment because the property did not qualify for the NPL based on existing information. The property is unlikely to present a risk to the Property because the distance to the Property is over 1,700 feet, the property is located at a lower elevation than the Property, and the EPA does not require any further clean up action or further investigation. Even if contamination were still present at that property, because of distance and topography, it is unlikely that environmental conditions at that site would pose a concern to the Property.

26. The Philadelphia Smelting & Refining Lead Smelter located at 341 New Market Street went through the CERCLIS process, undergoing a Discovery on April 1, 2001, a Preliminary Assessment on August 1, 2005, and Site Inspections between that date and January 31, 2007. At the conclusion of Site Inspections, the site achieved No Further Remedial Action Planned (NFRAP) status because the property did not qualify for the NPL based on existing information. The site was then archived. The property is unlikely to present a risk to the Property because the distance to the Property is over 2,300 feet, the property is located at a lower elevation than the Property, and the EPA does not require any further clean up action or further investigation. Even if contamination were still present at that property, because of distance and topography, it is unlikely that environmental conditions at that site would pose a concern to the Property.

DRAFT

27. The Penn Petroleum Company, located at Front & Shunk Streets went through the CERCLIS process, undergoing a Discovery on November 19, 1991, a Removal Assessment between that date and January 2, 1992, and a Preliminary Assessment on April 23, 1992. At the conclusion of the Preliminary Assessment, the site achieved No Further Remedial Action Planned (NFRAP) status in because it did not qualify for the NPL based on existing information. Between January and August 1992, the Potentially Responsible Party completed a Removal, with no action anomalies reported. The property is unlikely to present a risk to the Property because the distance to the Property is over 2,500 feet, the property is located at a lower elevation than the Property, and the EPA does not require any further clean up action or further investigation. Even if contamination were still present at that property, because of distance and topography, it is unlikely that environmental conditions at that site would pose a concern to the Property.

Based on this evaluation, Langan does not consider any of the listed sites to have the potential to pose an environmental threat to the Property at this time.

4.2 Additional Environmental Record Sources

Langan submitted a request to the PADEP for any files related to the property. PADEP responded on October 6, 2015 stating that no files for the Property were available.

Langan also submitted a request to the EPA, but did not receive a response. Should any records become available, we will submit an Addendum to this report.

Langan also researched City of Philadelphia Licenses & Inspections unit files and no violations were noted.

Langan also submitted requests for information to the following City of Philadelphia departments:

- Department of Public Health
- Hazardous Materials Administrative Unit of the Philadelphia Fire Department
- Philadelphia Water Department
- Department of Licenses & Inspections

The first two responded that no information was available for the Property. The latter have not yet responded.

Finally, Langan did not review any additional environmental record sources for this Phase I ESA because our evaluation of the database report indicated that none of the nearby properties was likely to adversely impact the Property.

DRAFT

Physiography

According to the geologic map of Pennsylvania, the Property is located on the Lowland and Intermediate Upland Section of the Atlantic Coastal Plain physiographic province where unconsolidated sediments of the Coastal Plain overlie the rocks of the Piedmont Province. It is not far from the Fall line, the boundary with the Piedmont Upland section.

The Lowland and Intermediate Upland Section consists of a flat upper terrace surface that is cut by numerous short streams. Most of these stream valleys are narrow and steep sided, but some have wider bottoms and less steep side slopes. The upper terrace surface is underlain by unconsolidated to poorly consolidated sand and gravel. These deposits rest on various metamorphic rocks. The Coastal Plain sediments consist of layers of sand, silt, and clay deposited alternately in deltaic and marine environments as sea level fluctuated during the Cretaceous and Tertiary periods.

Geology

In relation to bedrock, the site is probably underlain by undifferentiated Pennsauken and Bridgeton Formations. The rock stratigraphic unit is of the Mesozoic Era, Cretaceous system, Lower Cretaceous series, code IK.

Hydrogeology

According to EDR, inferred depth to groundwater in the Property area was undetermined, possibly because of urbanization and varied levels of urban fill found throughout the area. Based on topography and surface drainage patterns depicted on the *USGS Topographical Philadelphia Quad, Philadelphia, 1995* regional groundwater flow is expected to be in an eastern to southeastern direction beneath the Site towards the Delaware River.

Topography and drainage patterns are not always reliable indicators of groundwater flow and groundwater flow conditions can vary considerably over short distances due to both natural and man-made influences such as impervious groundcover and pumping.

Radon

According to the EPA Map of Radon Zones of Pennsylvania, Philadelphia County is classified as a tier three zone, which is equivalent to a Low Radon Potential. This denotes an area where average indoor radon levels are less than 2 picocuries per liter (pCi/L). The USEPA guidance level is 4 pCi/L. Only 12% of homes in zip code 19106 are expected to be above this level.

DRAFT

Topography

According to the EDR physical setting source report, the approximate elevation in the vicinity of the Property is 26 feet above sea level and appears to slope downward in elevation to the southeast.

4.4 Historical Use Information on the Property, Adjoining Properties, and Surrounding Properties

Aerial Photograph Review

Langan reviewed aerial photographs to evaluate past uses and relevant characteristics of the Property and surrounding properties. We reviewed the following aerial photographs from EDR: 1940, 1945, 1951, 1954, 1962, 1971, 1973, 1981, 1988, 1995, 1999, 2005, 2006, 2008, and 2010. Langan also reviewed the 2013 aerial photograph from Google Earth.

The 1940 and 1945 aerial photographs show the buildings that formerly occupied the Property. Due to the poor resolution of these photographs, not much detail is distinguishable.

The 1951 photograph shows that the buildings have been demolished, and a parking lot now occupies the parcels along 4th Street between Chestnut Street and Ranstead Street.

No significant changes to the Property are noted in the 1954 photograph. However, in the vicinity, the entire block (contained by Market, 5th, Chestnut and 4th Streets) has been demolished, as well as a portion of the block just north of Market Street, to give way to an "Independence Mall" to front Independence Hall.

The 1962 photograph shows that the parking lot has been extended to several parcels to west; and that across 4th Street a new building occupies the northeast corner of the intersection of 4th Street and Chestnut Street.

No significant changes to the Property are noted in the 1962 photograph. However, in the vicinity, Independence Mall now extends all the way from Independence Hall to Franklin Square; the then new Philadelphia Police Headquarters buildings can be seen west of Franklin Square; and major demolition has extended east and south of Independence Hall, presumably as part of the creation of Independence National Historic Park (to the east) and the redevelopment of Society Hill promoted by City Planning Director Ed Bacon (to the south and southeast).

No significant changes to the Property are noted in the 1971, 1973, 1981, and 1988 photographs. However, in the vicinity, redevelopment continues. The formerly demolished blocks contain major new structures, such as the Independence National Historic Park (with many of features still present today visible), the then-new Society Hill Towers (to the east, along Dock Street), and the then new Mint building, near the entrance of the Ben Franklin Bridge. Closer to the building, the new 325 Chestnut and 400 Market buildings can now be seen. Demolition now extends west of Independence Mall / 6th Street for a couple of blocks surrounding the Police Headquarters building; and all along the Delaware River waterfront, for construction of interstate I-95.

DRAFT

In the 1988 photograph, new temporary approaches to the Ben Franklin Bridge, along Vine Street and 8th/Race Streets, can be seen from the construction of the Vine Street Expressway. Multiple new high-rises can be seen, including the new Federal Building on Market between 6th and 7th Streets and new residential towers surrounding Washington Square.

Even though the 1995 photograph also has poor resolution, it can be seen that a new building occupies the parcel. The then-new Bourse Garage Building can be better seen on the 1999 photograph.

No significant changes to the Property are noted in the 2005, and 2006 photographs. In the vicinity, the I-676 ramps/bridge approaches to the Ben Franklin Bridge can be seen completed as early as the 1995 photograph; and the new National Constitution Center museum and reconfigured Independence Mall can be seen on the 2005 photograph.

The 2010 and 2013 aerial photographs show the Property and surrounding areas as they are today.

Appendix E contains copies of portions of these aerial photographs.

USGS Topographic Map Review

Langan reviewed topographic maps from the years 1898, 1901, 1906, 1943, 1956, 1967, 1973, 1985, 1994 and 1995 obtained from EDR. Topographic maps provide information of the historical development of the Property including land use and topographic changes which could indicate landfilling and excavation. Appendix E contains copies of portions of the historical topographic maps.

Because of the scale of maps from 1898 thru 1943, they are not useful in identifying site-specific information. Yet, from the beginning, these maps show the Property's location in a heavily urbanized area.

The 1956 thru 1995 topographic maps also show the Property's location and surrounding areas as urban land with no site-specific detail.

Sanborn Fire Insurance Map Review

Langan reviewed Sanborn Fire Insurance Maps from the years 1916, 1950, 1976, 1980, 1989, 2002, 2004, and 2006 obtained from EDR. Appendix E contains copies of portions of the Sanborn Maps.

Since the Property's current building was only built in 1988, the 1916 Sanborn depicts a different building located on the site. It is a 4 to 5- story steel frame and masonry building with one elevator and two skylights, which belonged to the Provident Life & Trust Company and was closely connected to the firm's other buildings to the south and west. For example, a steel door provided a 3rd-story connection to a 10-story structure immediately to the south; this structure in turn, had an external fire escape which led to the roof of the building.

DRAFT

Surrounding buildings include:

- North of the building, the Bourse Building.
- East of the building, along 4th Street – the Fidelity Trust Company's multiple parcels and buildings at the corner of 4th Street and Chestnut Street
- South of the building, as previously mentioned, several other office and bank buildings belonging to Provident and even sharing doors.
- West of the building, between Chestnut and Ranstead Streets – several medium-sized commercial / office buildings, including the Lafayette Building (today the Hotel Monaco), the Tradesmen's National Bank, the Farmers & Mechanics National Bank, the Philadelphia National Bank, the Philadelphia Trust Co., and the Provident Life & Trust Building.

The 1950 Sanborn shows that the three buildings that belonged to Provident and which fronted 4th Street have now been demolished, replaced by an automobile parking lot. The only former Provident building remaining is the first one immediately west of these parcels, a bank building located at 409 Chestnut Street.

In the vicinity, a few other buildings, such as those at the northwest corner of 5th & Ludlow, and northwest corner of 5th & Chestnut, have also been demolished.

In the 1976 Sanborn, demolition has extended to the 409 Chestnut Street building. Only buildings from 419 Chestnut Street west now remain standing. The parking lot has expanded to encompass the lots of the demolished buildings.

In the vicinity, the Sanborn shows a new building immediately across 4th Street, at 325 Chestnut Street: the Mall Building has replaced the former 2- and 3-story structures that belonged to the Fidelity Trust Company. The Mall Building is depicted at a semi-fireproof building constructed in 1955, with steel frame, concrete floors, and a metal curtain wall. In addition, the 1976 map shows that multiple buildings have been demolished, to give way to parking lots, a few new construction office buildings, the historic Franklin Court, and to Independence Mall.

The 1980 and 1989 Sanborn maps show no significant changes to the parcel.

The 2002 Sanborn Map shows a new concrete fireproof structure built in 1990 (the current Bourse Garage building) occupying the site. It lists it as 12 decks of parking and a movie theater in the basement.

Immediately south, another fireproof structure built in 1990 is shown, the 15-story Omni Hotel.

The 2004 and 2006 Sanborn maps show no significant changes to the Property.

City Directory Review

Langan reviewed a city directory abstract report prepared by EDR for various years between 1920 and 2013, to obtain information regarding the type of businesses that operated on the Property that may indicate an environmental concern. Appendix D contains the city directory abstract. None of the listings indicated a potential environmental concern.

DRAFT

5.0 SITE RECONNAISSANCE

5.1 Methodology and Limiting Conditions

On 8 September, 16 September, and 30 September 2015, Spencer Finch performed a site reconnaissance of the Property and surrounding properties under the supervision of Jeff Smith, PG, an environmental professional, to gather information and evaluate the potential for RECs in connection with the Property. On 30 September, 1 October, and 7 October, 2015, a second Langan crew performed a non-intrusive asbestos, indoor air quality and mold investigation (Results of this additional investigation are included in the appendices).

This site reconnaissance was followed up by a third field visit on 14 October 2015, when Spencer Finch accompanied a team of MEP engineers to perform a non-intrusive evaluation of some of the building's mechanical, electrical and plumbing systems (Results of this additional investigation are provided under separate cover).

The weather on both days was sunny. The ambient temperature high for 16 September was 87° Fahrenheit, and the high for 30 September was 82° Fahrenheit. Appendix F contains photographs from the site reconnaissance.

The reconnaissance consisted of assessing the Property from the adjacent thoroughfares (4th Street, Chestnut Street, Ludlow Street, Ranstead Street, and 5th Street/Independence Mall East) and performing a walking survey around the exterior and through the interior of the Property and entering accessible interior tenant spaces. Langan was granted access to the Property and escorted during the site reconnaissance by John DiLorenzo and Frank Cianfrani, both from property manager Kaiserman; and on 16 September also by Tim McDonald, the property broker.

5.2 General Property Setting

Current Use of the Property
The greater portion of the Property square footage is used as a garage, with some ground-floor retail and the Ritz at the Bourse movie theater in the basement. No manufacturing or industrial processes are located in the building.

Past Use of Property
The Property is still used as intended in the 1998 construction. No evidence of past uses of concern of the Property was observed during the site reconnaissance.

Current Use of the Adjoining Properties
The sites adjoining the Property consist of similar multi-story buildings, most of which are office or mixed-use, including:

- On the north
  - The historic Bourse building, which houses offices and a tourist-focused food court
- On the south
  - Omni Hotel
- On the west

DRAFT

  - Hotel Monaco (former Lafayette office building)
  - 431 Chestnut Street and 425-29 Chestnut Street (American Philosophical Society buildings)
  - 421 Chestnut (residential condominium)
- On the east
  - 27-41 South 4th Street (Charter High Tech High School)
  - 325 Chestnut Street (Constitution Place office building)

Finally, not far west, across 5th Street, is Independence Mall, with restroom facilities and landscaped seating spaces closest to the street, the main lawn behind it, and the Liberty Bell Pavilion across the mall on 6th Street.

Past Use of the Adjoining Properties
No evidence of past use of the surrounding properties was observed during the site reconnaissance.

Current and Past Use in the Surrounding Area
The surrounding area has been heavily urbanized for over a century.

Geologic, Hydrogeologic, Hydrologic and Topographic Conditions
The topography of the Property appears to slope downward slightly in elevation to the southeast. The majority of the Property consists of impervious surfaces.

Description of Structures
The Bourse Garage building was reportedly completed in 1988, following the design of architects Oldham & Seltz. It has 11 stories and a basement level. The building framing is structural steel and concrete, with concrete foundation and concrete decks. Exterior walls are made of pre-cast concrete and steel, and are largely open on the garage levels.

The ground floor retail spaces are enclosed, having plate glass windows in metal frames. The entrance to the Ritz at the Bourse movie theater is also at ground floor, right at the corner of 4th Street and Ranstead Street. From the ground-floor lobby, escalators, a stair and an elevator provide access to the basement-level screening rooms.

An elevator lobby and a bank of two elevators provide pedestrian access to garage levels from the Ranstead Street side of the building. Ramps provide vehicular access into the garage from 4th Street and out of the garage on Ranstead Street. A loading dock is located between the elevator lobby and the Ranstead Street garage exit. (The loading dock shares service with Bourse Building across the street)

Roads
The building sits near three major city arterials, Market, 5th and Chestnut Streets in Center City Philadelphia.

Potable Water Supply and Sewage Disposal
Public water and sewer service is provided to the Property by the City of Philadelphia Water Department.

DRAFT

5.3 Site Observations

Hazardous Substances and Petroleum Products in Connection with Identified Uses
Langan observed only minor amount of cleaning products and hazardous substances or petroleum products in the basement, typical of operations and maintenance of a building such as this, in connection with identified uses on the Property during the site reconnaissance. No releases or significant staining was identified in connection with these materials.

Hazardous Substances and Petroleum Products Containers in Connection with Unidentified Uses
Langan did not observe hazardous substances or petroleum products in connection with unidentified uses on the Property during the site reconnaissance.

Storage Tanks
Langan observed no storage tanks.

Odors
Langan noticed no odors during the site reconnaissance.

Pools of Liquids
Langan observed no pools of liquid and sewage during the site reconnaissance.

Drums
Langan observed no 55-gallon drums.

Chemical Storage
Langan observed de minimis repair/ cleaning products within some of the tenant spaces on the property during the site reconnaissance. Langan did not observe improper storage or management practices during the site reconnaissance, or evidence of significant staining or releases.

De minimis staining was observed on surfaces in select areas of the subbasement, basement, roof, and elevator room.

Polychlorinated Biphenyls (PCBs)
Transformers and mechanical, plumbing and electrical equipment were noted in the basement, subbasement and roof. Equipment seemed to be in good levels of maintenance. Only small areas of minor staining and discoloration were noted.

Asbestos-Containing Materials (ACM)
Asbestos-containing materials (ACM) are those materials which contain over 1% of any type of asbestos. The use of asbestos in construction activities has been regulated since the late 1970's.

Given the age of the building on the Property, there is a probability that ACM might be present.

DRAFT

Outside the scope of this Phase I ESA, Langan also conducted a limited asbestos survey, which identified no areas of confirmed ACM, but did identify some areas of suspected ACM (such as elevator brake pads and pipe insulation concealed within walls). It must be noted that the scope of this survey was limited, did not represent a statistically-significant sampling of the whole building, and did not include intrusive sampling. The findings of that survey are provided in an asbestos survey report, which can be found in Appendix I.

An intrusive asbestos survey would be needed to conclusively confirm the presence/absence and quantities of ACM, which is beyond the scope of both this Phase I ESA and the asbestos survey report.

Lead-Based Paint (LBP)

The presence of lead-based paint (LBP) is another potential issue for buildings constructed prior to 1978, when use of LBP was phased out. During the field view, Langan observed the painted surfaces of publicly-occupied portions of the building to be in good condition during the site reconnaissance.

The presence or absence of LBP throughout the building can only be reliably determined through a building-wide survey and analysis of paint samples, which is beyond the scope of this Phase I ESA.

Water Infiltration and Mold

Langan observed evidence of very minor water infiltration, including stained walls and ceilings on the top-most building deck, near the elevator room. The parking decks are designed to be open to the elements, and no other instances of infiltration were observed. No mold growth was observed.

5.4 Interior Observations

The parking levels are open concrete decks. The ground floor retail and basement movie theater are finished spaces, observed to be in relatively good condition.

Heating/Cooling

There are exhaust fans for elevator machine rooms and electrical rooms, but no other HVAC systems serving the garage. A central HVAC system for the movie theater was noted.

Stains or Corrosion

Langan did not observe major stains or corrosion within the building during the site reconnaissance, beyond minor water stains in movie theater bathroom locations.

Drains and Sumps

Sumps and drains were noted in the basement but none were noted in the garage. No evidence of staining or disposal of hazardous materials were identified in connection with the sumps and drains.

Solid Waste

No solid waste issues were noted.

DRAFT

5.5 Exterior Observations

Pits, Ponds, or Lagoons
Langan did not observe any pits, ponds or lagoons during the site reconnaissance.

Stained Soil or Pavement
Langan did not observe stained soil during the site reconnaissance.

Stressed Vegetation
Langan did not observe stressed vegetation on the Property during the site reconnaissance.

Solid Waste
Langan observed dumpsters for solid waste in the loading dock areas of the building on the Property during the site reconnaissance. No evidence of releases or significant staining was noted in connection with the dumpsters.

Wastewater
Langan did not observe any unusual wastewater features on the Property during the site reconnaissance.

Wells
Langan did not observe wells on the Property during the site reconnaissance.

Septic Systems
Langan did not see evidence of septic systems on the Property during the Property reconnaissance.

6.0 INTERVIEWS

For this Phase I ESA, Langan interviewed John DiLorenzo and Frank Cianfrani, from the maintenance staff for the building. Both stated they were unaware of any potential hazardous waste issues or concerns. Langan also submitted an environmental owner questionnaire, which was not returned.

In addition, Langan also submitted an environmental client questionnaire to Charley McGrath, Principal of MidAtlantic Realty Partners, LLC. Mr. McGrath filled out the questionnaire. The completed Client questionnaire is included in Appendix C.

7.0 PHASE I ESA FINDINGS AND OPINION

Langan's findings with respect to known and suspect RECs, historical RECs, and de minimis conditions, and our opinion of these findings are as follows:

7.1 Summary of Key Findings

Historical documentation indicates the Property has been used as a garage building, with ground floor retail and basement movie theater since its construction in 1988. The

DRAFT

Property was not listed in any of the EPA nor PADEP databases searched.

No violations from the City of Philadelphia Licenses & Inspections unit were noted. We did not identify registered ASTs or USTs in connection with the property.

Information ascertained for surrounding properties did not reveal RECs associated with the Property.

7.2 De Minimis Conditions

Langan observed de minimis staining on portions of the basement.

7.3 Potential Environmental Business Risks

Based on the age of the building, assumed asbestos-containing building materials might be present. Asbestos is not considered a Recognized Environmental Condition based on CERCLA's definition of hazardous substances (42 U.S.C. 9601 (14)). Langan performed a limited asbestos survey for the building, which is included in the appendices. The presence, absence or quantities of asbestos cannot be confirmed until an intrusive asbestos survey is completed.

7.3 Data Gaps

No significant data gaps were identified during this study.

8.0 PHASE I ESA CONCLUSIONS

Langan has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-05 for the Bourse Garage Building located at 400 Ranstead Street in Philadelphia, PA 19106. Any exceptions to, or deviations from this practice are described in Sections 1.3 and 9.0 of this report. This assessment has revealed no evidence of RECs in connection with the Property.

Langan identified the following potential areas of environmental business risk:

- Potentially PCB-containing equipment within the building
- Potential asbestos containing materials (ACM) within the building

9.0 DEVIATIONS

This Phase I ESA has been performed without deviation to, and in conformance with, ASTM Practice E 1527-13. No expressed or implied representation or warranty is included or intended in the report, except that the services were performed within the limits prescribed by the Client, and with the customary thoroughness and competence of our profession.

10.0 ADDITIONAL SERVICES

The scope of services performed for this study *did not* include the following non-ASTM required Phase I ESA items: radon, asbestos, lead-based paint, wetlands, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, mold, indoor air quality, and biological agents.

At the Client's request, we performed one additional service for this Phase I ESA, a Vapor Encroachment Screening. The results are described below.

10.1 Vapor Encroachment Screening

Langan performed a Tier 1 Vapor Encroachment Screening in accordance with ASTM E 2600-10, "Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions." The objective of Tier 1 screening is to determine if a Vapor Encroachment Condition (VEC) exists in connection with the subject property. Tier 1 screening is a non-numeric evaluation that considers available information for the subject property and nearby properties from historical sources, government records, and other resources that are practically reviewable and typically reviewed as part of a Phase I ESA.

Langan used EDR's VEC App to quickly review and screen potential sources of vapor encroachment to the Site. The VEC app can be used to comply with the ASTM E2600-10 standard. None of the surrounding properties identified in the original EDR database search or in the VEC screening had active releases of potential migrating contaminants. The historical database search identified only records of a very limited number of past spills that have received no further action determinations from state or federal agencies; and of several current and former dry cleaning operations in the neighborhood. However, no spills or releases were documented from any of these dry cleaning operations.

In addition, most of the dry cleaning operations identified were either located downgradient from the Site or at a distance larger than the 1/3 mile recommended in ASTM E2600-10. Furthermore, even if spills had occurred, for those locations upgradient of the Site, a large number of buildings with basements and the SEPTA Market Street subway line would serve as factors to limit potential vapor migration pathways toward the subject property. Accordingly, based on the findings of this screening, no VECs were identified in connection with the subject property. The printout of the vapor encroachment analysis can be found in Appendix K.

10.2 Additional Tests Beyond Scope of Phase I ESA

Langan did perform a limited asbestos survey (which can be found in Appendix I), and a limited IAQ and mold survey (which can be found in Appendix I).

11.0 REFERENCES

The sources below were used during the performance of this Phase I ESA.

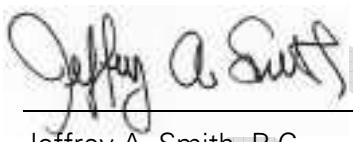
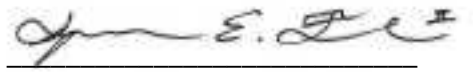
12.0 ENVIRONMENTAL PROFESSIONAL STATEMENT

I declare that to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in 312.40 of 40 CFR Part 312 and I have the specific qualifications based on my education, training, and experience to assess a Property of the nature, history, and setting of the subject Property. I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.



Jeffrey A. Smith, P.G.
Associate



Spencer Finch
Project Manager

13.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

Jeff Smith, P.G., has been performing environmental assessments and environmental studies for 25 years. He has conducted many Phase I and Phase II Environmental Property Assessments over this period and is well-versed in the requirements of ASTM E 1527-13. Mr. Smith is a Registered Professional Geologist in Pennsylvania and a member of the Association of Groundwater Scientists and Engineers.

Spencer Finch, P.E., LEED-AP BD+C has been performing environmental assessments and environmental studies for 18 years. He has conducted Phase I ESA's, water intrusion and building envelope investigations, mold, lead, and asbestos inspections and abatement oversight, noise evaluations, chemical exposure monitoring, and indoor air quality & HVAC assessments. Mr. Finch is a Registered Professional Engineer in New Jersey.

Appendix H contains a copy of Mr. Smith's and Mr. Finch's resumes.

EDR Property Tax Map Report

Environmental Data Resources, Inc.'s EDR Property Tax Map Report is designed to assist environmental professionals in evaluating potential environmental conditions on a target property by understanding property boundaries and other characteristics. The report includes a search of available property tax maps, which include information on boundaries for the target property and neighboring properties, addresses, parcel identification numbers, as well as other data typically used in property location and identification.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EDR Environmental LienSearch™ Report

The EDR Environmental LienSearch Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

This Indenture

Made this sixth (6th) day of April in the year of our Lord one thousand nine hundred and Eighty-Eight (1988)

Between KAISERMAN ENTERPRISES L.P., a Delaware limited partnership (hereinafter called Grantor), of the one part, and BOURSE GARAGE ASSOCIATES, a Pennsylvania limited partnership (hereinafter called Grantee), of the other part,

Witnesseth, That the said Grantor for and in consideration of the sum of Ten Dollars ($10.00) lawful money of the United States of America, unto it well and truly paid by the said Grantee at and before the sealing and delivery of these presents, the receipt whereof is hereby acknowledged, has granted, bargained, sold, aliened, enfeoffed, released and confirmed, and by these presents does grant, bargain, sell, alien, enfeoff, release and confirm unto the said Grantee, its Heirs, Successors and Assigns, as partnership property for the uses and purposes of said partnership:

ALL THAT CERTAIN piece of ground with buildings and improvements thereon erected situate in the 5th Ward, City of Philadelphia, Commonwealth of Pennsylvania, as shown on plan of subdivision prepared by Alpha Engineering Associates, Inc., Trevose, Pennsylvania, dated February 9, 1987, last revised March 8, 1988, and more particularly described as follows, to wit:

BEGINNING at a point on the Westerly side of 4th Street (50 feet wide) said point being a distance of 54 feet 10 inches Northwardly from the intersection of the Northerly side of Chestnut Street (60 feet wide) and said Westerly side of 4th Street. THENCE, from said point of beginning Westwardly on a line parallel with said Chestnut Street passing into a wall the distance of 141 feet 4 7/8 inches to a point; thence, Northwardly partially passing through and along said wall the distance of 109 feet 3 inches to a point on the Southerly side of Ranstead Street (variable width); thence, Eastwardly along the said side of Ranstead Street the distance of 141 feet 6 5/8 inches to a point, said point being the intersection of the said Southerly side of Ranstead Street and the Westerly side of said 4th Street; thence, Southwardly along the said side of 4th Street the distance of 109 feet 0 3/4 inches to the first mentioned point and place of beginning. CONTAINING 15,442 square feet or 0.3545 acres of land, more or less.

BEING the same premises which The Philadelphia National Bank, a National Banking Association by Deed dated 12-28-1978 and recorded in Philadelphia County, in Deed Book DCC 1846 page 526 conveyed unto Kaiserman Enterprises L.P., a Limited Partnership, its successors and assigns, in fee.

AND BEING the same premises which Kaiserman Enterprises L.P., a Limited Partnership by Deed dated March 11, 1988 and recorded in Philadelphia County, in Deed Book FHS 1014, page 574 conveyed unto Kaiserman Enterprises L.P., a Limited Partnership, its successors and assigns, in fee.

UNDER AND SUBJECT to certain restrictions, covenants and agreements of record.

D 1037 242

Copyright 1977 Printed and Sold by John C. Clark Co., 1218 Walnut St., Phila., Pa.

Together *with all and singular the* Buildings, Improvements, *Streets, Alleys, Passages, Ways, Waters, Water-Courses, Rights, Liberties, Privileges, Hereditaments and Appurtances, whatsoever thereunto belonging, or in any wise appertaining, and the Reversions and Remainders, Rents, Issues and Profits thereof; and all the estate, right, title interest, property, claim and demand whatsoever, in law, equity,*

or otherwise, howsoever, of, in, and to the same and every part thereof, of it, the said Grantor.

To have and to hold *the said* lot or piece of ground above described, with the buildings and improvements thereon erected

Hereditaments and Premises hereby granted, or mentioned and intended so to be, with the Appurtenances,

unto the said Grantee, its Heirs and Successors

and Assigns, to and for the only proper use and behoof of the said Grantee, its Heirs, Successors

and Assigns forever.

as partnership property for the uses and purposes of said partnership, SUBJECT as aforesaid.

Copyright 1977 Printed and Sold by John C. Clark Co., 1326 Walnut St., Phila., Pa.

Warranty. No. 505 S

And the said Grantor, for itself and its Heirs and Successors,

Does by these presents, covenant, grant and agree, to and with the said Grantee, its Heirs, Successors and Assigns, that it the said Grantor and its Heirs and Successors

all and singular the Hereditaments and Premises herein above described and granted, or mentioned and intended so to be, with the Appurtenances, unto the said Grantee, its Heirs, Successors and Assigns, against it the said Grantor and its Heirs and Successors and against all and every other Person or Persons whomsoever lawfully claiming or to claim the same or any part thereof, by, from, or under it them, or any of them.

shall and will SUBJECT as aforesaid,

WARRANT and forever DEFEND.

In Witness Whereof, the Grantor has caused this instrument to be duly executed as of the day and year first above written.

MEMORANDUM OF LEASE

THIS MEMORANDUM OF LEASE made the 4th day of April, 1988, by and between KAISERMAN ENTERPRISES L.P., a Delaware limited partnership (hereinafter called "Landlord") and BOURSE GARAGE, INC., a Pennsylvania corporation (hereinafter called "Tenant").

WITNESSETH

WHEREAS, Landlord and Tenant are parties to a certain lease (the "Lease") between them dated as of the date hereof, and desire that a Memorandum of the same be duly recorded in the Recorders Office of Philadelphia County, Pennsylvania.

NOW, THEREFORE, intending to be legally bound, Landlord and Tenant hereby set forth the following information with respect to the Lease:

1. The name of the Landlord is Kaiserman Enterprises L.P., a Delaware limited partnership.

2. The name of the Tenant is Bourse Garage, Inc., a Pennsylvania corporation.

3. The addresses of the parties are:

Landlord:	201 S. 18th Street Suite 300 Philadelphia, PA 19103
Tenant:	201 S. 18th Street Suite 300 Philadelphia, PA 19103

FORM OF CERTIFICATION TO BE USED AS REQUIRED BY CITY OF PHILADELPHIA REAL ESTATE TRANSFER TAX ORDINANCE

Morris J. Dean, Esquire (Name) certifies that he is connected with the transaction entered into between Kaiserman Enterprises L.P. (Grantor) 201 South 18th Street, Suite 300 Philadelphia, PA 19103 (Address of grantor) and Bourse Garage Associates (Grantee) 201 South 18th Street, Suite 300 Philadelphia, PA 19103 (Address of grantee) with regard to which this certificate is given in the capacity of attorney for Grantor and Grantee and that the true, full and complete consideration of such transaction, including liens and other encumbrances, is Ten Dollars. ($ 10.00).

The highest assessed value of said real estate for local tax purposes is N/A Dollars ($).

The fair value of the property is One Million Five Hundred Forty-Five Thousand Dollars ($ 1,545,000.00) pursuant to appraisal dated 3/31/88 prepared by Harvey M. Levin Associates.

If the above transaction is not taxable in whole or in part, give detailed explanation in this space.

This is a transfer of real estate which has been rented by Grantor to another, and Grantor is entitled to a credit in the amount of $3,592.13 for taxes paid at the time of the rental pursuant to Section 19-1408(3) of the Philadelphia Realty Transfer Tax Act.

I hereby certify that the statements contained herein are true and correct to the best of my knowledge and belief. I understand that if I knowingly make any false statement herein I am subject to such penalties as may be prescribed by law or ordinance.

USER/ CLIENT QUESTIONNAIRE

LANGAN

LANGAN
ENGINEERING & ENVIRONMENTAL SERVICES

ASTM PRACTICE E 1527-13: USER/CLIENT QUESTIONNAIRE

Please complete the below form and return to
Langan Engineering and Environmental Services Inc.

Providing the following information (if available) to the environmental professional (Langan) is one of the requirements to qualify for one of the *Landowner Liability Protections* offered under CERCLA. Missing or incomplete information could result in a determination that "all appropriate inquiry" is not complete.

General Information

User/Client Name (s): MRP Realty

Property Name: The Bourse Garage

Address: 400 Ranstead Street

Philadelphia, PA 19106

Property Type: Parking Garage / Commercial Building

Type of Property Transaction:

Purchase of property	☒
Financing of property	☐
Sale of property	☐
Ground Lease	☐
Build to Suit Lease	☐
Other_____	

Reason why Phase I ESA is required: Prospective purchase

Site Contact (s): John D'Lorenzo

Required Information

The citation at the end of each item (e.g. 40 CFR 312.XX) is the section of EPA's November 1, 2005 AAI Final Rule which discusses that item.

(1.) Environmental cleanup liens that are filed or recorded against the *property* (40 CFR 312.25).

Yes ☐ No ☒

Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law? Note: In certain jurisdictions, federal, tribal state or local statuses, or regulations specify that environmental liens and AULs be files in judicial records rather than in land title records. In such cases judicial records must be searched for environmental liens and AULs. [Please note, unless specifically delegated in the Scope of Work for the Phase I ESA, it is the User's responsibility to undertake a review of recorded land title records and judicial records to identify any environmental liens and to report these liens to the environmental professional conducting a Phase I ESA.]

ASTM PRACTICE E 1527-13: USER/CLIENT QUESTIONNAIRE

	Yes	No	
(2.) Activity and Land Use (AUL) limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26(a)(1)(v) and vi)).			
Are you aware of any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded against the property in a registry under federal, tribal, state or local law? [Please note, unless specifically delegated in the Scope of Work for the ESA, it is the User's responsibility to undertake a review of recorded land title records and judicial records to identify any activity and use limitations and to report these limitations to the environmental professional conducting a Phase I Environmental Site Assessment.]	☐	☒	
(3.) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).	**Yes**	**No**	
As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	☐	☒	Except as set Forth in environmental materials provided to Langan
(4.) Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).	**Yes**	**No**	
(a.) Does the purchase price being paid for this property reasonably reflect the fair market value of the property? [If no, proceed to Parts 4b and 4c.]	☒	☐	To my Knowledge, the purchase price will reflect fair market value
(b.) If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?	☐	☐	
(c.) Identify an explanation for the lower price and provide a written record of such explanation as an attachment.			
(5.) Commonly known or reasonably known or reasonably ascertainable information about the property (40 CFR 312.30).	**Yes**	**No**	
Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,	☐	☒	Except as set Forth in environmental materials provided to Langan
(a.) Do you know the past uses of the property?	☐	☒	
(b.) Do you know of specific chemicals that are present or once were present at the property?	☐	☒	
(c.) Do you know of spills or other chemical releases that have taken place at the property?	☐	☒	
(d.) Do you know of any environmental cleanups that have taken place at the property?	☐	☒	
(6.) The degree of obviousness of the presence of likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).	**Yes**	**No**	
As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?	☐	☒	

SIGNATURE:

It is understood that the information presented in this form is an integral part of the Phase I ESA process and that Langan will evaluate and rely on this information in the development of the final Phase I ESA report.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 10/25/2013 has revealed that there are 2 CERCLIS sites within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
SABLE DIAMONDS/US ME	***733 SAMSON ST***	***W 1/4 - 1/2 (0.318 mi.)***	***59***	***107***
Lower Elevation	**Address**	**Direction / Distance**	**Map ID**	**Page**
PENN PETROLEUM COMPA	***FRONT & SHUNK STREET***	***SSE 1/4 - 1/2 (0.457 mi.)***	***67***	***113***

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 10/25/2013 has revealed that there are

6 CERC-NFRAP sites within approximately 0.5 miles of the target property.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 03/10/2015 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/10/2015 has revealed that there are 6 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/10/2015 has revealed that there are 2 RCRA-CESQG sites within approximately 0.25 miles of the target property.

Local Land Records

PA ACT 2-DEED: This listing pertains to sites where the Department has approved a cleanup requiring a deed acknowledgment under Act 2. This list includes sites remediated to a non-residential Statewide health standard (Section 303(g)); all sites demonstrating attainment of a Site-specific standard (Section 304(m)); and sites being remediated as a special industrial area (Section 305(g)). Persons who remediated a site to a standard that requires a deed acknowledgment shall comply with the requirements of the Solid Waste Management Act or the Hazardous Sites Cleanup Act, as referenced in Act 2. These statutes require a property description section in the deed concerning the hazardous substance disposal on the site. The location of disposed hazardous substances and a description of the type of hazardous substances disposed on the site shall be included in the deed acknowledgment. A deed acknowledgment is required at the time of conveyance of the property.

A review of the PA ACT 2-DEED list, as provided by EDR, and dated 04/23/2010 has revealed that there are 2 PA ACT 2-DEED sites within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 5 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 10 EDR US Hist Cleaners sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

PA-EFACTS (Pennsylvania - Environmental Facility Application Compliance Tracking System) is a Department-wide database that provides a holistic view of clients and sites (including facilities) that DEP regulates.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/26/2015

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/26/2015

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/25/2013

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

NJ SHWS: Known Contaminated Sites in New Jersey

The Known Contaminated Sites in New Jersey includes sites under the purview of the Site Remediation Program which have contamination present at levels greater than the applicable cleanup criteria for soil and/or groundwater standards. The sites appearing in Known Contaminated Sites in New Jersey are classified as either active, where the site is assigned to a specific remedial program area, or pending, where the site is awaiting assignment to a specific remedial program area. Sites where no further action (NFA) designation has been given are not included in this report unless there are other areas of identified contamination which have not been remediated. This report includes sites being remediated under all of the various regulatory programs administered by the Site Remediation Program such as: Federal Superfund Program, Federal Resource Conservation and Recovery Act (RCRA), New Jersey's Industrial Site Recovery Act (ISRA), New Jersey's Underground Storage of Hazardous Substances Act, New Jersey's Spill Compensation and Control Act, New Jersey's Solid Waste Management Act, New Jersey's Water Pollution Control Act.

State and tribal Brownfields sites

PA BROWNFIELDS: Brownfields Sites

Brownfields are generally defined as abandoned or underused industrial or commercial properties where redevelopment is complicated by actual or perceived environmental contamination. Brownfields vary in size, location, age and past use. They can range from a small, abandoned corner gas station to a large, multi-acre former manufacturing plant that has been closed for years.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US HIST CDL: National Clandestine Laboratory Register
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

PA ACT 2-DEED: Act 2-Deed Acknowledgment Sites

This listing pertains to sites where the Department has approved a cleanup requiring a deed acknowledgment under Act 2. This list includes sites remediated to a non-residential Statewide health standard (Section 303(g)); all sites demonstrating attainment of a Site-specific standard (Section 304(m)); and sites being remediated as a special industrial area (Section 305(g)). Persons who remediated a site to a standard that requires a deed acknowledgment shall comply with the requirements of the Solid Waste Management Act or the Hazardous Sites Cleanup Act, as referenced in Act 2. These statutes require a property description section in the deed concerning the hazardous substance disposal on the site. The location of disposed hazardous substances and a description of the type of hazardous substances disposed on the site shall be included in the deed acknowledgment. A deed acknowledgment is required at the time of conveyance of the property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

NJ AIRS: Emissions Inventory Listing

An emission inventory is an estimate of air pollutant emissions in a given area. Emission inventories are fundamental building blocks used to develop air quality control strategies on a local, regional and national level. Emission inventories are also used to estimate the progress of an air quality program.

Date of Government Version: 12/31/2013

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/30/2013
Date Data Arrived at EDR: 08/19/2013

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Longitude (West):	75.1479 - 75° 8' 52.44''
Universal Tranverse Mercator:	Zone 18
UTM X (Meters):	487365.6
UTM Y (Meters):	4421930.5
Elevation:	25 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5947577 PHILADELPHIA, PA
Version Date:	2013

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

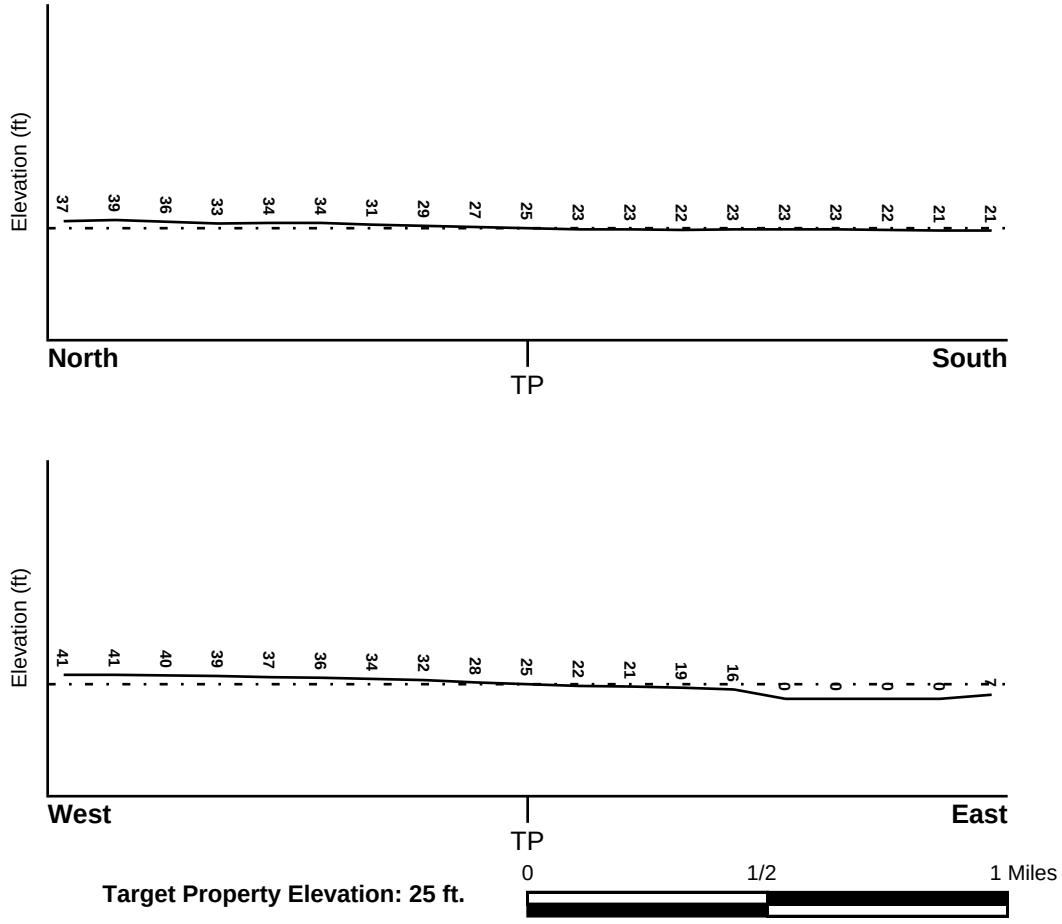
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ESE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County	FEMA Flood Electronic Data
PHILADELPHIA, PA	YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property:	4207570184F - FEMA Q3 Flood data
Additional Panels in search area:	4207570183F - FEMA Q3 Flood data 4207570192F - FEMA Q3 Flood data 4207570191F - FEMA Q3 Flood data 34007C - FEMA DFIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
PHILADELPHIA	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
95	1/2 - 1 Mile NW	Not Reported

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	5 inches	variable	Not reported	Not reported	Max: Min:	Max: Min:

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

Note: Zone 1 indoor average level > 4 pCi/L.
: Zone 2 indoor average level >= 2 pCi/L and <= 4 pCi/L.
: Zone 3 indoor average level < 2 pCi/L.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Pennsylvania Oil and Gas Locations
Source: Pennsylvania Department of Environmental Protection
Telephone: 814-863-0104
An Oil and Gas Location is a DEP primary facility type related to the Oil & Gas Program. The sub-facility types related to Oil and Gas that are included in this layer are:Land Application -- An area where drilling cuttings or waste are disposed by land application; Well-- A well associated with oil and/or gas production; Pit -- An approved pit that is used for storage of oil and gas well fluids.Some sub facility types are not included in this layer due to security policies.

RADON

State Database: PA Radon
Source: Department of Environmental Protection
Telephone: 717-783-3594
Radon Test Results Statistics by Zip Code

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Contact: Spencer Finch

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Langan Environmental Services were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EDR Historical Topographic Map Report

Environmental Data Resources, Inc.s (EDR) Historical Topographic Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topographic Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the early 1900s.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquires (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

EDR Environmental Data Resources Inc

BUILD FAX PROPERTY HISTORY

EXECUTIVE SUMMARY: SEARCH DOCUMENTATION

A search of building department records was conducted by Environmental Data Resources, Inc (EDR) on behalf of Langan Environmental Services on Sep 01, 2015.

TARGET PROPERTY

400 Ranstead Street
Philadelphia, PA 19106

SEARCH METHODS

EDR searches available lists for both the Target Property and Surrounding Properties.

RESEARCH SUMMARY

Building permits identified: **YES**

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

ADJOINING PROPERTY DETAIL

The following Adjoining Property addresses were researched for this report. Detailed findings are provided for each address.

CHESTNUT ST

233 CHESTNUT ST

Date:	**1/5/2015**
Permit Type:	**PP_PLUMBNG**
Description:	**FRESH AIR INLET PA20133241061(HOTEL)**
Permit Description:	**PLUMBING PERMIT**
Work Class:	PLU-EZ PLUMBING
Proposed Use:	
Permit Number:	510951
Status:	COMPLETED
Valuation:	$0.00
Contractor Company:	
Contractor Name:	JOSEPH MORETTI

Date:	**11/24/2014**
Permit Type:	**EP_ELECTRL**
Description:	**EXISTING BUILDING WITH EXISTING PANELS (SERVICE) INSTALLATION OF TENANT FITOUT ON 1ST FLOOR AND BASEMENT AS PER NEC 2008 (CC DISTRICT) INSTALL FIRE ALARM DEVICE AND RELOCATE AND INSTALL NEW AS NEEDED AS PER NFPA72**
Permit Description:	**ELECTRICAL PERMIT**
Work Class:	ELE-ELECTRICAL WITH PLANS
Proposed Use:	
Permit Number:	530741
Status:	COMPLETED
Valuation:	$0.00
Contractor Company:	
Contractor Name:	COBRA ELECTRIC

ADJOINING PROPERTY FINDINGS

Date:	**8/28/2014**
Permit Type:	**PP_PLUMBNG**
Description:	**CONNECT INTO EXISTING MAIN BLDG & S&I FIXTURES, 1-3 COMP SINK, 2-WATER CLOSET, 1-HAND SINKS, 2-LAVS, 1-GLASS WASHER & 1-75 GALLON WATER HEATER (MIXED USE)**
Permit Description:	**PLUMBING PERMIT**
Work Class:	PLU-PLUMBING WITH PLANS
Proposed Use:	
Permit Number:	521189
Status:	COMPLETED
Valuation:	$0.00
Contractor Company:	
Contractor Name:	B. M. CONSULTING SERVICES INC.

Date:	**8/28/2014**
Permit Type:	**BP_MECH**
Description:	**INSTALLATION OF AN HVAC SYSTEM THROUGHOUT A RETAIL SPACE TO INCLUDE TWO (2) AIR CONDITIONING APPLIANCES, REGISTERS/DIFFUSERS, DUCTWORK AND CONTROLS AS SHOWN IN PLANS APPROVED BY PHC 04.21.14.**
Permit Description:	**MECHANICAL PERMIT**
Work Class:	MEC-NEW MECHANICAL SYSTEM
Proposed Use:	
Permit Number:	531454
Status:	COMPLETED
Valuation:	$0.00
Contractor Company:	
Contractor Name:	MICHAEL WIBLE

ADJOINING PROPERTY FINDINGS

Date:	**8/28/2014**
Permit Type:	**BP_MECH**
Description:	**INSTALL A NEW 8'0 HOOD WITH DUCTWORK, EXHAUST AND MAKE UP AIR FAN AS PER PLAN.**
Permit Description:	**MECHANICAL PERMIT**
Work Class:	MEC-KITCHEN HOOD
Proposed Use:	
Permit Number:	539341
Status:	COMPLETED
Valuation:	$0.00
Contractor Company:	
Contractor Name:	RELIABLE FIRE PROTECTION INC

Date:	**8/28/2014**
Permit Type:	**BP_FIRESUP**
Description:	**INSTALL A NEW COMMERCIAL COOKING FIRE SUPPRESSION SYSTEM FOR A 8'0 HOOD**
Permit Description:	**SUPPRESSION PERMIT**
Work Class:	FSP-KITCHEN HOODS (EXTINGUISH)
Proposed Use:

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeymen:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use(s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000
Permit Type: Bldg -
New Permit Number: 101000000405
Status: Valuation: $1,000,000.00
Contractor Company: OWNER-BUILDER
Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

APPENDIX H
RESUMES OF ENVIRONMENTAL PROFESSIONALS

LANGAN

Jeff Smith, PG

Associate

Hydrogeology, RCRA/CERCLA, PA Act 2/Regulatory Strategy, Vapor Intrusion Assessment

25 years in the industry ~ 15 with Langan

Mr. Smith's project experience includes ASTM Phase I and Phase II property assessments, pre-remedial investigation and strategy, RI/FS, RD/RA, alternative remedial strategies, amended RODs, exposure pathway and vapor intrusion assessments and private party cost recovery/allocation under RCRA/CERCLA, as well as the execution of successful investigation/closure strategies under Pennsylvania (PADEP) Act 2 and New Jersey (NJDEP) regulatory programs. His career has required the mitigation of complex technical, regulatory, and legal issues, resulting in development of alternative, cost-effective, practical solutions to environmental problems. His proven managerial and technical skills have routinely resulted in substantial savings and reduced environmental liability for his clients.

He has managed one of the first sites involving chlorinated hydrocarbons on the National Priority List where Monitored Natural Attenuation has been approved as the preferred groundwater remedy via a formal Amendment to the Record of Decision. Through his experience, he has collaborated with members of the USEPA Remedial Technology Development Forum (RTDF) and Policy Advisors in evaluating data needs and regulatory aspects of implementing innovative technologies and alternative remedies at sites.

Selected Projects

Former Byberry State Hospital, Phase II Environmental Assessment, Philadelphia, PA
Former Frankford Arsenal, Environmental Assessment and Due Diligence, Pennsylvania Act 2 Characterization, Philadelphia, PA
The Philadelphia Industrial Development Corporation, Philadelphia, PA
Former Dodge Steel castings Site, Environmental Due Diligence, Philadelphia, PA
Pennsylvania Land Recycling Program (Act 2), PA
US Steel Former Fairless Works, Fairless Hills, PA
Harley-Davidson Motor Company, York, PA
PP&L – Manufactured Gas Plant, Carlisle, PA
Former Phoenix Iron & Steel Site – Pennsylvania Act 2 Special Industrial Area, Phoenixville, PA
Blow-Molding Equipment Manufacturer, South Central Pennsylvania
Molded Millwork Manufacturer, York County, PA
North Penn Area 7 Superfund Site, Montgomery County, PA
CRC Industries, Act 2 Remediation, Bucks County, PA
Ford Motor Company, Lancaster County, PA
First Washington Realty – Due Diligence for Purchase of Multiple Retail Centers, Southeastern PA
Whitmoyer Laboratories Superfund Site, Myerstown, PA
American Olean Tile Company, Superfund Site, Lansdale, PA
Former Kopper's Superfund Site, Newport, DE

LANGAN

Spencer Finch, PE, LEED AP

Project Manager / Sustainability Leader
Environmental Engineering, Bicycle Facility and Trail Design, Sustainable Infrastructure

16 years in the industry ~ 1 year with Langan

Mr. Finch has 16 years of experience, including nearly a decade in environmental engineering, where he managed PADEP Act 2 and NJDEP ISRA projects and prepared EIS and multiple permits for various types of transportation facilities, industries, and building sites. Career highlights include receiving the PA Governor's Award for Environmental Excellence and the ACEC/PA Diamond Honor Award for the Fed-Ex Philadelphia Facility project. He also led the first PADEP-approved Triad approach project in Pennsylvania.

For the past seven years, Mr. Finch helped build multiple trail and park projects around the region, including the 58th Street Greenway project in southwest Philadelphia, an innovative Complete Street and bicycle facility project which he led from vision to construction. Mr. Finch led the creation of The Circuit – Greater Philadelphia's regional trail network during his tenure with the Pennsylvania Environmental Council. He also secured the $23 million USDOT TIGER grant (one of only 51 such grants throughout the United States) to build it.

Selected Projects

Celotex Site Remediation, Philadelphia, PA – Project Manager for a multi-year indefinite quantity environmental services contract for brownfields assessments, performed site characterization, and managed the risk assessment, cleanup plan, remediation and PADEP Act 2 liability protection process for the former 8.5-acre Celotex site, adjacent to the Schuylkill River in southeast Philadelphia.

The site, formerly home to an asphalt and tar roofing plant, had a long list of potential sources of contamination, including: aboveground and underground storage tanks, building materials (such as asbestos and lead-based paint), presence of tar pitch in surface depressions, 55-gallon drums containing unknown wastes, solid waste and construction rubble, and a creosote tank.

Managed emergency cleanup actions that became necessary during the site characterization work when buried vaults and tanks filled with contaminated liquid were discovered; and during construction, when formerly unidentified contamination was encountered migrating from a neighboring site. Obtained expedited review from PADEP, and assisted the construction contractor in coordinating the remedial actions around construction, which meant the $15 million dollar project was completed only one day behind schedule.

Also assisted in the preparation of a Buyer-Seller Agreement between the City and a national express package delivery firm. The Agreement was successfully negotiated based in part on the buyer's comfort that the remedial action plan appropriately addressed site contamination issues. The property sale was achieved, allowing redevelopment of 85 percent of the site; and

conversion of the remainder into a continuation of the Schuylkill River Trail and Park.

National Heat and Power Site, Philadelphia, PA – Project manager for the remediation of this 14-acre former tank farm site. Performed first PADEP Triad-approach site characterization in PA, using geoprobes and cone penetrometer rigs; developed the remedial action plan; and provided construction management services during cleanup, asbestos abatement, and removal of tanks totaling 1.6 million gallons of storage capacity.

Bartram's Mile Stormwater District, Philadelphia, PA – Managed the conceptual design, multi-agency coordination, and permitting for this innovative green infrastructure project. It will build the stormwater infrastructure for a 60-acre redevelopment parcel along the Schuylkill River as an incentive for developers, and as part of the City's plan to extend the Schuylkill River Trail south and to create a new Bartram's Mile R&D district.

Chester Riverwalk, Chester, PA – Project manager for the final design, PennDOT design approvals, construction management, and environmental consulting during construction for 2-mile riverwalk and recreational trail and park construction, located at the foot of the Commodore Barry Bridge in the depressed community of Chester, PA. Site was located adjacent to one of the first Superfund sites in the nation, the Wade Superfund site; and included a portion of another active PADEP Act 2 site.

K&T Trail Site, Philadelphia, PA – Performed site characterization and human health risk assessment, and supervised ecological risk assessment for 2-mile long abandoned railroad corridor, which was proposed to be converted to recreational trail use. Trail is proposed to be completed in 2014.

Reading Viaduct Trail, Philadelphia, PA – Managed the environmental and structural assessment of the Reading Viaduct, a former 1.5-mile long elevated structure that has sat abandoned for over 25 years after decades of use as a regional rail trunk line. Also led the initial feasibility study that compared costs of demolition/remediation versus reuse as a linear park and trail, which has led to the current effort to reuse the viaduct and redevelop the surrounding neighborhood.

Philadelphia Naval Yard Building Investigation, Philadelphia, PA – Performed investigations of asbestos, PCBs, fluorescent lighting, lead-based paint, petroleum contamination and residual wastes, as part of a $10 million, 60 building rehabilitation and demolition program in the historic Philadelphia Naval Yard.

Pradera II Homes, Philadelphia, Pa – Performed Phase I Environmental Site Assessments, and managed site characterization, geotechnical field investigations, and lead-contaminated soil remediation for 55 new homes built as part of the Pradera II project in North Philadelphia.

Marcus Hook Transit-Oriented Development Project, Marcus Hook, PA – Managed the feasibility, environmental assessment, property appraisal, value capture analysis, pro-forma preparation, TRID negotiation, and memorandum of agreement phases of a proposed 100,000 sf mixed-use TOD project with an associated $7 million transportation infrastructure investment. Completed preliminary TRID-legislation steps to secure state financing (including approvals from municipal governments and school boards), and secured a MOU form a potential developer, before the recession made the project infeasible.

Schuylkill Valley Metro Major Investment Study and Draft Environmental Impact Statement, Southeast PA – Performed the utility survey and the environmental field view for the 62-mile corridor proposed for installation of the $1.5 billion regional rail line between Philadelphia and Reading, PA. Assisted in the preparation of the Draft Environmental Impact Statement.

58th Street Greenway, Philadelphia, PA – Led this five-year, $3.5 million, 1.5-mile greenway project from start to finish. Mr. Finch wrote grants and raised funds for the project, and managed all different phases of the project, including feasibility study, conceptual design, and final design. Mr. Finch played an active role in guiding advanced and sustainable traffic and stormwater engineering for the greenway, led coordination activities with various agencies and stakeholders, and provided community engagement through innovative methods.

Spring Garden St Greenway, Philadelphia**,** PA – Led the visioning, community and stakeholder engagement, planning, innovative green stormwater design, and conceptual design for the Spring Garden Street Greenway (a $30-million proposed 2.2-mile complete street and riverfront greenway connection).

Bike Share Business Plan, Philadelphia, PA – Led a multi-stakeholder process to prepare the business plan and prepare the Request for Proposals for the $15 million City of Philadelphia Bike Sharing system.

Circuit Coalition, Philadelphia, PA – Created and co-chaired the Circuit Coalition, the group behind the 285-mile long regional trail network around Greater Philadelphia.

Building Green Report, Philadelphia, PA – Collaborated with former USGBC and DVGBC Chari Sandy Wiggins in a year-long assessment of the state of the green building industry in Philadelphia, summarized in the 2007 Building Green Report, which helped spur additional incentives for the industry and additional green development in the region.

Clinton Climate Initiative Brazil Technical Assistance Mission, **Sao Paulo and Rio de Janeiro, Brazil** – Consultant to the Technical Assistance mission, which included representatives from the Clinton Climate Initiative, Hewlett Foundation, ITDP, and USGBC. Provided policy guidance, suggested prioritization criteria, and other technical assistance to Brazilian municipal and state government staff, architecture firms, energy firms, engineering firms and contractors. Items covered included green building standards, building energy efficiency codes and incentives, bus-rapid transit policies, and trail and bikeway design.

Wissahickon Trail, Philadelphia, PA – Design engineer on the project to restore the trail to usable condition after flooding and erosion had caused mudslides, rockslides and other structural deterioration.

USDOT TIGER Coalition Building and Grant writing, PA, NJ, DE, and MD – Assembled to multi-government and non-profit coalition, performed project screening with DVRPC and PennDOT, and wrote the grant application with the Bicycle Coalition of Greater Philadelphia that secured the $23 million USDOT TIGER grant (one of only 51 such grants throughout the United States). Grant funded construction of 10 trail and streetscape enhancement projects in Philadelphia and in Camden NJ. Also prepared

unsuccessful TIGER 2, 3, and 4 follow-up requests on behalf of DVRPC and the PA Department of Conservation and Natural Resources.

East Coast Greenway in PA, Bucks, Philadelphia and Delaware Counties, PA – Prepared the initial prioritization strategy for ECG construction in PA; and for six years managed the feasibility studies, designs, implementation strategy and ECG PA Committee in implementation of this 60-mile segment of the national 3,000-mile trail.

Center City Greenway Feasibility Study, Philadelphia, PA – Managed $120k, multi-stakeholder feasibility study to identify best route to connect Philadelphia's two riverfronts (Schuylkill and Delaware Rivers) with a new pedestrian and bicycling corridor. Examined 24 total routes, and selected a buffered bicycle lane street pair for short term implementation, and Spring Garden and Market Streets for longer term. Short term recommendation included innovative traffic analysis which looked at traffic capacity for a set of streets instead of individual streets or roads – approach led to the installation of the first buffered bike lanes in Pennsylvania and the Mid-Atlantic, the Spruce and Pine Street bike lane pair.

Bensalem Greenway, Bensalem, PA – Managed public and stakeholder outreach and conceptual design phase for 3.6-mile shared-use path, a portion of the East Coast Greenway.

Technical Assistance, Multiple Municipalities, County Governments and Non-profit Organizations in PA – Funded by the PA Dept of Conservation and Natural Resources and the William Penn Foundation, led multiple technical assistance efforts in trail planning and design, sustainable transportation, water recreation infrastructure, and waterfront revitalization to multiple municipalities in PA, including in Delaware County (Borough of Marcus Hook), Chester County (Kennett Township, Phoenixville), Montgomery County (Lower Merion, Cheltenham), and Bucks County (Bristol Borough); and non-profits such as Clean Air Council, Schuylkill Development Corporation, and New Kensington CDC.

North Delaware Riverfront Gaps Feasibility Study, Philadelphia, PA – managed study in collaboration with the Delaware River City Corporation, which identified preferred alignments for three critical gaps on the Delaware River Trail / ECG along Philadelphia's north Delaware River waterfront.

East Coast Greenway in PA, Bucks, Philadelphia and Delaware Counties, PA – Led multiple feasibility studies and annual prioritization analyses with multiple state, regional and local agencies to select segments for planning, design, and construction.

Bristol Greenway Feasibility Study, Bristol Borough and Bristol Township, PA – Managed vision, public and stakeholder outreach and study to determine the preferred alignment for key 5-mile gap in proposed ECG alignment in PA.

Radnor Trail, Radnor, PA – Design engineer on the project.

Other projects included:

- 1900 Allegheny site, Philadelphia, PA
- 2201 Tioga site, Philadelphia, PA
- Lardner's Point Park Site, Philadelphia, PA
- Route 220 / I-99 Environmental Impact Statement, Williamsport, PA

- PA Turnpike Northeast Extension Widening, Bucks County, PA
- Philadelphia International Airport – multiple geotechnical and environmental projects
- Multiple Permitting Projects for Multiple Transportation Facilities, Industrial Facilities, and Buildings in PA and NJ.

Re: Limited Asbestos Assessment
The Independence Collection
Philadelphia, Pennsylvania
Langan Project No. 220088101

Dear Mr. McGrath:

Langan Engineering and Environmental Services, Inc. (Langan) performed a limited asbestos assessment of the buildings included in The Independence Collection package, which include the following buildings in the Old City section of Philadelphia, Pennsylvania:

- The Bourse
- The Bourse Garage
- Constitution Place
- 400 Market Street

The assessment consisted of walk-thru site reconnaissance to observe general conditions with respect to suspect asbestos containing materials (ACM), and limited sampling of those materials which would have major abatement cost impact. The purpose of the survey was to identify the presence/absence of ACM in connection with a prospective purchase of these properties. The walk-thru assessment was performed between September 30, 2105 and October 2, 2015 by Langan's Mr. Sanjay Patel and Mr. Darshan Desai, Pennsylvania Department of Labor and Industry (PADOLI) certified asbestos building inspectors and a City of Philadelphia Department of Public Health (CPDPH) accredited asbestos investigators. A majority of the building spaces were occupied and operational, and therefore, the assessment was limited to vacant spaces, common areas such as corridors, staircases, roofs, and mechanical rooms. The survey did not include intrusive means of investigation for potentially concealed suspect materials. Also, samples of suspect roofing materials were not collected during the site visit.

ASBESTOS CONTAINING MATERIALS

Samples of the following suspect materials were collected and analyzed for the presence of asbestos. According to United State Environmental Protection Agency (USEPA), a material

with an asbestos content greater than one percent by weight is considered an asbestos-containing material.

The Bourse Building:

SUSPECT MATERIAL	ACM OR NON-ACM
Wall plaster	Non-ACM
Ceiling plaster	Non-ACM
Gypsum board	Non-ACM
Gypsum board joint compound	Non-ACM
Spray-on fireproofing insulation	Non-ACM
Black felt cover wrapped pipe insulation	**ACM**
2' x 2' Square rough textured ceiling panels	Non-ACM
2' x 2' Square with grooves and pin holes ceiling panels	Non-ACM
2' x 4' Square with grooves and pin holes ceiling panels	Non-ACM
2' x 2' Square plain with pin holes ceiling panels	Non-ACM
2' x 2' Square popcorn textured ceiling panels	Non-ACM
9" Square maroon floor tiles	**ACM**
Mastic associated with 9" Square maroon floor tiles	Non-ACM
9" Square tan floor tiles	**ACM**
Mastic associated with 9" Square tan floor tiles	Non-ACM
9" Square beige floor tiles	**ACM**
Mastic associated with 9" Square beige floor tiles	Non-ACM
Mastic on plywood under wall-to-wall carpet	Non-ACM
Glue associated with cork ceiling tiles	Non-ACM
Glue associated with wall-to-wall carpet	Non-ACM
Stone joint caulking – Gray	Non-ACM
Stone joint caulking under gray caulking – Red	Non-ACM
Door caulking	Non-ACM
Window caulking associated with newer metal window frames.	Non-ACM

Fifty-six (56) representative samples of accessible suspect ACM were collected from the Bourse Building. The assessment findings, estimated quantity of ACM and assumed ACM are provided in Table 1A. A copy of analytical test results is provided in the Attachments.

In lieu of intrusive means of survey, and/or due to accessibility issues and building occupancy, the following suspect materials were inaccessible for sampling, and therefore, are assumed to be ACM: pipe insulation (assumed concealed), various floor covering/mastic under wall-to-wall carpet/ceramic tiles, built-up roofing/flashing/mastic materials, glue associated with mirrors, electrical switch panel boards/transite isolator elements, electrical wire insulation, elevator fire doors, elevator brake pads, vapor barrier behind plaster walls on building perimeter, and original window caulking which may exist concealed under new window frames

The Bourse Parking Garage/Theater:

SUSPECT ACM	ACM OR NON-ACM
Exterior stucco plaster	Non-ACM
Gypsum board	Non-ACM
Gypsum board joint compound	Non-ACM
Door caulking	Non-ACM
Duct seam sealant	Non-ACM
Expansion joint caulking	Non-ACM

Seventeen (17) representative samples of accessible suspect ACM were collected from the Bourse Garage. The assessment findings, estimated quantity are provided in Table 1B. A copy of analytical test results is provided in the Attachments.

In lieu of intrusive means of survey, and/or due to accessibility issues and building occupancy, the following suspect materials were inaccessible for sampling, and therefore, are assumed to be ACM: pipe insulation (assumed concealed), various floor covering under wall-to-wall carpet/ceramic tiles, various types of ceiling panels, built-up roofing/flashing/mastic materials, elevator fire doors, electrical switch panel boards/transite isolator elements, and elevator brake pads.

325 Chestnut Street:

SUSPECT ACM	ACM OR NON-ACM
Wall plaster	Non-ACM
Gypsum board	Non-ACM
Gypsum board joint compound	Non-ACM
Spray-on fireproofing insulation	Non-ACM
Stucco wall plaster	Non-ACM
Mud-pack pipe joints attached to fiberglass pipe insulation	**ACM**
Pipe wrap on fiberglass pipe insulation	Non-ACM
2' x 4' Square with grooves and pin holes with 2'x2' square design ceiling panels	Non-ACM
2' x 2' Square rough surface ceiling panels	Non-ACM
2' x 2' Square with pin holes plain ceiling panels	Non-ACM
2' x 2' Square with grooves and pin holes ceiling panels	Non-ACM
9" Square gray floor tiles under wall-to-wall carpet	**ACM**
Mastic associated with 9" Square gray floor tiles under wall-to-wall carpet	**ACM**
9" Square tan floor tiles under wall-to-wall carpet	**ACM**
Mastic associated with 9" Square tan floor tiles under wall-to-wall carpet	**ACM**
Remnants of floor tiles under wall-to-wall carpet	Non-ACM
Glue associated with wall-to-wall carpet	Non-ACM
Duct sealant – Brown	**ACM**

Glue daubs associated with fiberglass duct insulation	Non-ACM
Mastic on cork pipe insulation	Non-ACM
Caulking associated with coping stone and metal counter flash	Non-ACM
Window caulking	Non-ACM
Window glazing	Non-ACM
Pipe flange gasket	Non-ACM
Boiler Breeching insulation	**ACM**

Forty-eight (48) representative samples of accessible suspect ACM were collected from the building at 325 Chestnut Street. The assessment findings, estimated quantity are provided in Table 1C. A copy of analytical test results is provided in the Attachments.

In lieu of intrusive means of survey, and/or due to accessibility issues and building occupancy, the following suspect materials were inaccessible for sampling, and therefore, are assumed to be ACM: pipe insulation (assumed concealed), various floor covering/mastic under wall-to-wall carpet/ceramic tiles, glue associated with mirrors, built-up roofing/flashing/mastic materials, electrical switch panel boards/transite isolator elements, elevator fire doors, electrical wire insulation and elevator brake pads.

400 Market Street:

SUSPECT ACM	ACM OR NON-ACM
Spray-on fireproofing insulation	Non-ACM
Fan/duct insulation	Non-ACM
Tank insulation	Non-ACM
Mud-pack pipe joints attached to fiberglass pipe insulation	Non-ACM
Old pipe insulation	**ACM**
2' x 2' Square with big grooves ceiling panels	Non-ACM
2' x 2' Square with pin holes plain ceiling panels	Non-ACM
2' x 4' Square with grooves and pin holes ceiling panels	Non-ACM
Gypsum board	Non-ACM
Gypsum board joint compound	Non-ACM
12" Square gray floor tiles	Non-ACM
Mastic associated with 12" square gray floor tiles	**ACM**
Linoleum floor covering	**ACM**
Mastic associated with linoleum floor covering	Non-ACM
Remnant of floor tile mastic	**ACM**
Glue associated with wall-to-wall carpet	Non-ACM
Door/display wall caulking	Non-ACM
Expansion joint caulking	Non-ACM
Caulking associated with coping stone and metal counter flash	Non-ACM

Forty-eight (48) representative samples of accessible suspect ACM were collected from the building at 400 Market Street. The assessment findings, estimated quantity are provided in Table 1D. A copy of analytical test results is provided in the Attachments.

In lieu of intrusive means of survey, and/or due to accessibility issues and building occupancy, the following suspect materials were inaccessible for sampling, and therefore, are assumed to be ACM: old pipe insulation (assumed concealed), various floor covering/mastic – observed and/or covered under wall-to-wall carpet/ceramic tiles, glue associated with mirrors, built-up roofing/flashing/mastic, electrical switch panel boards/transite isolator elements, elevator fire doors, electrical wire insulation, elevator brake pads, vapor barrier behind plaster walls on building perimeter, and original window caulking which may exist concealed under new window frames

As required by the USEPA, collected samples were analyzed by individual layer (i.e., wall plaster white and brown coatings were analyzed as two separate samples). Bulk samples of suspect ACM were analyzed using the Polarized Light Microscopy (PLM) analytical methodology in accordance with 40CFR 763 and NESHAPS regulations. Bulk samples of the suspect ACM were analyzed by AmeriSci of Richmond (AmeriSci), Virginia. AmeriSci laboratory is accredited by the American Industrial Hygiene Association (AIHA) and National Voluntary Laboratory Program (NVLAP). Refer to Attachments for a copy of the laboratory test results.

CONCLUSIONS, RECOMMENDATIONS AND REMEDIATION COST

Based on these preliminary findings, we did not identify major issues related to asbestos containing materials in the buildings surveyed. Non-friable and undamaged ACMs were identified; however, these materials may remain in place so long as it does not become damaged or friable. Regular inspection and maintenance of this material pursuant to an asbestos operations and maintenance plan (O&M Plan) is recommended. In the event of significant renovations or demolition that may disturb ACM, a more detailed asbestos survey will be required.

The following is a summary of findings and estimated costs to remediate the friable or damaged ACM, if any, in each building.

<u>The Bourse Building</u>

Exposed friable ACM identified in the building was limited to 60 linear feet of pipe insulation. The insulation was in fair condition. The remaining utility piping was concealed in chases and wall/ceiling cavities. Langan estimates a cost of $6,000 for the removal of friable ACM at the Bourse Building.

<u>The Bourse Parking Lot/Theater:</u>

ACM was not detected in the samples collected from the building.

325 Chestnut Street:

Exposed friable ACM identified in the building was limited to 1,400 square feet of boiler breeching insulation and 400 linear feet of mud-pack pipe joint insulation. The friable ACM was in good to fair condition. Areas of localized damage were observed. The remaining utility piping was concealed in chases and wall/ceiling cavities.

Langan estimates a cost of $4,000 to repair damaged pipe and breeching insulation at 325 Chestnut Street.

400 Market Street:

Exposed friable ACM identified in the building was limited to 115 linear feet of pipe insulation. The insulation was in good to fair condition. Localized areas of minor damage were observed at three locations in roof top mechanical room. The remaining utility piping was concealed in chases and wall/ceiling cavities.

Langan estimates a cost of $3,000 to repair damaged pipe insulation at 400 Market Street.

LIMITATIONS, EXCEPTIONS AND ASSUMPTIONS

Opinions and recommendations presented in this report apply to site conditions and features as they existed at the time of Langan's site visit, and those reasonably foreseeable. They cannot necessarily apply to conditions and features of which Langan is unaware and has not had the opportunity to evaluate.

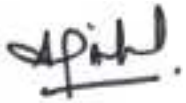
The conclusions presented in this report are professional opinions based solely upon Langan's visual observations of accessible areas, limited test data and current regulatory requirements. These conclusions are intended exclusively for the purpose stated herein, at the site indicated, and for the project indicated.

It is important to recognize that even the most comprehensive scope of services may fail to detect all asbestos containing materials that may be associated with the property. Langan cannot, therefore, act as insurers and cannot "certify" that all asbestos containing materials associated with the property have been identified, and no expressed or implied representation or warranty is included or intended in our report, except that our services were performed, within the limits prescribed by our client, with the customary thoroughness and competence of our profession.

Closing

We trust that this assessment report will satisfy your requirements. If you have any questions or need further assistance, please let us know.

Very truly yours,
Langan Engineering & Environmental Services



Vijay Patel
Senior Associate

TABLE 1C - SUMMARY OF DUE DILIGENCE ASBESTOS ASSESSMENT FINDINGS
The Independence Collection
325 Chestnut Street
Philadelphia, Pennsylvania

Material	Location	Survey Results	Friable / Non-Friable	Condition	Estimated Quantity of ACM or Assumed ACM	Notes/Comments
Boiler breeching insulation (Asbestos warnning stickers were observed)	Basement	ACM	Friable	Fair	1,400 SF	Boiler breeching has asbestos warning stickers. The insulation was in fair condition with localized minor damage in form of dents and open ends. Langan estimates a cost of $4,000 to repair damaged pipe and breeching insulation.
Boiler breeching insulation (Asbestos warnning stickers were observed)	Concealed within Chimney Shaft	ACM	Friable	Fair	2,000 SF	The boiler breeching was concealed within chimney shaft.
Mud-pack pipe joints associated with fiberglass pipe insulation (Observed)	Scattered locations -Throughout	ACM	Friable	Fair	400 LF	Mud-pack pipe joints associated with fiberglass pipe insulation were observed in basement and scattered locations on the upper floors.
Pipe & joint insulation which would exist concealed within wall and ceiling cavities	Scattered locations -Throughout	ACM	Friable	Fair	3,000 LF	---
9-inch tan and gray floor tiles and mastic covered under wall-to-wall carpet/ceramic tiles	Floors 3 and 10	ACM	Non-Friable	Good to Fair	31,000 SF	Majority of floor covering and mastic was observed under wall-to-wall carpet.
Ducts with brown sealant (Observed)	3rd floor - West side empty space	ACM	Non-Friable	Good	300 LF	Brown sealant on duct seam joints was observed above the suspended ceiling on the 3rd floor. Estimated Quantity incudes linear footage of the duct. Similar duct sealant may exist in other areas of the building.
Ducts with brown sealant (Assumed in inaccessible spaces on all floors)	All floors	Assumed ACM	Non-Friable	Good to Fair	12,000 LF	
Various floor covering/mastic covered under wall-to-wall carpet/ceramic tiles	Throughout at scattered locations	Assumed ACM	Non-Friable	Unknown	135,000 SF	Majority of floor covering and mastic was observed under wall-to-wall carpet.
Glue associated with mirrors	Restrooms and 1st floor lobby	Assumed ACM	Non-Friable	Unknown	1,600 SF	---
Built-up roofing, flashing/mastic materials	Roofs	Assumed ACM	Non-Friable	Good	22,000 SF	---

Reporting Notes:

Analyzed by: J. Samuel Baird Date 10/7/15

"NAD - no asbestos detected. Detection Limit <1%. Reporting Limits: CVES - 1%, 400 Pt Ct - 0.25%, 1000 Pt Ct - 0.1%. "Present" or NVA - "No Visible Asbestos" are observations made during a qualitative analysis. NA - not analyzed. NAPS = not analyzed / positive stop. PLM Bulk Asbestos Analysis by EPA 600/R-93/116 per 40 CFR 763 (NVLAP Lab Code 101904-0) and ELAP PLM Analysis Protocol 198.1 for New York friable samples which includes quantitation of any vermiculite observed (198.6 for NOB samples) or EPA 400 pt ct by EPA 600/M4-82-020 (NYSDOH ELAP Lab # 10984; CA ELAP Lab # 2508. Note: PLM is not consistently reliable in detecting asbestos in floor coverings and similar NOB materials. NAD or Trace results by PLM are inconclusive. TEM is currently the only method that can be used to determine if this material can be considered or treated as non-asbestos-containing in New York State (also see EPA Advisory for floor tile, FR 59: 146, 38970, 8/1/94). NVLAP Accreditation requirements mandate that this report must not be reproduced except in full without the approval of the laboratory. This PLM report relates ONLY to the items tested.

CSC-1-B 17	115101199-49 **Location:** Caulking Associated With Coping Stone And Metal Counter Flash, Roof	*No*	NAD (by CVES) by Gordon T. Saleeby on 10/07/15
Analyst Description: White, Heterogeneous, Non-Fibrous, Bulk Material **Asbestos Types:** **Other Material:** Non-fibrous 100 %			

Reporting Notes:
Analyzed by: Gordon T. Saleeby Date: Oct 7, 2015
"NAD = no asbestos detected.; Detection Limit <1%; Reporting Limits: CVES = 1%, 400 Pt Ct = 0.25%, 1000 Pt Ct = 0.1%; "Present" or "NVA = "No Visible Asbestos" are observations made during a qualitative analysis; NA = not analyzed; NAPS = not analyzed / positive stop. PLM Bulk Asbestos Analysis by EPA 600/R-93/116 per 40 CFR 763 (NVLAP Lab Code 101904-0; and ELAP PLM Analysis Protocol 198.1 for New York friable samples which includes quantitation of any vermiculite observed | 198.6 for NOB samples) or EPA 400 pt ct by EPA 600/M4-82-020 (NYSDOH ELAP Lab # 10984); CA ELAP Lab # 2508; Note: PLM is not consistently reliable in detecting asbestos in floor coverings and similar NOB materials. NAD or Trace results by PLM are inconclusive, TEM is currently the only method that can be used to determine if this material can be considered or treated as non-asbestos-containing in New York State. Also see EPA Advisory for floor tile, FR 59, 146, 36970, 8/1/94). NIST Accreditation requirements mandate that this report must not be reproduced except in full without the approval of the laboratory. This PLM report relates ONLY to the items tested.

Reporting Notes:

(1) Trace amount of asbestos (<1%) suspected to be inseparable contamination from adhesive layer.

Analyzed by: Donna M. Blackwell Date 10/13/15

'NAD' = no asbestos detected, 'Detection Limit <1%, Reporting Limits: CVES = 1%, 400 Pt Ct = 0.25%, 1000 Pt Ct = 0.1%; 'Present' or 'NVA' = 'No Visible Asbestos' are observations made during a qualitative analysis; NA = not analyzed NAPS = not analyzed / positive stop; PLM Bulk Asbestos Analysis by EPA 600/R-93/116 per 40 CFR 763 (NVLAP Lab Code 101904-0; and ELAP PLM Analysis Protocol 198.1 for New York friable samples which includes quantitation of any vermiculite observed (198.6 for NOB samples) or EPA 400 pt ct by EPA 600/M4-82-020 ;NYSDOH ELAP Lab # 10994) CA ELAP Lab # 2500. Note: PLM is not consistently reliable in detecting asbestos in floor coverings and similar NOB materials. NAD or Trace results by PLM are inconclusive. TEM is currently the only method that can be used to determine if this material can be considered or treated as non-asbestos-containing in New York State (also see EPA Advisory for floor tile, FR 59: 146, 38970, 8/1/94). NIST Accreditation requirements mandate that this report must not be reproduced except in full without the approval of the laboratory. This PLM report relates ONLY to the items tested.

Hi Tiffany, please perform QA/QC analysis for two types of 9-inch square floor tiles and mastic which were identified as non-ACM during the lab testing for Independence -Mall - The Krouse Building.

Thanks,
Sanjay

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of the ASTM Standard Practice for Assessment of Vapor Encroachment into Structures on Property Involved in Real Estate Transactions (E 2600-10).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name:	Urban land
Soil Surface Texture:	variable
Hydrologic Group:	Not reported
Soil Drainage Class:	
Hydric Status:	Partially hydric
Corrosion Potential - Uncoated Steel:	Not Reported
Depth to Bedrock Min:	> 0 inches
Depth to Watertable Min:	> 0 inches

Soil Layer Information

RMP: Risk Management Plans

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

ACT 2-DEED: Act 2-Deed Acknowledgment Sites

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: 0.333 Mile

This listing pertains to sites where the Department has approved a cleanup requiring a deed acknowledgment under Act 2. This list includes sites remediated to a non-residential Statewide health standard (Section 303(g)); all sites demonstrating attainment of a Site-specific standard (Section 304(m)); and sites being remediated as a special industrial area (Section 305(g)). Persons who remediated a site to a standard that requires a deed acknowledgment shall comply with the requirements of the Solid Waste Management Act or the Hazardous Sites Cleanup Act, as referenced in Act 2. These statutes require a property description section in the deed concerning the hazardous substance disposal on the site. The location of disposed hazardous substances and a description of the type of hazardous substances disposed on the site shall be included in the deed acknowledgment. A deed acknowledgment is required at the time of conveyance of the property.

INST CONTROL: Institutional Controls Site Listing

Standard Environmental Record Source: State and tribal institutional control / engineering control registries
Search Distance: Property

Under the Land Recycling Act (Act 2) persons who perform a site cleanup using the site-specific standard or the special industrial area standard may use engineering or institutional controls as part of the response action. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

2020 COR ACTION: 2020 Corrective Action Program List

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: 0.25 Mile

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

Standard Environmental Record Source: Federal CERCLIS

Search Distance: 0.333 Mile

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/25/2013
Number of Days to Update: 94
Last EDR Contact :05/29/2015
Source: EPA
Telephone: 703-412-9810

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: 0.333 Mile

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Delisted NPL: National Priority List Deletions

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: 0.333 Mile

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/26/2015 Source: EPA

Number of Days to Update: 75 Telephone: Not Reported

Last EDR Contact :07/09/2015

EPA WATCH LIST: EPA WATCH LIST

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013 Source: Environmental Protection Agency

Number of Days to Update: 88 Telephone: 617-520-3000

Last EDR Contact :08/04/2015

ERNS: Emergency Response Notification System

Standard Environmental Record Source: Federal ERNS list

Search Distance: Property

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

FUDS: Formerly Used Defense Sites

Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: 0.333 Mile

The listing includes locations of Formerly Used Defense Sites properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions.

Date of Government Version: 06/06/2014 Source: U.S. Army Corps of Engineers

Number of Days to Update: 8 Telephone: 202-528-4285
Last EDR Contact :07/08/2015

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: Property

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006 Source: Environmental Protection Agency
Number of Days to Update: 40 Telephone: 202-564-2501
Last EDR Contact :12/17/2007

RAATS: RCRA Administrative Action Tracking System

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: Property

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing
Standard Environmental Record Source: Other Standard Environmental Records
Search Distance: 0.333 Mile

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

UMTRA: Uranium Mill Tailings Sites

Standard Environmental Record Source: Other Standard Environmental Records

Search Distance: 0.333 Mile

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

EDR MGP: EDR Proprietary Manufactured Gas Plants

Standard Environmental Record Source: Former manufactured Gas Plants

Search Distance: 0.333 Mile

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

Standard Environmental Record Source: Historical Gas Stations

Search Distance: 0.25 Mile

RECORD SOURCES AND CURRENCY

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

RECORD SOURCES AND CURRENCY

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5' minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW® Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW® Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services. The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Client Responsiveness

21 October 2015

Mr. Charles McGrath
Senior Vice President
MRP Realty
1346 Chestnut Street
Philadelphia, PA 19107

Re: Limited Indoor Air Quality and Mold Survey
Independence Collection Package
Bourse Building, Bourse Garage, Constitution Place,
and 400 Market Street
Philadelphia, Pennsylvania
Langan Project No. 220068704

Dear Mr. McGrath:

At the request of MRP Realty (MRP), Langan Engineering and Environmental Services, Inc. (Langan) has completed a limited indoor air quality (IAQ) and mold survey for the four buildings included in the Independence Collection package in Philadelphia, Pennsylvania. These buildings include the Bourse building, the Bourse Garage, Constitution Place and the building located at 400 Market Street. It is our understanding that the survey was requested as part of a due diligence assessment that is being completed prior to the potential purchase of the properties.

The purpose of the survey was to visually inspect the buildings for evidence of major moisture impacts, to collect moisture measurements, and to collect representative air samples to evaluate potential mold and moisture concerns.

The following sections include our findings and recommendations and a summary of Langan's visual assessment, moisture measurements and sampling data from the IAQ/microbial survey.

Summary of Visual Assessment

A Langan inspector completed a visual assessment of the spaces on 12 and 14 October 2015. During the assessment, the inspector was escorted throughout the buildings by maintenance personnel for the current owner of the properties, Kaiserman Company. The areas which were inspected were generally observed to be clean and in good condition. However, please note that access was not available to all locations within the buildings.

The following table summarizes the findings of the visual assessment for each of the buildings which were inspected as part of this survey. The majority of the locations which revealed chipping/flaking paint on the ceilings and columns are believed to be attributed to historic or on-going water infiltration that is entering the interior space through compromised window caulking. It is recommended that the exterior and interior caulking be further assessed to determine if replacement is necessary.

Table 1 – Visual Inspection (Locations, Findings and Extent of Impacts)

Building	Location	Impacted Materials (Plaster/Ceiling Tile)
Constitution Place	Penthouse – Suite 1308	Four impacted ceiling tiles
	Penthouse – Suite 1305	Plaster around south window and southeast corner (ceiling and column)
	Penthouse – Suite 1313	West wall – plaster on ceiling and column
	12th Floor – NE corner	Impacted plaster on ceiling and column
	11th floor – NW corner	Impacted plaster on ceiling and column
	Suite 1101	Moisture impacts by window
	Suite 1105	Impacted plaster - NE corner window (2 offices)
	Suite 1109	South Wall – conference room (stained ceiling tiles)
	10th – North Wal	Impacted plaster on ceiling
	10th – East Wall	Window penetrations around vents
	10th – NE Wall	Impacted plaster on ceiling
	Suite 917 – NE corner office	Impacted plaster on ceiling
	Suite 911 – West wall	Impacted plaster on ceiling
	Suite 710 – SE corner	Stained wall (from upstairs bathroom leak that has since been repaired)
	Suite 713A – NW corner	Impacted plaster on ceiling
	Suite 713A – West wall	Impacted plaster on ceiling
	6th floor – SE, NE and NW corners	Impacted plaster on ceiling
	Suite 610 – SW corner	Impacted plaster on ceiling
	Suite 620 – NW corner, north wall, east wall	Impacted plaster on ceiling
	Suite 515 – North	Impacted plaster on ceiling
	Suite 510 – NW corner	Impacted plaster on ceiling
	Suite 509 – SW corner	Impacted plaster on ceiling
	Floor 4 – south	Impacted plaster on ceiling
	Suite 300 – E/SE/NE offices	Impacted plaster on ceiling
	Iron Athletics leasehold	Stained ceiling, former leak in rear hallway (addressed by ServPro)
	Basement	Water staining on concrete walls from overflowing drains in parking area located above the basement area
	Vision Graphics space	5 stained ceiling tiles
Bourse Garage	Mechanical Room	Suspect mold on pipe insulation
	Cinema – Theatres 2 and 3	Stained ceiling tiles
400 Market Street	No issues observed	-
Bourse Building	Roof – skylights	Reported leak on eastern side of skylight assembly

Moisture Measurements

Langan used a Delmhorst BD-2100 moisture meter to collect real-time moisture readings within the buildings by inserting probes into building materials. Measurements were compared against the manufacturer's guidelines for the instrument. No elevated measurements were recorded in the locations which were assessed during our survey.

Indoor Air Quality Measurements

Indoor air quality measurements were collected during the site walk from various locations of the buildings to assess existing conditions. A Fluke 975 indoor air quality meter was used to collect temperature, relative humidity, carbon dioxide and carbon monoxide readings within the inspected locations. Measurements were compared against applicable standards and/or guidelines that have been promulgated by respected industry organizations.

Specifically, the American Society of Heating, Refrigerating, and Air Conditioning (ASHRAE) recommends that indoor temperatures range from 68 to 79 degrees Fahrenheit and that indoor relative humidity range from 30-60%. ASHRAE also recommends that indoor carbon dioxide readings be within 700 parts per million (ppm) of outdoor measurements. The National Institute for Occupational Safety and Health (NIOSH) has established a recommended exposure limit (REL) for carbon monoxide of 35 ppm.

Table 2 - Monitoring Locations and Measurements

Location	Carbon Dioxide (ppm)	Carbon Monoxide (ppm)	Temperature (°F)	Relative Humidity (%)
Constitution Place				
12th floor	591	0	74.3	47.4
11th Floor	490	0	71.6	47.8
9th floor	514	0	71.6	48.9
7th Floor	541	0	74.3	45.8
6th floor	615	0	75.2	45.1
5th Floor	609	0	73.4	46.1
4th floor	520	0	75.2	44.7
Bourse Garage – Cinema	584	0	71.6	45.3
400 Market				
12th floor	518	0	74.3	44.7
11th Floor	713	0	73.4	45.2
10th floor	560	0	70.7	46.6
8th floor	536	0	72.5	44.5
7th Floor	565	0	69.8	47.4
6th floor	539	0	69.8	47.4
2nd Floor	539	0	69.8	49.3
Bourse Building				
10th floor	505	0	68.0	52.6
9th Floor	515	0	71.6	43.3
8th floor	420	0	69.8	44.3

7th Floor	444	0	69.8	47.4
5th floor	434	0	68.9	47.8
4th Floor	423	0	70.7	44.1
3rd floor	441	0	71.6	43.5
2nd Floor	550	0	69.8	49.2
Outdoor	392	0	66.2	55.3

All of the indoor carbon monoxide, carbon dioxide, relative humidity and temperature readings were within or below the guidelines/standards that they were compared against. As such, no additional action is required to address these parameters.

Analytical Results of Microbial Samples

As part of the 12 October 2015 inspection, Langan completed microbial air sampling in representative locations of the four buildings to determine the presence/absence of microbial spores. The complete laboratory report is provided as Attachment A. The table below summarizes the sample locations and analytical results for the locations sampled:

Table 3 - Sampling Locations, Results and Recommendations

Location	Type of Sample	Types of Spores (Total Spore Counts or Category)
325 Chestnut – 12th Floor	Air	*Aspergillus, Penicillium* *(300 spore counts / m³)*
325 Chestnut – 4th Floor	Air	*Alternaria, Aspergillus/Penicillium, Cladosporium, Myxomycetes, Pithomyces* *(1,240 spore counts / m³)*
325 Chestnut – Lobby	Air	*Ascospores, Aspergillus/Penicillium,* *(680 spore counts / m³)*
Bourse – Garage	Air	*Ascospores, Aspergillus, Penicillium* *(280 spore counts / m³)*
400 Market – 12th Floor	Air	*Alternaria, Ascospores, Aspergillus/Penicillium, Epicoccum* *(680 spore counts / m³)*
400 Market - 2nd Floor	Air	*Ascospores, Basidiospores, Cladosporium* *(360 spore counts / m³)*
Bourse – 10th Floor NE	Air	*None Detected*
Bourse – 6th Floor South	Air	*Alternaria, Epicoccum* *(160 spore counts / m³)*
Bourse – Lower Level E	Air	*Basidiospores* *(200 spore counts / m³)*
Outdoors (Reference)	Air	*Ascospores, Aspergillus/Penicillium, Basidiospores, Curvolaria, Ganoderma, Myxomycetes, Nigrospora* ***(47,260 spore counts / m³)***

Notes:
Air samples: Background spore count concentration is highlighted (47,260 spore counts/m³). Each of the indoor sample concentrations were below this background, reference concentration.

Findings and Recommendations

Evidence of visually apparent mold growth was not noted during Langan's inspection of the buildings. However, as shown in Table 1, moisture impacts were noted in the several locations of Constitution Place, the Bourse Garage and the Bourse building. As these conditions could lead to future mold concerns within these areas if left unabated, we recommend that the source of the water infiltration be addressed in each of the locations noted.

- Impacted building materials (i.e., plaster, wallpaper and drywall) within the locations should be removed and/or cleaned by individuals knowledgeable in microbial remediation/cleaning procedures.

- Underlying building materials in the remediated locations should be visually inspected for evidence of microbial growth, leaks, staining or worn seals/caulking and addressed as necessary; and

- Cleaning of non-porous building materials (i.e., concrete/brick walls) by wiping or scrubbing with water, or a water and detergent solution. It is important to dry these surfaces quickly and thoroughly to discourage future mold growth.

- A post-remediation inspection should be conducted to ensure that remediation objectives have been achieved.

CLOSURE

We trust that the information and recommendations provided in this report adequately address your concerns. If you have any questions, please do not hesitate to contact us.

Very Truly Yours,
Langan Engineering and Environmental Services, Inc.

No data value(s) for some analyte(s) in this group of samples

Asma Ahmad, M.Sc., Microbiology Manager
or Other Approved Signatory

High levels of background particulate could obscure spores and other particulates leading to underestimation. Background levels of 5 indicate an average of 1 square of spore/particulate visible on the sample. Results apply to the sample as received. Spores counted on overloaded samples. Results are not corrected for sampling efficiency. The report may not be reproduced, except in full, without written approval by EMSL. EMSL bears no responsibility for sample collection activities or analytical results when samples are collected and submitted by the client. Samples received in good condition unless noted otherwise.

Myxomycetes++ = Myxomycetes/Perichaena/Stemonitis

No observable toxic fungi was found associated with this group of samples.

Asma Ahmad, M.Sc., Microbiology Manager
or Other Approved Signatory

High levels of background particulate can obscure spores and other particulates leading to underestimation. Background levels of 5 indicate an overloading of background and particulates, preventing accurate detection and quantitation. Positive + Control observed on overloaded samples. Results are for single cell spores unless otherwise reported. The detection limit is equal to one fungal spore structure per tape. Not analyzed. ** Genus not present, found at 100X. ^ Spore count not available. Fiber and Matrix analysis limited to count of analyst. This report relates only to the samples reported above and may not be reproduced, except in full, without written approval by EMSL. EMSL bears no responsibility for sample collection activities or analytical limitations. Interpretation and use of test results are the responsibility of the client. Samples received in good condition unless otherwise noted.

No discernable relationship was found between the fungi identified in this sample and the fungi identified in the following samples: 051604210-0009

Asma Ahmad, M.Sc. Microbiology Manager
or Other Approved Signatory

The limit of detection (LOD) for counting a single spore per slide is dependent on the analytical sensitivity. Concentrations below the LOD are considered to be background or debris and are not reported. Results are based on the sample as received. Opinions and interpretations are beyond the scope of the laboratory's accreditation. Results relate only to the items tested. Reproduction of this report is prohibited except in full, with written permission from the laboratory. Client is solely responsible for sample collection and for all decisions made based on the results. Unless otherwise noted, all samples were received in acceptable condition. Results apply to the samples analyzed.
